PROCEDURES

iii.

f.

g.

d.

e.

By using SWOT analysis or any other tool, identify external and internal issues that are relevant to company operations and its strategic direction and that may affect the ability to achieve the intended result(s) of integrated management system. Internal and external issues can be positive or negative that can affect the OH&S management system.

1.4

6.1.1. Internal issues could include in risk & opportunity assessments, but are not limited to:

ું જેવા

- a. Operations spread in two provinces.
- b. Complex transmission and distribution network.
- C. Succession planning.
- d. Contractual relationships.
- e. Availability of reliable, qualified and competent workforce.
- f. etention. g. Imp ionization.

6.1.2. External usues could include in risk & opportunity assessments, but are not limited to:

Political: Government policies, political stability, international trade agreements etc. a. Economic: Fuel/usik, thes, cash flow, credit availability, exchange rates, tariffs and b. inflation, general taxation asues etc.

10 M

- Social: Consumer buying pren, education level, advertising and publicity, ethical & c. religious issues, demographica to d.
- Technological: Intellectual property issues, software changes, internet, technology legislation, associated/dependent.company, renewable energy etc. e.
 - Legal and regulatory: Consumer protection, industry-specific regulation and permits, trade union regulations, employment law, incernational legislation, human rights/ethical issues etc.

Environment: Customer demographics and nronmental issues.

- Government: The directives from Prime Minister Ministry of Petroleum (energy division), regulatory bodies like OGRA, SEPA & BEPA etc.
 - Ensuring the policy and objectives are established for the integrated management system and are compatible with the context and strategic direction of neorganization. The management shall monitor and review information about external and internal issues during the management review meetings.

Integrate Management System -

Section 2 Hazard Identification and Risk Assessment

I. Hazard Identification and Risk Assessment

The Zonal HSE team leader in consultation with local HSE&QA representatives plan and initiate the HIRA and EAIA process. The assigned team must be competent and have enough knowledge of the entire process. Cross functional teams are recommended for such activity to cover all aspects during assessment. The record of OHS&E risk assessment is maintained in Hazard Identification & Risk Assessment Form (SSGC-IMS/CRM-F-01). The identification/assessment process shall take into account:

- Routine & non routine activities, any emergency situations. а.
- b. s of all persons having access to the SSGC permanent and temporary locations. Activ
- .C. Huma havior, capabilities and other human factors.
- d. Designing of work processes. N 4.
- e. Material Inusa

••

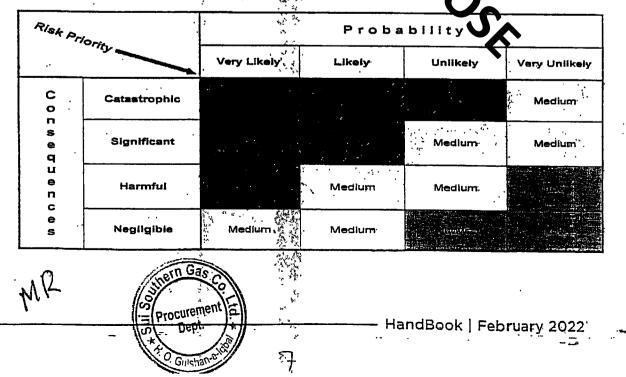

- Infrastructure, equipment and materials at the workplace or project site, whether provided by organization or others. f:
- Changes or proposed changes in the organization, its activities or materials. g.
- h. Fabrication, installation a renomissioning.
- i. Handling & disposal of water material.
- j. Purchase of goods & services,
- Any applicable legal obligation k. at s related to risk assessment and implementation of necessary controls.
- ١. Before commencement of any new po n/activity.
- Periodic Review for updating the existing the m. ard identification and risk assessment information.

At SSGC, we adapt five steps of risk-as essment:

- Step 1: Identify the hazards.
- Step 2: Decide who might be harmed and how.
- Step 3: Evaluate the risks and decide on precautions.
- Step 4: Record your findings and implement them.
- Step 5: Review your risk assessment and update if necessa

II. **Risk Assessment Matrix**

Risk assessment should be carried out as per assessment matrix below:

3:5 S

34 ct **

÷,

¢

î.

755 F

57

| | HAZARD CONSEQUENCE RATING TABLE | | |
|--------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|
| Catastrophic | Hazard may cause death or total loss of one or more bodily functions. In case of failure a huge financial loss will occur. | | |
| Significant | Hazard may cause severe injury, illness or permanent or partial loss of one or more bodily functions (e.g. prolong exposure to asbestos resulting in Asbestosis or prolong exposure to paint fumes resulting in Chronic Lung Disorder), or serious property damage, loss that may result in disruption of SSGC core activities. | | |
| Harbei | Hazard may cause a reportable incident i.e. an incident that results in the employee being unable to undertake their normal duties and may need medical treatment, or property damage, loss that result in partial disruption of SSGC core activities. | | |
| Negligible | Hezard may cause minor injury, illness or property damage, first aid reatment is required only, very low financial loss. | | |

| | P A |
|-----------------|-------------------------------------------------------------------------------------------------------------------------|
| · | PROPAGINTY RATING TABLE |
| Very Likely | Exposure to hazarchitcly to occur frequently. Similar incidents reported more than once in \$550° during last 10 years. |
| Likely | Exposure to hazard likely to occur but not frequently. Similar incidents reported once in last 5 years on SSGC. |
| Unlikely | Exposure to hazard unlikely to occur |
| Highly Unlikely | Exposure to hazard so unlikely that it can be assumed that it will not happen. |

| Risk Priority | Definitions of Priority - |
|---------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | Situation is considered critical, stop work immediately or consider cessation of this operation/task. Must be fixed ASAP, Zonal HSE team leader should take immediate actions. |
| Medium | Is very important, must be fixed within two weeks, Zonal HSE team leader considers short term and/or long term actions. |
| Low | Is still important but can be dealt with through scheduled maintenance or similar type of action However, if solution is quick and easy then fix it immediately. Review and/or manage by routine procedures. |

Section 2 Hazard Identification and Risk Assessment

iii. Risk/Impact Assessment Outputs

The output of risk/impact assessment may include the following:

- Identified operations of all hazards/aspects and risks/impacts associated with company a. activities/system etc.
- Classification of risk/impact. b.
- Description or reference to control the risks/impacts. C.
- Description or reference to monitor the risks/impacts. d.
- Identified competency and or training requirements. ·e.
- setting improvement objectives and programs for its achievement. f. Insut

The risk/impact the states identified shall include controls such as termination/elimination, treatment of the risk/impact and substitution of risk by suitable means and where required tolerated as long as it meets The risk/impact local laws/legislation.

