 - 120 days in case of chemicals. 16.1.4
 - In case of locally manufacturing item, the Pari equivalent to 3 months delivery schedule will be required after placement of purchase the which should remain valid till completion of final satisfactory delivery of the ordered quantity. 16.1.5
 - In case of small diameter line pipe (MS/MDPE) the Production all remain valid up to 3 months after completion of satisfactory final delivery.
 - In case of Vehicles, Manufacturer's Warranty is required in law
- The guarantee will be released after completion of this period, subject to sa sfac 16.2 of the supplied equipment/machinery/system as mentioned at 16.1 above. The the guarantee valid at their cost until fulfillment of the obligations.
- 16.3 In case the bidder does not submit the performance bond as specified, the delivery time of goods shall be deemed to have commenced 10 days (15 days in case of import) from the issuance of letter of intent/purchase order. The proceeds of the performance bond shall be payable to the Company as compensation for any loss resulting from the supplier's failure to complete its work under the purchase order/contract. The validity period of the performance bond is to be extended if the delivery date/period is being extended mutually by the Company/Supplier.
- The performance bond will be discharged / returned by the Company not later than thirty (30) days 16.4 following the date of completion of the supplier's work under the purchase order/contract including any warranty/guarantee/performance obligations as specified in the special conditions of contract. The supplier shall not be absolved of their liability to perform in case of encashment of performance bond by the Company, who shall have the right to claim and receive all damages/losses incurred due to non-performance.
- 16.5 The Company shall promptly notify the supplier in writing for any claim arising under this guarantee. Upon receipt of such notice, the supplier shall promptly repair or replace the defective goods or parts thereof, without cost to the Company other than, where applicable the cost of inland delivery of the repaired or replaced goods or parts from the port of entry to the final destination.

ern G

Procuremen Dept.

- 16.6 If the supplier, having been notified, fails to rectify the defect (s) in accordance with the purchase order/contract, the Company may proceed to take such remedial actions as may be necessary at the supplier's expense. Any amount payable by the supplier under this clause may be recovered by the Company by withdrawing from the performance bond without having to notify or seek the approval of the supplier.
- Nothing herein contained shall be construed to limit supplier's obligation of performance of the order/contract to the value of the performance bond.
- 16.8 Guarantee/Warranty: In case where performance guarantee is not applicable, the supplier shall confirm that all suppliedgoods under the contract/purchase order are new, unused, of the most recent or current models and incorporate all recent improvements in design and goods unless provided otherwise in the contract/purchase order. This guarantee shall remain valid for a period of twelve to eighteen months after the goods have been delivered or commissioned.

17. Purchase O der/Contract:

Purchase order of dioted material may be placed on fulfillment of conditions mentioned at 14 &16 above which is through complete order of proceedings with the suppliers.

18. Assurance:

The successful bidder with be required to give satisfactory assurance of its ability and intention to deliver the goods, pursuant to the trader aquiry and contract within the time set forth therein:

19. Force Majeure:

- In the event of either party here, being rendered unable, wholly or partially, by force majeure circumstances to carry out its 4b gations under the purchase order/contract documents, such party shall give notice and full particular and other satisfactory evidence of such force majeure circumstance(s) in writing or by fix to the other party within 7 days after theoccurrence of the cause(s). Relied upon the obligations of the party giving such notice so far as they are affected by such force majeure shall be suspended for the erriod during cause(s) shall, as far as possible, be remedied and obviated with all reasonable departs. The term 'force majeure' as employed herein, shall mean acts of God or public enemy, civil in direction, fires, floods, earthquakes or other physical disasters, order or request of governments, plochade or embargo. It is, however, clarified that strikes, lockouts, shortage or non-availability of the materials, rains, and disturbances, other labor dispute or congestion's in ports on the supplier's side and I not be included in the term 'force majeure'.
- In case the force majeure contingencies last continuously for increasing one month, both parties will agree on the necessary arrangements for the further implementation of the purchase order/contract. In case further implementation is unforesceable and impressible, both parties shall arrange for the termination of the purchase order/contract, but without previously to their rights and obligations prior to such termination it being understood that each party shall affect to contractual obligations so far as they have fallen due before the operation of force majeure.

20. Amendment in purchase order/contract:-

- 20.1 The Company may at any time by a written notice to the supplier make changes within the general scope of the purchase order/contract in any one or more of the following:-
 - 20.1.1 Drawings, designs or specifications where goods to be furnished under the purchase order/contract are to be specifically manufactured for the Company.
 - 20.1.2 The method of shipment or packing.
 - 20.1.3 The place of delivery.
 - 20.1.4 Quantities of item up to a maximum variance of +15% of purchase order/contract value.

Procurement Dept.

- 20.2 Company reserves the right to increase/decrease the quantities or delete any or all items listed in the price schedule/schedule of requirement/bid form without assigning any reason.
- Upon notification by the Company of such modifications the supplier shall submit to the Company an estimated cost for the proposed modification within ten (10) calendar days of receipt of notice of the modification and shall include an estimate of the impact (if any) of the modification on the delivery dates under the purchase order/contract, as well as a detailed schedule for the execution of the modification, if applicable.

- 20.4 'The supplier shall not perform modification in accordance with clause 20.1 above until the Company have authorized a modification order in writing on the basis of the estimate proyided by the supplier as described in clause 20.3.
- 20.5 Modification mutually agreed upon shall constitute a part of the work under the purchase order/contract and the provisions and conditions of the contract shall apply to the said modification.
- 20.6 If modification made by the Company results in a variation in purchase order/contract quantities whose net cost effect is within 15% of the total value then the original purchase order/contract rates would be applicable. Any "modification" affecting the quantities and the corresponding cost effect beyond 15 percent would be mutually agreed upon between the Company and the supplier.

21. Extension is delivery period:

- Delivery fishe goods shall be made by the supplier in accordance with the schedule of requirement and delivery period; however, the supplier may claim extension of the time limits as set forth in the schedule of requirements and delivery period in case of
 - 21.1.1 Modifications the goods ordered by the Company pursuant to clause 20.
 - 21.1.2 Delay in provided on of any services which are to be provided by the Company (services provided by the Company shall be interpreted to include all approvals by the Company under the contract).
 - 21.1.3 Delay in performance from caused by orders issued by the Company.
- The supplier shall demonstrate to the Co apany's satisfaction that it has used its best endeavors to avoid or overcome such causes for delay at the parties will mutually agree upon remedies to mitigate or overcome such causes for delay.
- Not withstanding clause 21.1 above, the supplier shall not be entitled to an extension of time for completion unless the supplier at the time of such from stances arising, immediately has notified the Company in writing of any delay that it may faim as caused by circumstances pursuant to clause 21.1 above and upon request of the Company he supplier shall substantiate that the delay occurred is due to the circumstances referred by the supplier.

- 3.4 "Blacklisting Order" An administrative penalty diqualitying a firm/individual from participating in procurement for a given period.
- 3.5 "Suspension" The administrative penalty imposed for infractions committed during the competitive bidding stage, whereby such firms/individuals are published from further participation in the bidding process of Procuring Agency.
- 3.6 "Contract Implementation" A process of undertaking a project or contract in accordance with the contract documents.
- 3.7 "Termination of Contract" Extinction of contract by reason or resolution or rescission under applicable rules/regulations/laws arising from the default of the firms/individuals.
- 3.8 "Delist" Removal of supplier/contractor from blacklisting.
- 3.9 "PA-Project Authority -" A three-member committee comprising of User, HSE&QA & Procurement Deptt. to address the issue.
- 3.10 RPC-SSG's Rights Protection Committee To examine the justification of PC.

