However bidder offering pipe manufactured from Pakistan Steel Mills (PSM) HR coil are required to submit certified documentary evidence of HR coil rates. Adjustment in line-pipe rates (from the bid opening date till the currency of order) due to change in rate of HR coil manufactured by PSM is admissible to the extent of raw material cost without wastage. The bidders are required to submit certified documentary evidence of HR coil rates published by PSM, at the time of submission of bids. SSGC may verify the document / rates from PSM.
- 8.2.3 The variation clause however shall not be applicable on line-pipe quantities which were delivered within 20 days of the announcement of the variation (both days inclusive) in price of HR coil by PSM.

Fincuremen

- 8.2.4 The variation clause also shall not be applicable on the line pipe quantities delivered after the specified delivery schedule (total or monthly consignment wise)
- No escalation is applicable on line pipe manufactured from imported HR coil.

#### 9. Bid bond (earnest money):

Bid bond equivalent to two percent (2%) of the total offer value, in favor of Sui Southern Gas Company Ltd. shall accompany the bid if bid value is above Rs.500,000 in the form of pay order, demand draft, call deposit receipt or a bank guarantee (specimen of bank guarantee is attached at Annexure-A), issued by a scheduled bank in Pakistan. The bid bond shall remain valid for 120 days (150 days in case of Two Envelope bidding procedure) unless specified otherwise. The bid bond shall be returned/refunded to the unsuccessful bidders while the bid bond of the successful bidder shall be retained, till submission of Performing Dand (if applicable). Bids without bid bond will not be considered. In case the order value is 0000 the bid bond in lieu of performance bond will be retained till fulfillment of less than Rs: obligations by the supplier. However, in either case the bidder is responsible to arrange the extension the bid bond validity as prorequirement. If bid bond submitted by the supplier is more than 2% of ordered value, it may be repeated with appropriate value. If order value is less than Rs. 500,000, the bid bond will be returned along with he o ler. Bid bonds of non-compliant bidders may be released during evaluation process. The bid bond ma de eited if a bidder withdraws the bid duringvalidity period specified by the bidder or if successful bidde. It is to:

Accept purchase order,

Furnish performance guarates in accordance with clause 16 of Section 1, Supply material as per requirement and delivery schedule.

9.1 In the event of bid bond validity following and of the prescribed period of 120 or 150 days as the case may be either (i) due to extension in the bis any assion date or (ii) where so required by the procuring agency, then in such an event it shall be mand at of prothe padder to extend the bid bond validity upto 120/150days within 30 days of the opening of techn aposal / bid, and / or where so required by the procuring agency.

9.2 In the event of the bid security amount deposited / furnished // the bidder falls short by 10% of the requisite Bid security amount. The procuring agency keeping in the the nature of the procurement may consider and allow the bidder to deposit / furnish the balance 1 the amount, provided the bidder does so within 15 days of the opening of the bid. Notwithstanding that 10 ther terms & conditions have been fully complied with.

#### 10. Opening of bids:

Bids will be opened in presence of bidders or their authorized agents at the address province on "invitation to bids". The bidder's representatives who are present shall sign the bid opening sheet (attendance sheet) to mark their attendance/witness. Commercial contents of bids will be announced/recorded in bid opening

#### Preliminary Examination of bids: 11.

The Company will examine the bids to determine their completion, computational errors, provision of guarantees, authorized signature and other related matters.

Arithmetic errors will be rectified on the following basis. Discrepancy between unit price and the total price obtained by multiplying the unit price and quantity, the unit price shall prevail and the total price will be corrected. Discrepancy between total bid amount and the sum of total prices, the total prices shall prevail and the total bid amount will be corrected.

Prior to a composed evaluation, the Company will determine the substantial responsiveness of each bid to the bidding documents. In Company's opinion a substantially responsive bid is the one which conforms to all the terms and conditions of the bidding documents without any material deviation.

Pid determined as not substantially responsive will be rejected by the Company and cannot 1) 4 subsequently be about appensive by the broad through correction of the non-conformity.