Soments as input for the following: Use output of risk/impact a

- Setting objectives and ets. a.
- Training needs identific b.
- Terminating the risk/impact if it is practical. C.
- Facility engineering control. d.
- Emergency Preparedness. e.
- Administrative controls. f.
- Insurance. g.

The ultimate requirement is to reduce the risk/impact of a level as low as reasonably practical (ALARP) i.e. where the trouble, difficulty and cost for further reduction becomes unreasonably inconsistent to the . The ultimate requirement is to reduce the risk/imp G D L P D additional risk reduction obtained.

Elimination

Engineering CHE STOL

Administrative

Procurer Debr

GHIST

iv. Risk Control

HandBook | February 2022

The hazards and risks are controlled through 'operational controls' by considering the following hierarchy.

20, 30

ROCEDURE

a. **Elimination:** The best way to control a hazard is to eliminate it. This can be achieved by making changes to the work process so that the task is no longer carried out, or by physically removing the hazard altogether. Elimination is the most effective way to control hazards and should be used whenever possible.

at the

1

- b. **Substitution:** Substitution is the second most effective method for controlling hazards and risks. It is similar to elimination but involves the substitution of one higher priority risk by another lower priority risk.
- c. Engineering: Engineering controls are implemented by making changes to the design of an equipment or process to minimize its hazard. Engineering controls are based on the concept of "Doing it right the first time". Departments shall incorporate this concept during planning phase of any project no ess and must seek out for best possible solution in terms of OHS&E.
- d. Administrative: Administrative controls involve making changes to the way in which people work and promoting safe work practices via education and training. Administrative controls may involve\ training employees in operating procedures, good housekeeping practices, emergency response in the event of incidents such as fire or employee injury, and personal hygiene practices.
- e. **Personal Protective Equipment (PPE):** Use of PPE will kick-off where no other controls stated above are possible. Preshould be properly identified for specific process/job.

| System & work area Hazard | Likely Consequences |
|---------------------------------------|------------------------------------------------------------|
| Access / Egress Obstructions | Mir or injury, trips and falls |
| Asphyxiate Gas (CO2 fire suppression) | Por site death by asphyxiation |
| Buried Cables | Exposite buried cables - major / minor injury |
| Electricity (HV/LV) | Fatality be ectric shock or serious burn injuries |
| ··· Falling Loads / Objects | Serious head and or body injury |
| Flammable Vapors / Gases / liquids | Explosion or fire |
| Flammable Materials | Potential for fire |
| Hot / Humid Work Environment | Heat stress, disorientation at a stor consciousness |
| Moving Parts | Entrapment, major or minor ment |
| Noise | Long term hearing loss, tinnit sa |
| Openings in Floor / Walkways | Falls from height, major injury possible detaility |
| Flammable Materials / Gases | Creation of hazardous area; fire excosion |
| Heat, sparks and naked flames | Burns to exposed skin |
| High intensity light (welding) | Arc flash, short term discomfort, long term loss of vision |
| Housekeeping poor | Slip, trip, fall, fire hazards, blocking fire escapes |
| Lifting Operations | Falling or moving loads - serious head and for body injury |
| Live Electrical Work | Fatality by electric shock or serious burn injuries |
| Lone Working | No emergency response if injured. |
| Long Working Hours | Major / minor accident due to fatigue |
| Manual Handling | Muscular / skeletal injuries |
| New Task / Operation | Major / minor injury resulting from mistakes |

Integrated Management System

۲n, Procuremen Dept. 10

| Oxygen deficiency | Death of asphyxiation |
|--------------------------------|------------------------------------------------------------|
| : Poor Lighting / Visibility | Minor / major injury, fall or impact injury |
| Slipping / Tripping Hazards | Minor injury, trips and falls |
| Spillages (Oil and chemicals) | Land contamination |
| Substances hazardous to health | Chemical burns, tcxic, poisoning, irritants, pollutant |
| Repetitive Task / Operation | Muscular / skeletal injuries |
| Rotating / Moving Part | Major injury, potential for fatality |
| Sharp Edges / Cutting Surface | Amputation and cuts, predominantly to hands |
| Smoke / Fume | Cinconsciousness, respiratory problems |
| Trailing Cables and Hoses | Tripping hazard causing major / minor accident |
| Use of Hand To | Minor laceration and impact injuries |
| | Burns to skin, eyes, and respiratory system. Environment |
| Use of Hazardous sub tances | |
| Use of Power Tools | Impact injury, hand / arm vibration loss of sensation over |
| Use of Workshop Equipment | Major / minor injuries - entrapment, cutting tools |
| Vibration | Hand / arm vibration - loss of sensation over time |
| ' Work at Height | Major / minor injury |
| | Я |

v. Environmental Aspect Identification & Impact Assessment

a. Environmental Aspects:

Unplug electrical

devices that are not in use

 Avoid unnecessary driving

Use LED bulbs.

Plant a tree

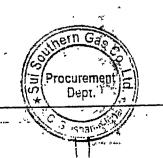

NY

An Environmental aspect is any element of SSGC bus ness operation that negatively affect the Environment. While conducting environmental assessment, following aspects are usually considered:

| | | , |
|-----------------------------------------------------------------------------------------|---------------------------------------------------------------------------------|------------------------------------------|
| "REDUCE CARBON | Emissions to air | Water Discharges |
| FOOTPRINT" | Solid non-hazardous waşte | Solid Hazardous Waste |
| What we can do: | Consumption of natural resources/ Ener | Noise . |
| • Recycle: what you | Heat | |
| can | Dust | vît reft |
| Reduce: avoid unnecessary | Effect on visual / aesthetics | Use of evene depleting substances |
| consumption of | Use of radioactive / nuclear material | Spillage or chemicals |
| Reuse: Buy items that are reusable and reuse them | For identification of environments process/activity/equipment is assessed fo | r its inputs and outputs. The inputs can |

be raw materials, utilities, energy etc. The output can be atmospheric emissions, liquid effluents, noise, hazardous/non-hazardous wastes, vibration etc.