Page 1 of 10 Dated: 12th October 2020 Revision-1: Dt: 3 Sept 2024

4. REASONS FOR BLACKLISTING

4.1 The following shall comprise the broad multilateral guidelines for blacklisting:

4.1. I "Corrupt Practice" means the offering, giving, receiving, or soliciting, directly or indirectly, of anything of value to influence the action of a public official in the procurement process or in contract execution;

4.1.2 "Fraudulent Practice" means a misrepresentation or omission of facts in order to

influence a procurement process or the execution of a contract;

4.1.3 "Collusive Practice" means a scheme or arrangement between two or more bidders, with or without the knowledge of the Purchaser, designed to establish bid price at artificial, non-competitive levels, and

4.1.4 "Coercive Practice" means harming or threatening to harm, directly or indirectly, Person(s) / Firm(s) or their property to influence their participation in the

procurement process or affect the execution of a contract.

4.2 In addition to above, blacklisting of firms/individuals may be resorted to when the charges are of serious nature, which include but are not limited to the following:

Competitive Bidding Stage

During the competitive bidding stage, the Procuring Agency shall impose on bidders or prospective hidders the penalty of Suspension from participating in the public bidding process, a reliquit prejudice to the imposition of additional administrative sanctions as the internal rule of the agency may provide and/or further criminal prosecution, as provided by applicable laws, for violations committed which include but are not limited to the following:

- i. Submission of Signature requirements containing false information or falsified documents.
- ii. Submission of bids that come in false information or falsified documents, or the concealment of such information in the bids in order to influence the outcome of eligibility screening or any other page of the public bidding.
- eligibility screening or any other cage of the public bidding.

 iii. Submission of unauthorized or fate documents for pre-qualification/ tendering i.e. without specific authorization from the trincipals/ manufacturers etc.

- viii. Contractors who have negotiated ple Bargain under the National Accountability Ordinance 1999, or contractors involved want any other criminal proceedings conducted by any proved specifically in relation to supplies made investigation agency where default has to or contracts concluded with SSGC.
- Involved in litigation or needless petitioning a influence or obstruct the procurement process either on his own behalf or at the behest of any other vested interest;
- x. A firm may be disqualified for a period extendance to two years in case a decision by a court is awarded against the said firm after litigation, or the firm is involved in litigation at least three times during two financial years, or where a firm has on account of litigation caused substantial financial losses to SSGC;
- xi. Blacklisted by other Federal and Provincial Government Mail ungen Divisions / Departments and organizations / autonomous bodies subordinate thereto; and
- Blacklisting in case of Joint Venture firms will also result in terr ina on of the concerned Joint Ventures Partners.

5. SYSTEM OF PENALTIES

For the purpose of uniformity, following system of penalties shall be adopted for procurement of goods, works and services:

5.1 Blacklisted and henceforth cross debarred for participation in any public procurement or disposal proceedings for the period of not more than ten years, if corrupt and fraudulent

> Page 4 of 10 Dated: 12th October 2020 Revision-1: Dt: 3 Sept 2024

practice as defined in these rules is established against the bidder or the bidders in pursuance of blacklisting proceedings;

- 5.2 blacklisted and henceforth cross debarred for participation in respective category of public procurement or disposal proceedings for a period of not more than three years, if the bidder fails to perform his contractual obligations during the execution of contract or breaches the contract due to his capacity and capability to perform or otherwise. However, procuring agency shall initiate such blacklisting or debarment proceedings after exhausting the forum of arbitration, provided that such provision exists in the conditions of contract, and if such failure or breach is covered in the respective dispute settlement clauses of the contract, and
- 5.3 blacklisted and henceforth cross debarred for participation in respective category of public procurement or disposal proceedings for a period of not more than six months, if the bidder fails to abide with a bid securing declaration, however without being indulged in any corrupt and fraudulent practice.

6. SUSPENSION AND BLACKLISTING PROCEDURE

- 1. The app ier or contractor who is to be blacklisted for a specified period is given adequate opportunity of being heard.
- 2. The supplier contractor who is to be blacklisted for a specified period is called for meeting by providing adequate time, so as to given him adequate opportunity of being heard before taking a praction.
- 3. In case the supplier or contractor does not attend the meeting on the given date and time a final notice is served to the place to attend the meeting on the revised date and time. Despite the final notice, if the supplier or contractor does not attend the meeting as per schedule, automatically be considered at fault. Action will be taken as per below clauses 5 to 9.
- 4. A three-member committee will form comprising of User, Procurement and HSE&QA departments to address the issues in the meeting with the supplier or contractor. Members of committee may not below of grade IV.
- 5. In case the supplier or contractor is found at default based on the fact of the case as well as the tender terms and conditions, and do not just from arounds of his default as per the tender terms and conditions, the approval is sough, temathe management for their temporary or permeant blacklisting along with encashment of id bond or PBG as the case may be.
- 6. The decision of the management is communicated to the defaute scholier or contractor through a formal letter.
- 7. A copy of the letter of the defaulted supplier / contractor alongwith covering letter with pertinent documents is / also forwarded to the Authority (PPRA) for uploading on PPRA website.
- 8. The blacklisting information of the supplier / contractor is uploaded on the websites.

Page 5 of 10 Dated : 12th October 2020 Revision-1 : Dt: 3 Sept 2024

- Any bidder not satisfied with the decision of the procuring agency, may lodge an appeal
 in the relevant court of jurisdiction.
- 10. After coming into force the procurement contracts, the dispute between the parties to the contract shall be settled by arbitration.

7. STATUS OF BLACKLISTED FIRM/INDIVIDUAL

Blacklisting of a firm/individual will not affect other ongoing contracts/works/supply orders. However, such blacklisted firm shall stand barred from all future tender processes/participation and Standing Security, if any, could be confiscated until recovery of financial damages ascertained by the authority while issuing Blacklisting Order.

8. DELISTING

A temporary blacklisted firm / individual shall be automatically restored after the period for the penalty has lassed, unless the procuring agency wants to maintain the blacklisted status of firm / individual case, justifiable reasons with the prior approval of Appellate Authority. In the latter case, the temporary blacklisted firm / individual shall be restored.

9. AMENDMENTS

- 9.1 In the implementation of Blacklisting Mechanism, the modifications may be introduced thereto through the amendment of its specific provisions as the need arises.
- 9.2 Any amendment to this Blacks and Mechanism shall be applicable to tenders advertised for bid after the effectivity of me said semendment.

10. EFFECTIVITY

The Blacklisting Mechanism or any amendments of reof shall take effect immediately and from the date of its issuance. All future tender documents and the governed by these instructions. However, these cannot override the provisions of Public Pocurement Rules, 2004.