#### 12. Clarification of submitted bids:

To assist in the examination, evaluation and comparison of bids, the Company may at its discretion inquire any clarification from bidder about their bid. All responses by bidders shall be provided in writing and no change in the price or substance of the bid shall be sought, offered or permitted.

# 13. Technical Literature & Samplew.

The Bidder(s) shall submit the following.

- 13.1 Samples (if applicable/required)
- 13.2 Original or legible copy of technical literature/performance characteristics
- 13.3 Test Certificates (if applicable/required)
- 13.4 Documentary evidence for legal import in case of imported material. (At the time of delivery when quoted on FOR basis)
- 13.5 In case of pipeline operation material bidders must also attach a "proof from supplier/
  many acturer, that goods offered have been used successfully on a high pressure natural gas pipeline
  elsevable under tropical climatic conditions.

# 13.6 Specification compliance Sheet:

Company requires a clause-by-clause commentary on the Specifications, demonstrating the materials responsiveness to those specifications or a statement of deviations and exceptions to the provisions of the specifications; if a required/desired. For purposes of the commentary to be furnished pursuant to above, the bidder shed note that standards for workmanship, material and equipment and references to brand names of stallogue numbers, designated by the Company in the specifications are intended to be descriping only and not restrictive. The bidder may substitute other authoritative standards, brand names and/or it logue numbers in its bid provided which demonstrates to the Company's satisfaction that he substitutes are equivalent or superior to those designated in the specifications by the Company.

Bid which does not possess above documents, tertificates etc., may be considered technically Non-compliant.

- 13.7 The offer shall be accompanied with all technical day documents/certifications as required under the tender specifications. Evaluation shall be carried out on the basis of data/ documents/certifications submitted with the bid. No clarification, additional is 6 mation may be sought / accepted after bid opening.
- 13.8 Deviation to technical specifications:

The bidder shall fill the "technical compliance sheet" and men on sacred specifications along with reference to its technical brochure/literature (page/clause No.etc). Statio and such as "Compliant" or "Confirmed" is not acceptable. Deviation to tender terms and think a specification is not acceptable. However, if bidder feels to mention minor deviation, and the shall be referred categorically on the "Bid Form" as well as on the technical compliance sheet stating reference of its technical data sheet/brochure. In case of insufficient information, data or document the Company is not liable to seek clarification and the bid may be determined non-compliant as provided information.

#### 14. Award/Evaluation Criteria:

- 14.1 In case of locally manufactured items e.g. service line material & meter components, manufactured by local vendors, the lowest bidder will be awarded maximum quantity as per his declared capacity and past performance in respect of delivery and quality. New vendors / manufacturers shall also be considered for placement of a purchase order up to a maximum of 10% of the tender quantity if their submitted sample has been tested and approved and provided they have quoted lowest price or agree to accept the order on lowest received price.
- 14.2 Generally for other items other than above, ordering shall be based on technical compliance and lowest quoted price. Supplies may be subject to pre shipment inspection and post qualification by a third party in case of foreign material. If required during the process of manufacturing and / or inspection, SSGCL representative may visit the manufacturer facility to witness the manufacturing / inspection process.

th Ga

Procuremen

- 14.3 Evaluation may be carried out both on item or on group of items/single or multiple package basis depending upon the nature of requirement exclusively at the discretion of the company to ensure
- Company reserve the right to settle the final terms of supply with the lowest evaluated and commercially responsive bidder: Any effort by the bidder (s) to influence the outcome of bid evaluation or placement of purchase order may result in disqualification of the bidder.

# 15. Loading of Bids:

Bids may be loaded with following if offer found to be deviated from specifications, delivery schedule, terms & conditions without stating the amount involved in such deviation by following method:

The cost of compensation / loading amount for that item shall be derived from the bid itself. 15.2

If 15.1 is not possible, average of rates of other bidders, who have quoted for that item conforming to technical specification, shall form the basis for cost compensation/loading.

company will encourage participation by local bidders who will be given price preference. cost factor shall be determined as per prevailing Government policy / SRO. However they details of local value addition on raw material imported by them and percentage of locally manufactured component with documentary evidence.