The inputs, outputs, environmental aspects, their associated impact and controls are recorded on Environmental Aspect & Impact Assessment Form (SSGC-IMS/CRM-F-02)

HandBook | February 2022

b. Control of Aspects having Significant Environmental Impact:

The significant environmental risks require control measures to eliminate or reduce the impact to a tolerable level either by establishing objective or through application of controls by considering the 4R methodology i.e. Reduce, Reuse, Recover and Recycle.

Some of the suggested operational controls are listed below:

- a. Design of environmental friendly processes/operations.
- b. Isolation or enclosure of hazardous material storage, process or noisy equipment.
- c. Mechanical exhaust systems/booths for controlling toxic materials.
- d. Replacement of potentially unsafe equipment or machinery with new equipment/machines that meet environmental standards.
- e. Electrical of nechanical safety interlock, guards, indicators.
- f. Safety devices (Relieve valves, NRVs, indicators etc.), measuring or monitoring devices gauges, computerized feedback monitoring and control systems.
- g. Environmental frie dly disposal or treatment systems etc.
- h. Fire prevention/suppression systems.
- i. Containment walls.
- j. Scrubbers.
- k. Dust Collectors.
- J. Other controls: Training, SOP.

- C.1. A set of the Har.
 A set of the
- The record of operational controls on equilibrium environmental risks is maintained on 'Environmental Aspect & Impact Assessment Form (SSGC-IMS/CF/4-102).
 - After identification of aspects and assessment of impacts, it is sent to HSE&QA Department for reviewing adequacy and correctness. Where required, u-charge HSE&QA suggests necessary changes or improvement in risk assessment to concerned a set USE Team Leader.

c. Aspect & Impact Assessment Review & Compring:

- Zonal HSE Team Leader ensures that environmental aspects and impacts related to the activities/processes/equipment are kept current by conducting the same assessment:
- a. Once every six months to update the information, and identify new environmental aspects. (Use
- SSGC-IMS/CRM-F-02 for recording new hazards and aspects)
- b. Carry out assessment, for new or changes in activities/processes/entrement
- c. When there is a change in laws & regulations.

d. IEE (Initial Environment Examination) / EIA (Environment InvertAssessment):

In addition to all of above assessments, SSGC will carry out IEE / EIA as required, regulatory requirements for new projects. It is the responsibility of corporate HSE&QA head/DMD/MD to ensure the compliance for all new projects.

- When combusted;
- One liter of Diesel produces 2.68 kg of CO2
- One liter of Petrol produces 2.31 kg of CO2
- One MMBTU of Natural Gas produces 53.07 kg of CO2

Integrated Management System

Section 3 Permit to Work

I. Permit to Work (PTW)

A Permit to Work (SSGC-IMS/CRM-F-03) is needed for any routine/non routine activity (Conducted within permanent locations of SSGC) where the work could expose persons to specific hazards. PTW should be acquired and maintained in the zones where job/activity is carried out. Normally following activities require PTW:

- a. Task based Hot Work operation such as welding, brazing, cutting, grinding,
- b. Confined space working. (tank cleaning etc.)

- c. Maintenance Work on High Voltage electrical equipment.
 d. Any janitorial service involving Safety Risks such as work at height.
 e. Any Maintenance activity by any department/contractor which compromises critical safety system.
- f. Work involving interaction with asbestos.
- g. Work in areas where there is a risk of exposure to hazardous chemicals or microorganisms.

If it's UNSAFE!

✓ Remove it

✓ Replace it

✓ Report it

h. Any job/task/activity that remires additional precautions.

i. Any specific activity performed during development, modification and up gradation of SSGC's Vital Installations including SMS/ alve Assembly/TBS/PRS etc.

II. Exclusion

Following activities are not under the scope of PTW management, however the risk assessment, JSA and or

60

- process SOPs are implemented to contraassociated risks for the following:
- a. Providing Gas connections to new cust
- b. Emergency Response to Consumer calls
- c. Planned enhancement of Distribution netwo
- d. Work on live pipelines like hot tapping, installing Tee etc.
- e. Any major/minor rehabilitation/reinforcement work

· · ·

Integrated Management System

IV. PTW Process Flow

V. Permit Display

Copy of the permit to work should be clearly displayed at the work site or in a location close to where the work activity is being undertaken. Executing department/contractors are also required to ensure that a copy of the permit to work is kept and made available upon request by Area Authority/ HSE&QA.

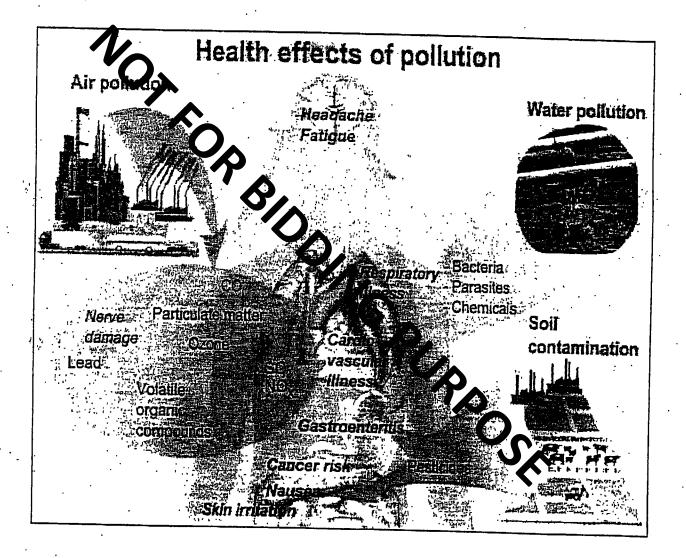

A. 8.

50

e 14

VI. PTW Closure

Once the task/activity is completed the PTW form is returned back to HSE&QA/Zonal HSE team leader for closing and updating the records. A new PTW is required if the task/activity is not completed within stipulated time frame mentioned on PTW.