11. The Steps to be Followed are Asserter

The causes and reasons to be taken into consideration for Debarment / Blacks and of any Person(s) / Firm(s) are given as under:

1. PRE-AWARD STAGE:

Page 6 of 10 Dated: 12th October 2020 Revision-1: Dt: 3 Sept 2024

- iii Commission of embezzlement, criminal breach of trust, theft, cheating, forgery, bribery, falsification or destruction of records, receiving stolen property, false use of trademark, securing fraudulent registration, giving false evidence, furnishing of false information of serious nature.
- iv Submission of false bid security or infringement of documents to get undue monetary or any other benefit.
- v Breach of confidentiality of evaluation process based on illegal access or in any way to get undue benefit or to provide benefit or to frustrate the bidding/evaluation process. This will also include attempts to sabotage the bidding process directly or indirectly.

2. POST- AWARD STAGE:

The following shall be considered, interalia, the events / reasons for initiating proceedings under this Mechanism at the Post-Award Stage:-

- i. Extracrlinary delay in signing or refusal to accept the Notification of Award and/or the contract without any cogent reason.
- ii. Misconduct, i.e., fulure to proceed with the signed contract, withdrawal of commitments, quoting an unreal phase and unfairly low financial offer and subsequently withdrawing such an offer, fru training the evaluation/bidding process and not responding to written communication in a large hable time.
- iii. Causes mentioned in Sub-Class i, ii and iii above.
- iv. Submission of fake / frivolous or hun lated Performance Guarantee or Advance Payment Guarantee etc.
- v. Non-satisfactory performance during the key tion of the contract / purchase order.
- vi. Non-performance or Breach of provisions / cause of the contract agreements/tender... terms.
- vii. Notwithstanding the warranty/defect liability period, any defect in a product, equipment, plant, facility or services rendered that may subsequently are a during field operations within 5 years of its commissioning.
- viii. Failure to honour obligations within warranty period or defect liability period as defined in the contract.

3. OTHER CAUSES:

- i. The Person(s) / Firm(s) is blacklisted by any Government department in Pakistan, or it is established that the firm is involved in any kind of corruption or corrupt practices anywhere in the world.
- ii. Violations of provisions / instructions set down in the Bidding Documents.

Page 7 of 10 Dated : 12th October 2020 Revision-1 : Dt: 3 Sept 2024

- iii. Any attempt / activity to malign or bring SSGC into disrepute and harm its interest(s).
- iv. Person(s) / Firm(s)(s) blacklisted by International Financial Institutions (donor agencies) will be liable to be blacklisted after receipt of confirmation from the donor agencies without any further proceeding.
- v. Any other cause deemed just and appropriate by CPPA in the given circumstances.
- Note: (1) If above mentioned causes occur either on part of the principal bidder or the local agent, both shall be considered for blacklisting / debarment.
 - (2) The authorization of the foreign bidder to local agent shall contain his complete particulars including the name of the company, name of the owner, National Tax number (NTN), CNIC (Computerized National Identity Card) No. etc. In case, the said information is found to be missing, even after calling for the same within a reasonable time, the authority letter shall not be accepted.
 - (3) The Dit ling Documents shall be issued against original authority letter or in case of scanned copy, the annul of the foreign bidder shall be enclosed. However, at the time of bidding, the original authority letter shall be attached with the bid. In the absence of the same, the bid shall be rejected.
 - 4. FORMULATION of SSCC's Rights Protection Committee: A permanent Committee namely "SSGC's Rights Protection Committee (RPC or Committee)" shall examine the justification of the reasons given by the Protect Authority prior to blacklisting. Member of RPC must be one grade up from the members of PA.
 - 5. PROCEDURE FOR BLACKER TAYS

Upon receipt of or obtaining information and or knowledge that any Person(s) / Firm(s)(s) is involved in practices mentioned in hereinably counder the heading of Pre-Award Stage; Post-Award Stage and Other Causes, the concerned toolect Authority / formation shall promptly formulate its recommendations and submit through the Managing Director, SSGC to SSGC's RPC / Committee along with its findings, details of charges and documentary evidences to initiate proceedings under this Mechanism.

6. INITIATION OF AN ACTION

- (i) Within a period of 15 days after receiving the recommendations of Blacklisting / Debarment from the concerned Project Authority, the Convener of the Committee shall issue a Show Cause Notice ("Notice") thereby informing the Person(s) Firm(s) about the alleged charges and shall provide an opportunity to the defend said that et within a time period of 15 (fifteen) days.
- (ii) The Person(s) / Firm(s)(s) shall be accorded adequate opportunity of hearing in order to defend the charges within the given timelines.
- (iii) The Notice to the Person(s) / Firm(s) shall be sent at the mailing/postal address as provided under the Contract or any other address provided by way of subsequent written communication by the Person(s) / Firm(s) The non-receipt of the Notice due to incorrect / change in mailing address without any written communication shall not be attributable to

Page 8 of 10 Dated : 12th October 2020 Revision-1 : Dt: 3 Sept 2024

SSGC. In case of non-receipt of any reply from the accused Person(s) / Firm(s) within the formulated time, but not less than the time given in (i) above, the Committee shall have the right to proceed on Ex-parte basis.

7. DECISION

The committee shall hold an independent inquiry/investigation as the case may be, and, which may include site visits and interviews with the parties concerned. The Committee shall complete the entire inquiry/investigation, preferably within a period of 30 days after receipt of response from the Person(s) / Firm(s) against whom proceedings under this Mechanism has been initiated and shall present the report to the Managing Director, SSGC. If required, the Committee may report the case to an appropriate law enforcement agency depending upon the nature of the case for detailed investigations with the prior approval of Managing Director, SSGC. iii. The Person(s) / Firm(s) against whom proceedings have been initiated under this Mechanism shall not proceed for arbitration/litigation during the proceedings for blacklisting.

8. COMMUNICATION OF DECISION

After recommendation for temporary & permanent blacklisting by "SSGC's Rights Protection Committee (RPC)" the Person(s) / Firm(s) concerned shall be informed within 10 days of such decision. The decision of the Committee will be notified on SSGC 's and PPRA's websites and shall also be conveyed to Pakistan Engineering Council.

The temporary Blacklisting of the grounds and reasons specified herein above shall be for a reasonable specified period of time and as a general rule of prudence, the period may not exceed three years, except in cases what debarment/blacklisting has been done by any other government department or an International Financial Institution (Donor Agency). In case the Person(s) / Firm(s) has been blacklisted by the government department or the International Financial

Institution (donor agency), the period of tempo any blacklisting/debarment shall be for a maximum period of 3 years or the time period it which the concerned government department/International Financial Institution (Donor Agency) debarred the contractor (whichever is higher). However the permanent blacklisting cannot be revived.

Action after the Person(s) / Firm(s) are placed on Blacklisting I st;

- i. The decision of blacklisting will be immediately circulated to all concerned as mentioned herein above under the heading Communication of Decision.
- ii. In case of a contract already awarded to a Person(s) / Firm(s) which has been clacklisted and termination is either not possible or not feasible, the concerned Project Authority. (a) proceed in this case to complete the contract with the approval of Competent Authority. (iii) The blacklisted Person(s) / Firm(s) shall stand disqualified from bidding from the date of decision against them. Any pending bids shall also stand rejected. If a contract has already been awarded to Person(s) / Firm(s), it shall be voidable at the option of SSGC. (iv) A separate register or data base will be maintained for blacklisted firms indicating reasons and period.

Page 9 of 10 Dated: 12th October 2020 Revision-1: Dt: 3 Sept 2024

9. Effectiveness

This Mechanism or any amendments thereof shall take effect immediately with the approval from Managing Director of Sui Southern Gas Company Limited.