Nr

IMS PROCE

Section 4 Job Safety Analysis

I. Job Safety Analysis (JSA)

Job safety analysis is needed for any routine/non-routine activity (Conducted outside permanent locations of SSGC i.e. Field Locations) where the work could expose persons to specific hazards. Normally following activities require JSA (SSGC-IMS/CRM-F-04):

- a. Work on live pipelines like hot tapping.
- b. Any major/minor rehabilitation/reinforcement/maintenance work on existing distribution/transmission
- c. Installing service connection for new schemes. (Blanket JSA may be carried out for each scheme).
- d. Any Emergel cymaintenance work. e. Any particul
- ctivity requiring JSA as necessitated by HSE&QA.
- II. Responsibilitie

Section 5 Management of Change

99-96 kg

I. Management of Change (MOC)

The purpose of this document is to provide all SSGC employees with instructions on Management of Change (MOC) process. Any changes that may affect quality, operations, safety, or the environment will be adequately assessed and must be approved by management or a designated representative of management prior to implementation.

Risk Assessment for any new project, major modification in existing design /facility/ installation will be carried out using MC nethodology.

II. Scope

This procedure is intended address those changes which may have a direct impact on SSGC's Integrated Management System, of the one-sequent delivery of services.

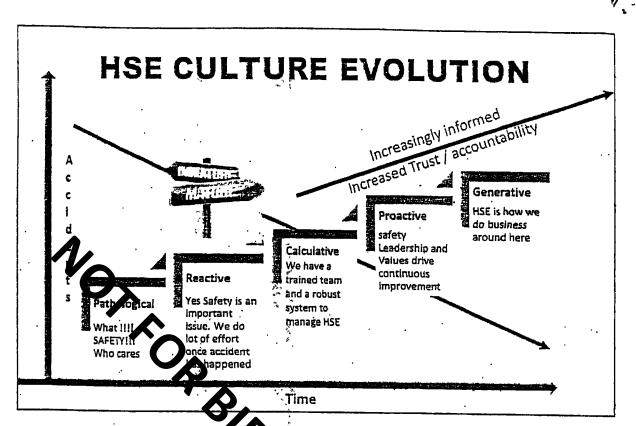

- To make sure that changes are a sensed and documented in a. Unnecessary or counterproductive changes are prevented. sed and documented in a consistent manner so that:
- b. Changes do not adversely affect sale the environment, quality, operations, or the level of service to the . client.
- c. No changes are made by individuals with nowledge and/or agreement of all relevant parties. Jut) d. A record of the assessment rationale and sharge
- assessment process is produced. e. To make sure proper change out of employe
- g operations is addressed.

III. Responsibility

- a. MOC Owner: MOC owner is responsible to fill out the designated section of the MOC form (SSGC-IMS/CRM-F-05) which briefly describe the details scop of the project.
- b. Area Authority: Area authority is responsible to identify the possible impacts of the change that is taking place. Generally geographical head/zonal HSE team leader is co red the area authority.
- c. HSE&QA Department: HSE&QA Department is responsible to authoria hange after assessing the risk and their controls:

Integrated Management System

IMS PROCE

IV. Definition of Change

For the purpose of this procedure a "change" hand interation to Processes;

- a. Documented information maintained by this IMS.
- b. Equipment, hardware, software, infrastructure,
- c. Personnel assignments and training.
- d. Vendor selection and management.

Other types of changes not listed above can be related to any element, the process, such as inputs, resources, persons, activities, controls, measurements, outputs, etc.

Note: Not all alterations to a system require the Management of Change Proces (MOC) (e.g. changing employees, editorial changes to HSE & QA procedures and forms, etc.)

V. Levels of Change

Level 1

a. Change which has limited or no effect on deliverables, operations, safety, work environment, etc.

Level 2

b. Changes to equipment, procedures and employee assignments that have a moderate impact on deliverables, operations, safety, or work environment.

Dept.

Snap 8

Level 3

MK

c. Changes to equipment, procedures and employee assignments that have a major impact on deliverables, operations, safety or work environment.

HandBook | February 2022

PROCEDURES

VI. Change Procedure

Step 1 – Initiation of Change

Any employee or contractor that becomes aware of a need for change can initiate the MOC process. The originator will notify their immediate Supervisor/Manager, detailing the proposed change on the MOC form (SSGC-IMS/CRM-F-05). With concurrence by their Supervisor / Manager, the MOC form shall then be forwarded to In-charge HSE&QA for review.

يوجفنه

1. 1

Step 2 - Review by in-charge HSE&QA

÷?,

In-charge MSE&QA will review the MOC request for potential operational impact, cost/benefit analysis, and associated mak, with input from the appropriate process owners (Moderate Impact) and/or SSGC top management (Major Impact), as appropriate to the change under consideration. Changes that have negligible impact may be pocked by the Management Representative directly.

If the request is accepted, in-charge HSE&QA will detail any actions deemed necessary to control the impact of the change and forward as request to the appropriate process owner for implementation.

Step 3 - Implementation of Actions

The process owner will be responsible or implementing and coordinating the actions required for the proposed change. If it is determined that further assistment is required during the course of implementing the change, these assessments will be documented and ubmitted for review prior to completing the change process. Only after all assessments have been reviewed and the MOC process be continued and monitored through completion.

VII. Closing out the MOC

The In-charge HSE&QA will review the satisfactory implementation of the proposed change, and effectiveness of any corresponding control measures.

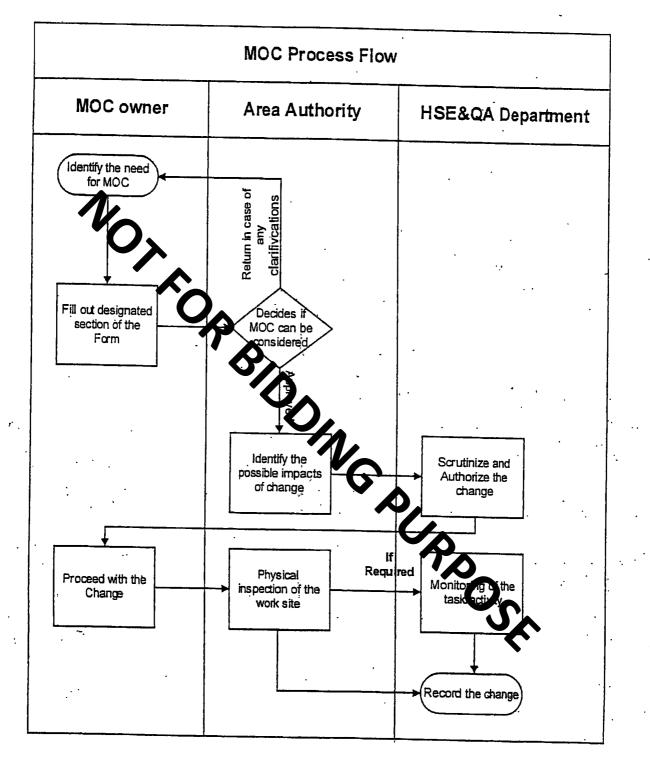

VIII. Record Keeping

The In-charge HSE&QA will retain a log showing each MOC (Control Number of Log) and file the initial MOC request (SSGC-IMS/CRM-F-05) with all information supporting the activity taken throughout the MOC process. These records shall be maintained for a minimum of 3 years.

7. TYPICAL SSGC OPERATIONAL HAZARDS AND THEIR POSSIBLE CONTROLS Some of the common Hazards related to SSGC operations are tabulated below and may be used while doing Risk assessment. There might be other hazards related to a particular activity/ operation or process. These hazards should be identified accordingly along with possible controls.

7.1. PHYSICAL

| | Mar Mit Strive Jack Strive Law |
|------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------|
| azards | Control Measures |
| Adverse weather | Shelter, persoñal protective equipment (PPE; cold / wind / rain- proof). |
| Poor / Bad housekeeping | Improved safety attitude, good management, safety inspection, good work layout |
| Contact with hot / colors | Insulation, guarding, PPE (gloves, face shields, insulated clothing). |
| Drowning | us guarding, lifesaving equipment, presence of first Aider. |
| Excavation work | Physical Larriers; fencing, shoring, safe system of work, signs, caution tarte. |
| Fail from height | Edge protection, safety lines / harnesses, safe means of access, (e.g. cca folding), safe system of work (e.g. permit to work). |
| Fall of material from height | Alternative storage, physics means of securing. |
| Lighting | Good work area design and light a equipment, measuring of illumination (LUX level), appropriate a bring. |
| Awkward lifting while laying pipes in trenches | Define weight limits, use mechanical means for lifting and laying of pipes. |
| Noise | Reduction at source, insulation, PPE |
| Slips / Trips / Falls on same level | Good maintenance of work areas, good housekeeping, good cleaning, good footwear. |
| Stacking | Good work area layout, height limits, weight limits, strong packing, mechanical assistance. |
| Vibration | Elimination or reduction at source, damping, insulation, PPE. |

22

Integrated Management System

£

7.2. MECHANICAL

| Hazards | Control Measures |
|----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| Hand tools | Periodic inspection, electrical testing and maintenance |
| Machines | Periodic inspection, testing, and maintenance, physical barriers (guarding), safety interlocks, supervision and training: |
| Mechanical lifting operations | Periodic inspections, maintenance, supervision and training. |
| Manual languing | Regular assessment of handling techniques (Improvisation to eliminate stress / fatigue; training in good lifting techniques; |
| Moving vehicles | Good road layout within premises, proper signs, vehicle maintenance, speed limit, enforce SSGC driving policy, defensive driving classes. |
| Over Pressure | Poper identification of pressure vessels, preventive maintenance, pressure indicators, alarms, PRV's where required, periodic inspretion |

÷

·.....

7.3. ELECTRICAL

| Hazards | Control Measures |
|-----------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Live working | Avoid (i.e. No Live Working) use competent / trained staff. |
| Hand tools | Regular inspection, testing of mectrical integrity and replacement; (where appropriate). |
| Heaters (elements) | Isolate from combustible material, guarding |
| Machines / Electrical cables | Electrical testing and maintenance, good electrical safety design, periodic inspection for design load vs actual load use of circuit breakers, lockout //tag out, anti-static materials, use double |
| Electrical cables / cords | Use factory assembled cords, always use plugs, no paked wires |
| Power Lines (Overhead/ Buried) | Look out for signs, contact local utilities (KE_WAPDA) for locations, stay at least 10 feet away from overhead lines, use proper PPE. |

IMS PROCEDURES

1. PURPOSE

The purpose of this document is to define a mechanism of incident and near miss reporting investigation & propose corrective/preventive actions against near miss, incidents and accidents.

2. SCOPE

This procedure is applicable to all incidents (i.e. accidents & near miss) which take place within SSGC premises or outside SSGC premises i.e. its installations or work -related sites which are under the scope of management system.

3. DEFINITION

- a. Incident: Work elated event(s) in which an injury or ill health or property damage (regardless of severity) or fatality occurred, or could have occurred.
- b. Accident: An incident in which an injury or illness or property damage actually occurs.
- c. Near Miss: A Near Miss is an unplanned event that did not result in an injury or proderty damage, but had the potential to do so.
- d. CPR: Cardiopulmonary resuscitation

Emergency: An emergency is a situation that poses an immediate risk to health, life, property, or empronment.

. 163 - ¹14

4.2. Incident Reporting:

- a. Incident that resulted in personnel injury, spill, fire, asset damage its will be considered as accidents and will be reported through online Incident Management System within 24 hours after the accident.
- b. Incident that have not done any damage or lose will be considered as Near Miss and will also be reported via web portal.
- c. All HSE Zonal Team Leaders are responsible to immediately report any incident took place in their respective Zone.
- d. All Employees are responsible to immediately report any Near Miss occurred / observed via web portal.