SURFACE PROFILE COMPARATORS

CC/T&D/92 REVISION: 00 DATE: 13-07-2023

1. SCOPE

These specimes surfaces are indispensable tools for assessing the conformity between newly blasted profiles or carbon steel pipeline surfaces to pre-defined profiles. They facilitate the evaluation of the height satricacy, and level of roughness exhibited by the metallic surface to match visual standard Sa 2005 ISO 8501-1, thereby determining the efficacy of the protective coatings that are subsequently administered to these surfaces.

2. SPECIFIC REQUIREMENTS

The surface profile comparators shall be planar and that have dimensions in accordance with ISO 8503-1. To ensure optimal accuracy in the evaluation process, it is essential for the surface comparators to encompass a comprehensive range of four assinct profiles.

Description	Section Profiles	
Grit Surface Comparator	25, 60, 100, 150	μm S
Shot Surface Comparator	25, 40, 70, 100	- μm

3. MANDATORY DOCUMENTS

procuremen

HSE & QA-IMS POLICY

SSGC is committed to the Health and Safety of all its Employees & Stakeholders preservation of Environment and achieving Operational excellence by improving Quality of products / services along with efforts to promote Safety Culture in the Company Continual improvement of HSE and OA performance by regularing potental hazards to prevent injuries and illness is our key priority. It also includes communication consultation and participation on HSE and OA objectives and targets with stakeholders, conserving resources and adhering to applicable Laws and Regulations in all activities / processes related to the Regulations in all activities / processes related to the Hausmission and Distribution of natural gas within its franchise area.

Maraging Director August 2021

PURPOSE

The purpose of this procedure is to identify the context of the organization, assess the risks and opportunities and establish controls associated with all the activities undertaken by the company to Address risks and opportunities for:

SSGC existing facilities/installations.

- Any routine/non-routine activity, performed within permanent locations or outside permanent locations of SSGC, that requires prior permit/safety analysis to identify and mitigate safety risks.
- Any new project.
- Covering all a activities performed by SSGC taking into consideration of compliance, objections, risks & opportunities within the scope, external and rate to scope of operations, requirements, information, needs and explicitations of relevant interested parties.
- Providing guidance to employees in relation to hazard identification, risk assessment and risk control in respective areas. Identification, control, monitoring and management of
- management of environmental aspects and assessment of its impacts

SCOPE

This procedure is applicable to the identification of ccupational health and safety hazards and associated risks, environmental aspects and impacts associated with activities, processes and equipment related to SSGC existing facilities/installations, any new project of a permanent locations or outside permanent locations ry routine/non-routine activity, performed within that requires prior permit/safety analysis to identify and mitigate occupational health and safety risk.

3. A DEFINITIONS & ACRONYMS

- HAZARD: Source or situation with a potential for harm in term of highly or ill health, damage to property damage to workplace environment, or a combination of these
- RISK: Combination of probability of occurrence of a hazardous event of posure and the resulting
- OPPORTUNITY: Opportunities can arise as a result of a situation favorable result, for example, a set of circumstances that allow the organization to hleving an intended products and services, reduce waste or improve productivity. Actions to address or a tomers. develop new munities can also
- SWOT: Strength, Weakness, Opportunity & Threat.
- RISK MANAGEMENT: The set of control measures used to reduce or eliminate spe
- RISK ASSESSMENT: Risk Assessment is a systematic approach to hazard identification overall process of estimating the priority of risk and deciding significance of risk. g.
- RISK ASSESSMENT METHODOLOGY: Risk priority shall be defined by the risk assessment matrix. Hazards related to applicable legal requirements will fall in the high risk category. h.
- HIRA: Hazard Identification and Risk Assessment,
- EAIA: Environmental Aspect and Impact Assessment. I.
- ·]. IEE: Initial Environment Examination.
- EIA; Environment Impact Assessment. L
- ILL HEALTH: Identifiable, adverse physical or mental condition arising from and/or made worse by a m.
- OHS&E: Occupational Health, Safety & Environment.
- PTW: Permit to Work. л.
- MOC: Management of Change. ٥.
- MOC Owner. The employee who initiates the MOC. p.
- JSA: Job Safety Analysis.
- EXECUTING DEPARTMENT: It refers to the department performing the work or is responsible to get the

HandBook | February 2022

4.1 Corporate HSE&QA In-charge

- Managing OHS&E risks and their controls.
- Reporting to Senior Management on OHS&E related issues.
- Providing support to corporate HSE&QA team and zonal representatives.
- Liaise with zonal HSE team leaders/HSE&QA representatives for implementation of this procedure

Zonal HSE team leaders

- Carrying out HIRA, providing and utilizing resources to identify and review OHS&E risks and implementing their controls in consultation with corporate HSE&QA team.
- Ensuring the employees, contractors and visitors have sufficient knowledge related to OHS&E.

 Maintaining costs of the OHS&E with the help of local USE20A
- ds of the OHS&E with the help of local HSE&QA team. Implementing this procedure. L'aise with corporate HSE&QA team if required. d.

Zonal HSE&OA representative

- Coordinating with Zona MSS team leader for carrying out HIRA and EAIA in their zones. Liaise with corporate HSE &O team and zonal HSE team leader for OHS&E. Reviewing/monitoring HIRA and EAIA in their zones and providing input on any changes.

4.4 Departmental Head of Exec Department :

Acquiring PTW for any activity that requ dor permit to identify and mitigate safety risks. Ensure implementation of JSA for job/ag erromed outside SSGC permanent locations.

Employées :

Participating in the identification and assessment team leader or HSE&QA representative.

Visitors & Contractors

Identifying and reporting any risk or hazard at any location of SSC. This also includes the worksites and SSGC temporary locations during project executions.

DECISION MATRIX

Type of Risk/Hazard Assessment	Methodology	Naibility_
HIRA	Periodic risk assessment of SSGC's existing facilities/installations such as Head office. Headquarters, Regional offices etc.	Zonal HSE team
PTW	On-site Risk assessment (for Permanent Locations) for any routine/non-routine activity that requires prior permit to identify and mitigate safety risks.	nead/Contractor executing the task/activity
) JSA	On-site Risk assessment (for Field Locations) for any routine/non-routine activity.	requiring PTW Departmental head/Contractor executing the field

Section 2 Hazard Identification and Risk Assessment

I. Hazard Identification and Risk Assessment

The Zonal HSE team leader in consultation with local HSE&QA representatives plan and initiate the HIRA and EAIA process. The assigned team must be competent and have enough knowledge of the entire process. Cross functional teams are recommended for such activity to cover all aspects during assessment. The record of OHS&E risk assessment is maintained in Hazard Identification & Risk Assessment Form F-01). The identification/assessment process shall take into account.

- on routine activities, any emergency situations.
- Activitie of ligersons having access to the SSGC permanent and temporary locations. Human benay in capabilities and other human factors.
- Designing of work processes.
- Material in use.
- Infrastructure, equip tent and materials at the workplace or project site, whether provided by
- Changes or proposed charges in the organization, its activities or materials. Fabrication, installation & compassioning.
- Handling & disposal of waster
 - Purchase of goods & services.
- Any applicable legal obligations that d to risk assessment and implementation of necessary controls,
- Before commencement of any new operation
- Periodic Review for updating the existing hazar ntification and risk assessment information.