Procu-eme

Integrated Management System

4.3. Investigation and Corrective Action

Incidents are investigated by the team constituted by In-charge HSE&QA. If required, a cross functional team may be formed. Depending upon the situation, Incharge HSE&QA will decide whether to investigate or not any major/minor incident/accident, considering following factors:

- a. Severity of the incident/accident.
- b. Time lapse between reporting of the incident and the actual occurrence of the incident.
- c. Lack of supporting information.
- > The investigation is carried out to determine the root cause of the problem. The investigation process covers: a. Determination of root cause using any suitable method like tripod analysis etc.
- conducted as soon as possible after the incident, following the b. Investigation activities required controlling the hazard.
- c. When indicated by the reverity of the incident, steps to secure the incident site must be initiated immediately we that investigating party can reconstruct the events leading to the incident.
- d. Individual interviews will be considered with each person present at the time of the incident. The following rules are followed for interviews with all individuals:
 - 1. The witnesses should be interviewed are mptly, separately and privately,
 - 2. The interviewer should avoid question The interviewer should avoid questione that give a yes or no answer.
 After the interview, the interviewer should a cument any concerns ide
 - cument any concerns identified.
- e. The investigation will be focused at determining the poot cause and therefore:
 - 1. The investigator or investigating team must focus on getting accurate and complete information.
 - 2. Facts must be separated from opinions, and direct ridence from circumstantial evidence.
 - 3. Each concern identified in the investigation must be fully addressed.
- Upon completion of the investigation, the team will fill and submit the Unline Incident f. Investigation Form (SSGC-IMS/IAM-F-02). It includes Background Information, Root Cause Analysis, Conclusion and Recommended Corrective / Preventive astions.
- g. In all cases, the Incident investigation must be completed within 07 working days from the incident notification date. Depending upon the nature of investigation, in-charge HSE&QA may extend the report submission timeline.
- h. Determination and implementation of viable corrective/preventive actions to eliminate the causes of incident.
- i. In-charge HSE&QA / Zonal HSE Team Leader ensures that the corrective/preventive actions assigned to concerned department/personnel, to be completed within agreed time frame.

......

It is responsibility of the ZopaLHSE Team Leader to:

HandBook | February 2022

- 1. Provide leadership role in implementation of corrective/preventive actions within the agreed timescale.
- 2. Ensure that corrective / preventing actions are effective in eliminating / reducing the risks.
- 3. Maintain record of Incident Notification Form and Incident Investigation Form of their respective zones.

4.4. Updating of Assessment

After the incident, depending upon the nature of severity and risk, the assessments (risk assessment, environmental aspect impact assessment) of specific activity / department will be updated including controls, risk level, likelihood etc.

4.5. Data Analysis and Review of Actions

32.20

The data of incidents in be evaluated and investigation outcomes will be shared with the management during menagement review meetings to seek advice and to discuss the effectiveness of measures factions implemented.

PURPOSE 1.

The purpose of this procedure is to define a frame work for identification of emergency situations which arise in company operations and for developing emergency preparedness and response plans to mitigate and manage risks arising from such situations or events. The Procedure defines

 $a_{2,4}^{2,4}$

requirements for business continuity planning post emergency situations to bring the business on-line.

Purpose of the procedure is to

- Formulate plan, responsibilities and actions to be taken to handle any а emergency situation.
- b. Identify potential emergency situations and response plans to minimize or avoid a pual & potential hazards of any emergency situation.
- Define in chanism and frequency to test-plan so as to ensure C. preparedri effectiveness of emergency response system.

SCOPE 2.

This procedure is applications of SSGC, its employees and any visitor physically present at the location of emergency site. Due to variations in nature of operations, various departments/sections have developed their own ER Plans eating for their strategic, operational and physical requirements. The same includes HSE emergencies arising from company's day to day operations in terms natural calamities, fire, major incidents with loss in our operations, main environmental damage, external terror or bomb threats, public unrest, war and etc.

3. DEFINITIONS-

- Emergency Situation: An abnormal situation part calls for immediate and urgent actions for safeguarding life of persons, protecting buildings, machines, vital netallations and other assets. Rescue: It refers to responsive operations that unally involve the saving of life or prevention of injury a.
- b. during an incident or dangerous situation.
- Emergency Response Organization (ERO): It is a group of people, in each section (such as HO, Headquarters etc.), who prepare for and respond to any encodency incident, such as a natural disaster or c. . . an interruption of business operations.
- d. Emergency Response Centre (ERC): It is a room suitably e ippert to handle any potential emergency : situations. All emergencies are to be reported here.
- First Aid: It is the provision of initial care for an illness or injury. It is as all performed by non-expert, but e. trained personnel to a sick or injured person until definitive medical treatment can be accessed.
- Assembly Areas: If an evacuation to the outside is appropriate, the f. in nated assembly areas for personnel shall be far enough away from the building, structure or workslice the ensure that, where practicable, everyone is protected from falling glass and other objects.
- Emergency Evacuation: It is the immediate and rapid movement of people away from the threat or from g.. the place of the hazard.

4. RESPONSIBILITIES

Responsibilities for the particular department/personnel are identified in the response plans prepared by various departments and sections. General responsibilities for Emergency response organization are as under:

- Rush to the area of incident without any delay. а.
- b. Immediately assess the situation and initiate the remedial actions.
- Call the fire brigade & other emergency services like ambulances if required. C.
- Ask/inform all personnel present within premises, using megaphone or any other means, for complete d. evacuation if situation goes out of control.
- Inform all to go back to their work places using megaphone or any other suitable means when the situation e. comes under control and the area is free from any hazard.

- HandBook | February 2022 🔩

5. PROCEDURE

The HSE&QA In-charge and department heads shall ensure that all emergency situations are identified during risk assessments performed and emergency response plans are implemented within the departments. They shall also ensure that all employees are made aware of their emergency situations and how to respond during a real emergency. They shall ensure that employees including emergency team members in their respective departments are trained to respond to emergencies and mitigate risks arising out of real emergencies. Some of the potential emergency situations that might occur in SSGC along with the response plans are lis ted below. Sequence of actions for any response specified on each section's ER plan may change depending upon the emergency situation.

Emergency Considerations 6.

The following areas of needs to be given consideration while identifying potential emergency situation but the same need not plimited to these areas:

- Fire & Excl
- Heavy Spilla oxic/flammable chemicals or leakage of gas
- Heavy rain/ flo
- Earth quake
- Bomb threat
- Building & office lockdown er in place
- Active shooter/hostage si

6.1. Fire & Explosion

In case of fire & explosion each personne within the premises must act as per but not limited to the following instruction

- а. Give voice alarm - FIRE! In case of fire for all inter-
- at employees in the area. Push the nearest located call point button in b. fire (if present):
- Immediately inform Emergency Response Organization C. through phone or in person.
- Try to control the fire by using fire extinguishers. Use d. ttinguisher only if you have been trained.
- Remove all explosive, inflammable and poisonous materia e. the maximum possibility.
- Shut off main valves of gas and circuit breakers. f.
- Stay away from the fire in case it is not controllable. g.
- Report to the designated Assembly Point away from the scene of fire re h. ion if asked by Emergency Response Organization through emergency exits and wait for the further instruct ins.