At SSGC, we adapt five steps of risk assessment

- Step 2: Decide who might be harmed and how.
- Step 3: Evaluate the risks and decide on precautions.
- Step 4: Record your findings and implement them:
- Step 5: Review your risk assessment and update if necessary.

Risk Assessment Matrix

Risk assessment should be carried out as per assessment m

Risk Pri	onty		Proba		(.
Co	Catastrophic	Very Likely	Likely	Unlikely	
n s e	Significant				Medjum
q u e n	Harmful		Medium	Medium	Medium
C 8 5	Negligible	Madium	Medlum	Wedjum	

	HAZARD CONSEQUENCE RATING TABLE
Catastrophic	Hazard may cause death or total loss of one or more bodily functions. In
Significant	Hazard may cause severe injury, illness or permanent or partial loss of one or more bodily functions (e.g. prolong exposure to asbestos resulting in Asbestosis or prolong exposure to paint furnes resulting in Chronic Lung Disorder), or serious property damage, loss that may result in disruption of SSGC core activities:
Hammi	Hazard may cause a reportable incident i.e. an incident that results in the employee being unable to undertake their normal duties and may need medical treatment, or property damage, loss that result in partial disruption of SSGC core activities.
Negligible	azard may cause minor injury, illness or properly damage, first aid tre un intis required only, very low financial loss.

The state of the s	PROBABLE Y RATING TABLE
Very Likely	Exposure to hazard (cell) to occur frequently. Similar incidents reported more than once in S
Likely	Exposure to hazard likely to cur but not frequently. Similar incidents to reported once in last a years in SSSC
Unlikely	Exposure to hazard unlikely to occur
Highly Unlikely	Exposure to hazard so unlikely that it can be assumed that it will not happen.

		RISK PRIORITY TABLE
•	Risk Priority	Definitions of Priority
	g = grant	Situation is considered critical, stop work immediately or consider cessation of this operation/task. Must be fixed ASAP, Zonal HSE team leader should take immediate actions.
	Medium	Is very important, must be fixed within two weeks. Zonal HSE team leader considers short term and/or long term actions.
	Low	Is still important but can be dealt with through scheduled maintenance or similar type of action However, if solution is quick and easy then fix it immediately. Review and/or manage by routine procedures.
		procedures.

Section 2 azard Identification and Risk Assessment

iii. Risk/impact Assessment Outputs

The output of isk/impact assessment may include the following:

- Identified operations of all hazards/aspects and risks/impacts associated with company Ъ.
- Classification of risk/impact.
- Desention or reference to control the risks/impacts.
- d. don or reference to monitor the risks/impacts.
- mpetency and or training requirements.
- improvement objectives and programs for its achievement

The risk/impact measure controls such as termination/elimination, treatment of the risk/impact and substitution in it by suitable means and where required tolerated as long as it meets

Use output of risk/impact asses is as input for the following:

Use output or risk/impact assessments as input for the lollowing.

a. Setting objectives and targets
b. Training needs identification.
c. Terminating the risk/impact if it is precisal.
d. Facility engineering control.
e. Emergency Preparedness.
f. Administrative controls.
g. Insurance.

The ultimate requirement is to reduce the risk/impact to a explication becomes the reasonably practical (ALARP) where the trouble, difficulty and cost for further reduction becomes the reasonably inconsistent to the additional risk reduction obtained. preasonably inconsistent to the

iv. Risk Control

)reas Engineering

Administrative

- Elimination: The best way to control a hazard is to eliminate it. This can be achieved by making changes to the work process so that the task is no longer carried out, or by physically removing the hazard altogether. Elimination is the most effective way to control hazards and should be used.
- Substitution: Substitution is the second most effective method for controlling hazards and risks. It is similar to elimination but involves the substitution of one higher priority risk by another lower priority
- Engineering: Engineering controls are implemented by making changes to the design of an ent or process to minimize its hazard. Engineering controls are based on the concept of "Doing time". Departments shall incorporate this concept during planning phase of any seend must seek out for best possible solution in terms of OHS&E.
- Administrative Administrative controls involve making changes to the way in which people work k practices via education and training. Administrative controls may involve training employees in pe sting procedures, good housekeeping practices, emergency response in the event of incidents ire or employee injury, and personal hygiene practices.

Personal Protective Pment (PPE): Use of PPE will kick-off where no other controls stated above are possible. PF should properly identified for specific process/job

Environmental Aspects identification & Impact Assessment

An Environmental aspect is any element of SSGC business peration that negatively affect the Environment: While conducting environmental assessment, following as each are usually considered:

REDUCE CARBON

What we can do:

- Recycle: what you can
- Reduce: avoid.
 unnecessary consumption of resources
- Reuse: Buy items that are reusable and reuse them
- Unplug electrical devices that are not in use
- Avoid unnecessary driving
- · Use LED bulbs.
- Plant a tree

Emissions to air	
Solid non-hazardous West	Vater Discharges
Heat Dust	Odor ()
The state of the s	Vioration
in ect on visual / aesthetics	Use of Ozona aspleting substances
Use of radioactive / nuclear material	Spillage of chemicals

For identification of environmental aspects and impact each process/activity/equipment is assessed for its inputs and outputs. The inputs can be raw materials, utilities, energy etc. The output can be atmospheric emissions. liquid effluents, noise, hazardous/non-hazardous wastes, vibration etc.

The inputs, outputs, environmental aspects, their associated impact and controls are recorded on Environmental Aspect & Impact Assessment Form (SSGC-IMS/CRM-F-02).

WK

b. Control of Aspects having Significant Environmental Impact:

The significant environmental risks require control measures to eliminate or reduce the impact to a tolerable level either by establishing objective or through application of controls by considering the 4R methodology i.e.

Some of the suggested operational controls are listed below:

- a. Design of environmental friendly processes/operations.
- b. Isolation or enclosure of hazardous material storage, process or noisy equipment
- c. Mechanical exhaust systems/booths for controlling toxic materials.
- d. Replacement of potentially unsafe equipment or machinery with new equipment/pechines that meet environmental standards
- e. Electrical de la chanical safety Interlock, guards, Indicators.

 f. Safety devices, Releve valves, NRVs, Indicators etc.), measuring or monitoring det es ja des, computerized feedback monitoring and control systems.
- g. Environmental friendly dis sel or treatment systems etc.
- h. Fire prevention/suppression
- .Containment walls.
- J. Scrubbers.
- k Dust Collectors.
- L Other controls: Training, SOP

The record of operational controls on sign ronmental risks is maintained on Environmental Aspect & Impact Assessment Form (SSGC-IMS/CRM-F)2 After Identification of aspects and assessment cts, it is sent to HSE&OA Department for reviewing adequacy and conectness. Where required E&QA suggests necessary changes or improvement in risk assessment to concerned Zonal

c. Aspect & Impact Assessment Review & Monicipa

Zonal HSE Team Leader ensures that environmen activities/processes/equipment are kept current by conducting

- a. Once every six months to update the information, and identify SSGC-IMS/CRM-F-02 for recording new mazards and aspects
- b. Carry out assessment, for new or changes in activities/processes/ c. When there is a change in laws & regulations

d. IEE (Initial Environment Examination) / EIA (Environment Impa

In addition to all of above assessments, SSGC will carry out IEE / EIA as required by regularity requirements for new projects. It is the responsibility of corporate HSE&QA head/DMD/MD to ensure the compliance for all

When combusted:

One liter of Diesel produces 2.68 kg of CO2 One liter of Petrol produces 2.31 kg of CO2. One MMBTU of Natural Gas produces 53.07 kg of CO2

Integrated Management Sy

I. Permit to Work (PTW)

A Permit to Work (SSGC-IMS/CRM-F-03) is needed for any routine/non routine activity (Conducted within permanent locations of SSGC) where the work could expose persons to specific hazards. PTW should be acquired and maintained in the zones where job/activity is carried out. Normally following activities require

- a. Task based but Work operation such as welding, brazing, cutting, grinding.
- b. Confined proworking. (tank cleaning etc.)
- c. Mainteriance ark n High Voltage electrical equipment
- d. Any janitorial short e proving Safety Risks such as work at height.

 e. Any Maintenance arrivity by any department/contractor which compromises critical safety system.
- g. Work in areas where there a isk of exposure to hazardous chemicals or microorganisms.
- g. Work in areas where there areas of exposure to hazardous or the object of the harmonia of t

. II. Exclusion

Following activities are not under the scop W management, however the risk assessment, process SORs are implemented to control the ated risks for the following: a. Providing Gas connections to new customers

- b. Emergency Response to Consumer calls (119
- c. Planned enriancement of Distribution network
- d.-Work on live pipelines like hot tapping, installing Servi
- e. Any major/minor rehabilitation/reinforcement work

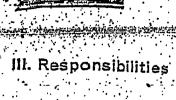

If it's UNSAFE!

- ✓ Report it
- ✓ Remove it
- √ Replace it

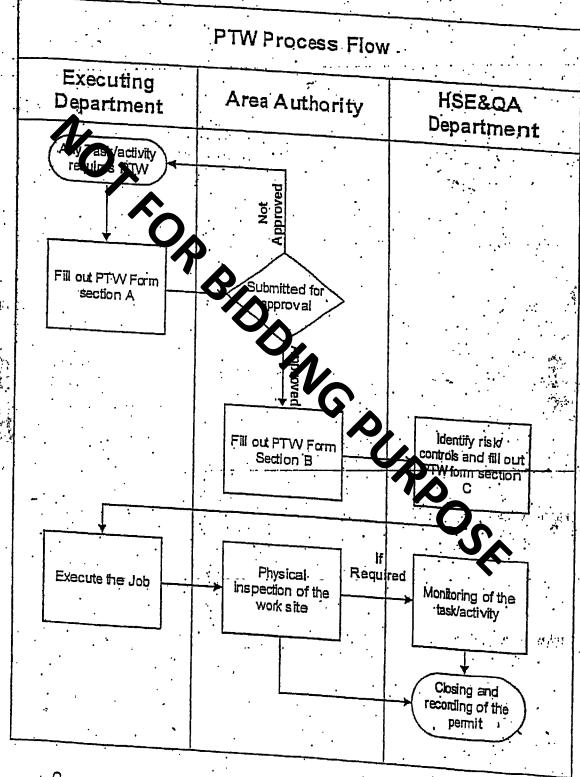

S No.	Function		
	Functions	Details	Responsibility
1	ecuting Aath rity	The department intends to carry out the task / activity that requires PTW. Situation may arise where Executing Authority is same as Area Authority (e.g. HQs).	Fill out the PTW form. Ensures that task/activity is carried out according to the SOP and controls are implemented to ensure safe operations. Immediately report any incident happened during execution of job to in-charge HSE&OA.
2	Area Authority	Area/Facility where the task/activity is darried out.	Authorize PTW and verify the compliance during the execution of task/activity. Authorized to stop work in case of noncompliance to PTVV requirements.
33	Contractor	The Individual/organization carrying out the Task/Activity on behalf of the executing department.	Liaise with executing department to ensure the chirols are implemented as procedurement-identified in P. M. Comment and Commen
4	HSE&QA	HSE&QA will identify the risk/hazards associated with the activity/task and propose controls. In Zones where HSE&QA representatives are not present, Zonal HSE team leader will officiate for HSE&QA responsibilities.	If required, Manipr the task/activity and execution and identify any proposed to proposed controls. Responsible to close the PTW, and maintains records. Authorized to stop work in case of noncompliance to PTW requirements.

16

List down the activities step wise and identify hazards and their controls Ensure that task/activity is carrie with proposed controls Ensure the team/equipment volved are competent and safe neont any untoward situation Authors JSA Ensure daquate resources are provided any out the task/activity is a fermanner. Select competent feam and team leader for the activities task. Submit a copy of J. A. prior to job execution to HSE&CA/Zonal HSI
3	Contractor	The Individual / organization carrying out the Task/Activity on behalf of the executing department.	Team Leader. Liaise with executing department to ensure the controls are implemented as per requirement identified in JSA

Section 5 Management of Change

I. Management of Change (MOC)

The purpose of this document is to provide all SSGC employees with instructions on Management of Change (MOC) process. Any changes that may affect quality, operations, safety, or the environment will be adequately assessed and must be approved by management or a designated representative of manage.

Risk Assessmen ny new project, major modification in existing design /facility/ Installation will be carried out using MOC Te

II. Scope

This procedure is intended to s those changes which may have a direct impact on SSGC's Integrated Management System, or the speed ant delivery of services.

To make sure that changes are assessed and documented in a consistent manner so that a. Unnecessary or counterproductive changes are prevented. a. Unnecessary or counterproductive charge

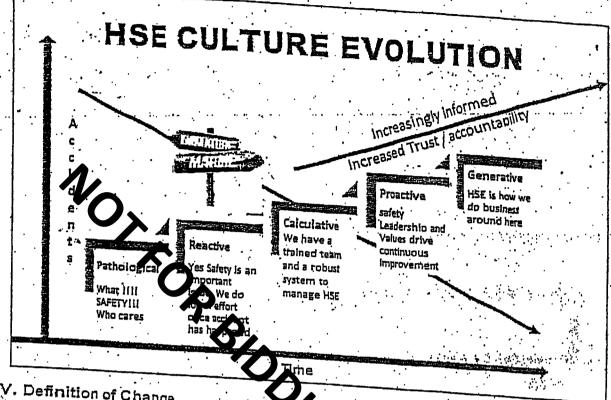

- b. Changes do not adversely affect safety gronment, quality, operations, or the level of service to the client ...
- c. No changes are made by individuals without ge and/or agreement of all relevant parties. d. A record of the assessment rationale and change
- sment process is produced.
- e. To make sure proper change out of employees during ations is addressed.

III. Responsibility

- a. MOC Owner: MOC owner is responsible to fill out the designate of ection of the MOC form (SSGC-IMS/CRM-F-05) which briefly describe the details/scope of deproject.
- b. Area Authority: Area authority is responsible to identify the possible place. Generally geographical head/zonal HSE team leader is considered in of the change that is taking a authority.
- c. HSE&QA Department: HSE&QA Department is responsible to authorize the g risk and their controls.