FIRE TRIANGLE

6.2. Heavy spillage of toxic/flammable chemicals or leakage of gas

In case of heavy spillage of toxic/flammable chemicals or heavy leakage of Gas each personnel present within the premises must act as per but not limited to following instructions:

- Immediately inform Emergency Response Organization through phone or in person, a. b.
- Eliminate all ignition sources (sparks/flames/heat) from the immediate areas. C.
- Turn off gas supply from nearest control valve. d.
- In case of gas leakage in confined space, proper measures (opening windows, doors etc.) should be taken to ventilate the gas. Ensure the availability of fire extinguishers. e.

n sureman Dept.

- Stop leaks if this can be done without having any risk.
- Do not touch or walk through spilled material. f. .
- Prevent entry into waterways, sewers or confined space. g. h.
- If available wear the Personal Protective Equipment recommended. i.
- Arrange immediate cleaning of spilled chemical by taking suitable precautions

Integrated Management System

9 kg

6.3. Heavy Rain / Flood

In case of emergency situation of heavy rain/flood, personnel must remain present within SSGC premises if the situation gets worst outside. In case of water entering in department/office each person must act as per but not limited to the following instructions:

1.2.4

- Try to stop water by keeping sand bags. а. b.
- Protect building, machines, equipment, tools, parts & material. C.
- Shut off Electricity and Gas if necessary.

Following precautions should be taken by the departments/sections, located under rain/flood threat areas:

- Ensure no material is placed outside in open area which may be affected by rain. а. Ь.
- per drainage system at vital installations so that every valve, equipment, electrical board etc. Ensure, be acces case of any emergency. C.
- Sufficient quantity of tarpaulin and rain suit is available to meet the rainy condition. . d.
- Keep the drawning open all the time. e.
- All pumps used for draining out the rainy water are in running condition. f.
- Sufficient quantity of send bags is available to stop entering the water inside, which may be placed in

| Class | Material | Examples | Type of Fire Extinguisher to be used |
|-------|----------------------|-------------------------------------------------------|-------------------------------------------------------|
| A | Solids. | Paper, woodquartic, etc. | • Water |
| B | Flammable Liquids | Paraffin, petrol, oil arc | CO2 Dry Powder |
| 0 | Flammable Gases | Propane, butane, methode, etc. | Dry powder |
| D | Metals | Aluminum, magnesium, titanium etc. | Sodium chloride based dry powder fire extinguisher |
| E | Electrical Apparatus | Short-circuiting, over loaded electrical cables, etc. | CC2 Fire Extinguisher |
| F +' | Cooking Oil & Fat | Animal fat, etc. | • Dry membral based: Potassium bican potat |

6.4. Earthquake

In case of earthquake shocks each personnel present within the premises must act as per but not limited to the

- Immediately inform Emergency Response Organization through phone or in person. a.. b.
- Immediately Evacuate to Assembly Areas (in open space where you can keep distance at least one half of the height of the building) after the shocks dampen. с.
- Shut off all switches and valves of main supplies of gas and electricity. (If possible) d.
- Maintain your senses, do not let them disperse. e.
- Protect yourself by sitting on side of tables, furniture & under strong structures. Be aware of falling walls, debris, heavy objects and electrical wires. f.
- Stay away from loosely hanging objects that may fall after initial shock and tremors. Wait for further instructions from Emergency Response Organization. g.
- h.
- ERO should keep in touch with the metrological department / media for aftershocks and future forecasts.

HandBook | February 2022

- The Bomb Disposal Department shall be allowed to operate in the company premises as deemed e.
- On getting clearance from Bomb Disposal Department normal routine shall be adopted as advised by f. Emergency Response Organization.

6.5. Bomb Threat

In case of bomb threat each personnel present within the premises must act as per but not limited to the following

- Immediately inform Emergency Response Organization through phone or in person. a. b.
- Maintain your senses, do not let them disperse. C.
- Report to the designated Assembly Point if asked by Emergency Response Organization through emergency exits and wait for the further instructions. d.
- Bomb Disposal Department shall be called by Emergency Response Organization. e.
- The Bomby sposal Department shall be allowed to operate in the company premises as deemed appropriate. On getting tharance from Bomb Disposal Department normal routine shall be adopted as advised by f. Emergency Fespinse Organization.

Take care:

others in danger

unexpected

emergency

Don't try to be a hero in

do not place your own

life on health or that of

Berprepared for the

situations;

6.6. Building or Office Lockdown/shelter-in-place-

If a situation calls for building or ice lockdown, the personnel present within premises should act as per but of livited to following instructions:

- Remain calm and stay with you to eagues. a.
- Try to stay in pairs. b.
- Do not leave the room and/or building uder a lockdown situation C. until asked otherwise.
- d. Keep quiet and away from doors and window
- If a gunshot is heard, lay down on the floor е. id under/behind furniture as much as possible.

6.7. Active Shooter/Hostage Situation

In case of shooter/hostage situation each personnel present while the premises must act as per but not limited to the following instructions:

- If it is safe to do so, exit the building; if not, lock or barricade yourse a... · inside a room.
- b. Turn off lights, cover and lock the windows, and lay on the floor.
- If the shooter(s) leave the area, go to a safer place, if possible. Have an e route/plan in mind, keep your hands open and visible, and follow any instructions given by law enforcement d.
- Call the Police/Rangers when it is safe to do so. Remain calm, use a quiet
- information as possible (your name and location, details about the shooter(s) appearance, weapons, etc.).
- If you can't speak, leave the line open so the responding authority can listen and up to propoint the location. Cooperate and negotiate with the shooter, in order to buy as much time as possib e. ' ' if he rescue team reaches.

7. **EMERGENCY NUMBERS**

In consideration of the emergency numbers to be included in the emergency plan, the following should be taken. into account:

> III'em Usņ

- Fire brigade/civil defense or equivalent.
- Police.
- Ambulance service.
- Hospitals/Clinics.
- Mutual aid agreements/neighbors.
- Environmental protection agencies.
- Key company personnel.