IV. Definition of Change

For the purpose of this procedure a "change" is an alter

- ಷ್ಟ Documented information maintained by this IMS.
- b Equipment, hardware, software, intrastructure.
- c. Personnel assignments and training.
- d. Vendor selection and management

2/0 Other types of changes not listed above can be related to any element of the resources, persons, activities, controls, measurements, outputs, etc. such as inputs

Note: Not all alterations to a system require the Management of Change Process (MCC) (e.g. changing

V. Levels of Change

a. Change which has limited or no effect on deliverables, operations, safety, work environment, etc.

b. Changes to equipment, procedures and employee assignments that have a moderate impact on

Level 3

c. Changes to equipment, procedures and employee assignments that have a major impact on deliverables,

VI. Change Procedure

Step 1 - Initiation of Change

Any employee or contractor that becomes aware of a need for change can initiate the MOC process. The originator will notify their immediate Supervisor/Manager, detailing the proposed change on the MOC form forwarded to In-charge HSE&QA for review.

Step 2 - Review by in-charge HSE&QA

In-charge HSE CA vill review the MOC request for potential operational impact, cost/benefit analysis, and associated risk, with input from the appropriate process owners (Moderate Impact) and/or SSGC top management (Major Impact), as appropriate to the change under consideration. Changes that have negligible impact may be processed by the Management Representative directly.

If the request is accepted, In-plant HSE&QA will detail any actions deemed necessary to control the impact of the change and forward the change to the appropriate process owner for implementation.

Step 3 - Implementation of Actions

The process owner will be responsible for implementing and coordinating the actions required for the proposed change. If it is determined that further assessment equired during the course of implementing the change, these assessments will be documented and subnetted or review prior to completing the change process. Only completion.

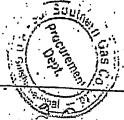

VII. Closing out the MOC

The In-charge HSE&QA will review the satisfactory implementation of the proposed change, and effectiveness

VIII. Record Keeping

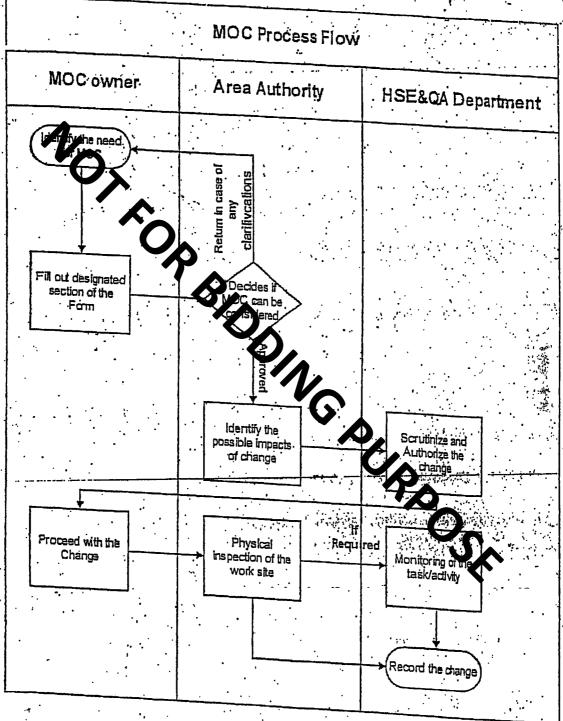

The In-charge HSE&QA will retain a log showing each MOC (Control Number of eg) and file the initial MOC process. These records shall be maintained for a minimum of 3 years.

N

MOC Process Flow

7. TYPICAL SSGC OPERATIONAL HAZARDS AND THEIR POSSIBLE CONTROLS Some of the common Hazards related to SSGC operations are tabulated below and may be used while these hazards should be identified accordingly along with possible controls.

7.1. PHYSICAL

Fazards	Control Measures
Adverse we the	Shelter, personal protective equipment (PPE; cold / wind / rain-
Poor / Bad houseke ping	Improved safety attitude, good management, safety inspection,
Contact with hot/cold	sulation, guarding, PPE (gloves, face shields, insulated cloves)
Drowning - Care Care Care Care Care Care Care Care	Life granded, lifes aving equipment, presence of first Alder.
Excavation work	Physical barries; fencing, shoring, safe system of work, signs, caution tab.
Fall from height	Edge protection, at the lines A hampesses and the lines are
	access, (e.g. scafford g), are system of work (e.g. permit to
Fall-of material from height	Alternative storage, physical means a securing
Lighting	Good work area design and lighting a up and measuring of illumination (LUX level), appropriate lighting
Awkward lifting while laying pipes in trenches	Define weight limits, use mechanical means to lifting and laying of pipes.
Noise	Reduction at source, insulation, PPE
Slips / Trips / Falls on same level	Good maintenance of work areas, good housekeeping, good cleaning, good foolwear.
Stacking	Good work area layout, height limits; weight limits, strong packing, mechanical assistance;
Vibration	Elimination or reduction at source, damping, insulation, PPE.
	F. at insulation, PPE.

integrated Management System =

7.2. MECHANICAL

	<u></u>
Hazards	Control Measures:
Hand tools	Periodic inspection, electrical testing and maintenance.
_Machines	I Cilouic Hispechon testing and The Asset Testing
Mechanical lifting opèrations	Periodic inspections, maintenance, supervision and training.
Manual handing	Regular assessment of her the state of the s
Moving vehicles	eliminate stress / fattique, training in good lifting techniques. Good road layout within premises, proper signs, vehicle maintenance, speed limit, enforce SSGC driving policy, defensive
Over Pressure	Prover dentification of pressure vessels, preventive maintenance, pressure inscators, alarms, PRV's where required, periodic

7.3. ELECTRICAL

Hazards	
Live working	Avoid (i.e. No Live World
Hand tools	Avoid (i.e. No Live Working), second etent (trained staff.———————————————————————————————————
Heaters (elements)	Isolate from combustible material, guarding.
Machines / Electrical cables	periodic Inspection for design to the second electrical safety design.
Electrical cables / cords	insulation, proper grounding, and attends, Use double
Power Lines (Overhead / Buried)	Use factory assembled cords, always use plugs, no naked wires. Look out for signs, contact local utilities (KE, WAPDA) for locations, stay at least 10 feet away from overhead lines, use
	proper PPE.

WF

7.4. FIRE

	· · · · · · · · · · · · · · · · · · ·
Hazards	Control Measures.
Combustible materials	Avoid, reduce storage of combustible materials, isolate from sources of heat and ignition.
Flammable gases	Storage of gas cylinders (e.g. hydrogen, acetylene) sutside in an isolated, well-ventilated area, signs, no smoking, color-coding.
Flammable of this	Controlled storage, use and disposal (e.g. limit quantities held). fire proof storage, signs, no smoking, no naked flames, emergency plans.
Heaters:	Segregation from sources of combustion, guarding special construction if used in hazardous areas.
Oxidizing agents	chemicals that are a source of oxygen, e.g. hydrogen peroxide, combustion(e.g. flammable solvents).
Oxygen (gas and liquid)	Segre tre from sources of combustion, controlled storage and usare.
Smoking materials	Design te shoking areas with proper ventilation, promote no
Static electricity	Limit use of settle of nerators in hazardous areas. Use of anti-
Gas Leaks	Odourization for time exciton where possible proper joining methods. Field survey, thing, leak detection techniques.

7.5. OTHER

. :		Company of the Compan
	Hazards	Control Mea De A
	Chemical: Chemical substances, Corrosives (acids, alkalis), Carcinogens, Irritants (e.g. Ammonia)	test engineering controls, monitor for 1 22 cons substances; inform and train employees, use personal protestive equipment (PPE), emergency plans for uncontrolled.
	Biological: Biological agents (micro-organisms: pathogens, mutagens, carcinogens), Rodents, Snake Bite	Avoid use, substitute less harmful substances, use maintain and test engineering controls, monitor for hazardous substances, inform and train employees, use personal protective equipment (PPE), emergency plans for uncontrolled teleases. Periodic rodent control drive, identification and elimination of snakes and other harmful reptiles specially in remote locations of \$SGO.
	Food / Water safety	employee information and training, good personal hygiene, protective clothing. Testing if required from accredited lab (AKUH, PCSIR); Involve canteen contractors, c redibility of product/Services.
	Ergonomics	Educate / Train employees, avoid repetitive tasks, procure ergonomically design products (e.g. chair, Computer desk.

Context of the Organization

Revision 00

Issue Date: July, 2021

- Training and development opportunities.
 - Sustained reputation and image of company.
 - Consultation
 - Communication and participation.
 - No accident / injury / ill-health.
 - Reward and recognitions.
 - portunities for dialogue / improvement / changes.
 - and fair provision of remuneration coupled with a progression.

Client/Customer

Timely provide it a quality services, quick response on any complaint, follow a local laws and QH&S requirements.

- Uninterrupted gas surbly
- Customer facilitation.
- Quick response of queries & complaints
- Value for money.
 - No health and safety issue in product
 - Prompt actions on quality, health and safety issues.
 - Minimize the risk of injuries when receiving a services,
 - Socially and environmentally responsible

Suppliers/Contractor

- Continuous orders, prompt payments as per agreed terms, good long terms working relationship.
- Fair chance of participating in bid opening.
- Communication of hazards present at workplace.
- Timely payment.

MR

1. PURPOSE

The purpose of this document is to define a mechanism of incident and near miss reporting investigation & propose corrective/preventive actions against near miss, incidents and accidents,

Anythino go wrong, will go wrong"

2. SCOPE

This procedure is applicable to all incidents (i.e. accidents & near miss) which take place within SSGC premises or outside SSGC premises i.e. its installations or work -related sites which are under the scope of

3. DEFINITION

a. Incident: Work-related event(s) in which an injury or ill health or property damage (reg is of severity) or fatality occurred, or could have occurred.

Incident

Accident An incident in what an injury or illness or property damage actually occurs

Near Miss:

did not result in an injury or plus

the potential to do so

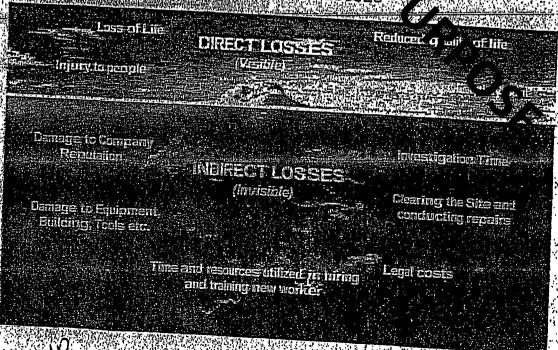

CPR: Cardiopulmonary resuscitation

Emergency: An emergency is a situation that possess

minediate risk to health, life, property, or environment. Near Miss: A Near Miss is an un

Accident

Near Miss

PURPOSE

The purpose of this procedure is to define a frame work for identification of emergency situations which company operations and for developing emergency prepare oness and response plants to mitigate and mis nsks ansing from such situations of events. The Procedure defines

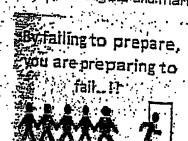

requirements for business continuity planning post emergency situations tobring the business on-line.

Purpose of the procedure is to

Formulate plan, responsibilities and actions to be taken to handle any emergency situation.

Identify potential emergency situations and response plans to minimize potential hazards of any emergency situation... or avoid a

a and frequency to test plan so as to ensure ffectiveness of emergency response system.

SCOPE

This procedure is applicable to regations of SSGC, its employees and any visitor physically present at the location of emergency site. Due riations in nature of operations, various departments/sections have developed their own ER Plans cate or their strategic, operational and physical requirements. The same developed meir uwn En Fiele General for comparing day to day operations in terms natural calamities, fire, major includes HSE emergencies arising from comparing day operations in terms natural calamities, fire, major ronmental damage, external terror or bomb threats, public unrest,

DEFINITIONS

- Emergency Situation: An abnormal situation that sall or immediate and urgent actions for safeguarding life of persons, protecting buildings, machines, vital his valions and other assets.

 Rescue: It refers to responsive operations that usually lively the saving of life or prevention of injury
- duning an incident of dangerous situation.
- Emergency Response Organization (ERO): It is a group people, in each section (such as HO) Headquarters etc.), who prepare for and respond to any emergence incident, such as a natural disaster or an interruption of business operations.
- Emergency Response Centre (ERC): It is a room suitably equipped to Handle any potential emergency situations. All emergencies are to be reported here.
- First Ald: It is the provision of initial care for an illness or injury. It is usually proported by non-expert, but trained personnel to a sick or injured person until definitive medical treatment are excessed.
- Assembly Areas: If an evacuation to the outside is appropriate, the nominates personnel shall be far enough away from the building, structure or workplace to amembly areas for practicable; everyone is protected from falling glass and other objects. sure that, where
- Emergency Evacuation it is the immediate and rapid movement of people away from the threat or from the place of the hazard.

RESPONSIBILITIES

Responsibilities for the particular department/personnel are identified in the response plans prepared by various departments and sections. General responsibilities for Emergency response organization are as under:

- Rush to the area of incident without any delay.
- Immediately assess the situation and initiate the remedial actions.
- Call the fire brigade & other emergency services like ambulances if required.
- Ask/inform all personnel present within premises, using megaphone or any other means, for complete evacuation if situation goes out of control.
- Inform all to go back to their work places using megaphone or any other suitable means when the situation comes under control and the area is free from any hazard.

PROCEDURE.

·The HSE&QA In-charge and department heads shall ensure that all emergency situations are identified during risk assessments performed and emergency response plans are implemented within the departments. They shall also ensure that all employees are made aware of their emergency situations and thow to respond during a real emergency. They shall ensure that enrighdees including emergency team members in their respective the partners are including and like a significant to respond to emergencies and mitigate risks assing out of real emergencies. Some of the potential emergency situations that might occur in SSGC along with the response plans are lisited. below: Sequence of actions for any response specified on each section's ER plan may change depending

Emergency Considerations

The following dear of needs to be given consideration while identifying potential emergency situation but the

- Heavy Spillage of oxic/flammable chemicals or leakage of gas
- Heavy rain/ flood
- Earth quake
- Bomb threat
- Building & office lockdow
 - Active shooterhostage situation

6.1, Fire & Explosion

In case of fire & explosion each personnel proser act as per but not limited to the following instructions: in the premises must

- Give voice alarm FIRE! In case of fire for all imme pyees in the area.
- Push the nearest located call point button in case
- immediately inform Emergency Response Organizat or in person. with phone
- Try to control the fire by using fire extinguishers. Use fire extinguishers. only if you have been trained.
- Remove all explosive, inflammable and poisonous materials av the maximum possibility.
- Shut off main valves of gas and circuit breakers.
- Stay away from the fire in case it is not controllable.