Integrated_Management System

8. **EVACUATION**

All Emergency evacuation routes/doors should be accessible at all times. No hindrances should be placed in the route. All employees should be familiarized with the evacuation routes of their premises.

All employees should immediately evacuate their premises and assemble at the assembly areas (identified by each section). During evacuation following instructions should be followed. Take only keys, wallets and essential belongings with you. a.

- b.
- Leave the building/premises immediately, do not try to investigate the source of the emergency. c. Walk, don't run, to the nearest exit.
- d.
- Use stairs, not elevators, e.
- Assist people with special needs. f.
 - nake your way out, encourage those you encounter to exit as well. As you

9. THING BE EVACUATED

In case of emergen , evacuation should be carried in the following order:

9.1. Personnel

Those personnel who do ave sound health such as patients of Heart, Asthma and physically/mentally disabled people are to be wardated on priority basis.

9.2. Raw Material

Raw material which is explosive, immable and poisonous must be removed. Similarly, important, lightweight items that are easy to care nuct also be removed.

9.3. Documents

Important records and files must also be for

9.4. Equipment

Cash Lockers, Computer Sets, External Hard-o xpensive Tools and Fixtures must also be removed.

10. TESTING AND EXERCISES

Testing and exercise of the emergency response plane ould be conducted at each location of SSGC to evaluate the effectiveness of the preparedness plan. The registration of the exercise should be recorded on Emergency Drill Form (SSGC-IMS/ERP-F-01). Each section should nominate the person who is responsible to

iodically conduct the exercise. The frequency and type of drill at each location should be as below:

| Location | Type of Emergency Drill | Frequency |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------|-------------|
| a. Head Office b. Regional Offices c. Billing Offices d. P&C Offices e. Store (all locations) | Evacuation and Mock Emergency Drill (all employees) | Six Monthly |
| f. KT (Transmission) g. Distribution (Zonal and Sub-zonal offices) | Fire Fighting Drill by Emergency Response Team | Six Monthly |

11. AVAILABILITY AND MAINTENANCE OF ER EQUIPMENT:

Zonal HSE transferred ensure that emergency detection and response equipment are identified, available and property remained in their respective zones. A joint inspection will be carried out periodically to verify the efficacy of ER Equipment. The record shall be maintained on Inspection and Monitoring of ER Equipment ERP Form (SSGC-IMS 02). Each zonal HSE team leader shall maintain record of their respective zone and share with In-charged ISE&CA as and when required. The need for the emergency response equipment is determined by considering the hazards and associated risks with the particular

- location/operation/equipment installation etc. The response equipment usually include but are not limited to: Fire extinguisher. a:
- b.
- Fire hydrant/hose/bucket/wate
- C. Smoke/gas detectors.
- Communication equipment. (Meg d. . s, Alarm systems, walkie-talkie etc.)
- First aid box. e.
- ſf. ER vehicles/Ambulance.
- Breathing apparatus. g.
- Emergency lights. h.
- Hammer/Axe/shovel/ropes etc. i.

Frequency of inspection and monitoring of ER Equipment vibbe as per table given below. However, if situation warrants, this frequency can be changed on the instructions of Inclarge HSE&QA or Zonal HSE team leader.

Integrated Management System -

. . . .

2.4

1010 1010 1010 53

:.^{___}

1. PURPOSE

The HSE&QA guidelines for suppliers and contractors are developed to assist suppliers/contractors to meet ssgc's hse&qa policies, procedures, commitment & requirements to ensure safety, integrity and quality of goods/services provided.

all and an and a

1.0

2. SCOPE

The procedure is applicable to all suppliers and contractors providing goods or services to SSGC whether on SSGC premises or outside SSGC premises.

3. DEFINITIONS

- Contractor: Is an independent employer/organization who will be responsible to execute jobs a. agreed v SSGC.
- Supplier: s independent employer/organization that is responsible to provide goods or b. services.
- Contract coordinator: Is an executive of SSGC procurement department, who has been C. delegated/given responsibility and authority from the head of department to initiate and maintain the contract.
- ď. NEQS: National Environ Quality Standards.
- SEPA: Sindh Environmental Protection Agency. e.

4. **RESPONSIBILITIES**

4.1 Suppliers/Contractors and Sub contractors

- a. The contractor must take all necessary salety precautions related to the performance of the contract in order to protect the work site, including all personnel and property of the SSGC, the
- contractor, all third parties involved.
- b. Suppliers/Contractors are responsible for safety an well-being of their employees.
 c. The contractor will also be responsible to provide relevant safety equipment (PPE) to their workforce where required. Suppliers/Contractors who are their own HSE&QA management system, shall provide details of the same on request.
- d. The contractor shall ensure that all personnel are adequated thanks to perform the task assigned. e. Supplier/Contractor shall ensure compliance with SSGC policie opedures and applicable legal and regulatory requirements.
- The contractor shall adhere to set standards and requirements for environmental protection. f.

4.2 Contract Coordinator

The contract coordinator is responsible to arrange training sessions/meetings between contractors and HSE&QA department within 10 days of issuance of a letter to proceed.

4.3 HSE&QA Department

- a. In-charge HSE&QA and contract coordinator are responsible to evaluate the capability and competence of Supplier/Contractor regarding HSE&QA.
- b. In-charge HSE&QA is responsible for providing necessary information and training to Suppliers/contractors regarding applicable SSGC's HSE&QA policies and procedures.
- c. HSE&QA department will carry out inspections and audits to ensure safety and well-being of employees and adherence to set standards, technical specifications and guidelines.
- d. In-charge HSE&QA is responsible to highlight critical nonconformances related to HSE&QA. Strict decisions may be taken against any violation/breaches of SSGC's safety policies/procedures/contract terms during the execution of contract.

HandBook | February 2022

- 5. PROCEDURE
- a. The contract coordinator should ensure that this procedure is part and parcel of every contract made
- b. The contract coordinator must notify in-charge HSE&QA to evaluate the capability & commitment of potential suppliers/contractors regarding HSE&QA during technical evaluation phase.
- c. The contract coordinator arranges a meeting between supplier/contractor and HSE&QA department after issuance of letter to proceed. HSE&QA awareness form (SSGC-IMS/GSC-F-01) will be communicated and duly signed by supplier/contractor as well as HSE&QA department.