Page 1 of 10 Dated: 12th October 2020 Revision-1: Dt: 3 Sept 2024

#### REASONS FOR BLACKLISTING 4.

The following shall comprise the broad multilateral guidelines for blacklisting: 4.1

4.1. I "Corrupt Practice" means the offering, giving, receiving, or soliciting, directly or indirectly, of anything of value to influence the action of a public official in the procurement process or in contract execution;

4.1.2 "Fraudulent Practice" means a misrepresentation or omission of facts in order to

influence a procurement process or the execution of a contract;

4.1.3 "Collusive Practice" means a scheme or arrangement between two or more bidders, with or without the knowledge of the Purchaser, designed to establish bid price at artificial, non-competitive levels, and

4.1.4 "Coercive Practice" means harming or threatening to harm, directly or indirectly, Person(s) / Firm(s) or their property to influence their participation in the

procurement process or affect the execution of a contract.

In addition to above, blacklisting of firms/individuals may be resorted to when the 4.2 charges are of serious nature, which include but are not limited to the following:

# Competitive Bidding Stage

the competitive bidding stage, the Procuring Agency shall impose on bidders or bidders the penalty of Suspension from participating in the public bidding process, without prejudice to the imposition of additional administrative sanctions as the internal russof the agency may provide and/or further criminal prosecution, as provided by applicable law, for violations committed which include but are not limited to the following:

- Submission of elimility requirements containing false information or falsified i. documents.
- c ntain false information or falsified documents, or the Submission of bids ìi. ion in the bids in order to influence the outcome of concealment of such in eligibility screening or an other stage of the public bidding.

iii.

Submission of unauthorized or rail documents for pre-qualification/ tendering i.e. without specific authorization for the principals/ manufacturers etc.

Failure of the firm to provide antients Warranty Undertaking and Performa Invoice of the manufacturers / Principal / Trading house. iv.

Failure of the firm to submit specific aut of y letter of the Original Equipment ٧. Manufacturer (OEM) for participation in a par cular tender:

Unauthorized use of one's name, or using the arr of the name of another for vi. purpose of public bidding.

& conditions of the purchase Deviations from specifications and terms vii. order/contract.

viii. Withdrawal of a bid, or refusal to accept an award or rei sal to perform the job or enter into contract with the government without justifiable caus after he had been adjudged as having submitted the Lowest Calculated Respons Bid or Highest Rated Responsive Bid.

Refusal or failure to post the required performance security within the prescribed ix.

Refusal to clarify or validate in writing its Bid during post qualification within a X, period of seven (7) working days, or as may be specifically prescribed, from receipt of the request for clarification.

> Page 2 of 10 Dated: 12th October 2020 Revision-1: Dt: 3 Sept 2024

- Any documented unsolicited attempt by a bidder to unduly influence the outcome of the bidding in his favor.
- xii. Any attempt to give illegal gratification to any representative of the purchaser to influence the process of procurement.

In addition to the penalty of suspension, the bid security posted by the concerned bidder or prospective bidder could also be forfeited / encashed.

# 4.2.2 Purchase Order / Contract Implementation Stage

During the Purchase Order / Contract implementation stage, the procuring entity shall impose on contractors after the termination of the contract the penalty of suspension from participating in the public bidding process, without prejudice to the imposition of additional administrative sanctions as the internal rules of the agency may provide and/or further criminal prosecution, as provided by applicable laws, for violations committed which include but are not limited to the following:

- Failure of the contractor, due solely to his fault or negligence, to mobilize and start work į. or performance within the specified period in the Letter to Proceed.
  - Failure by the contractor to fully and faithfully comply with its contractual obligations without valid cause, or failure by the contractor to comply with any written lawful uction of the Procuring Agency or its representative(s) pursuant to the entation of the contract. For the procurement of infrastructure projects or consultance contracts, lawful instructions include but are not limited to the following:
    - Norment of competent technical Person(s) / Firm(s)nel, competent engineers and/o wo k supervisors;
  - varning signs and barricades in accordance with approved plans and specificances and contract provisions;
  - Stockpiling in the project site of waste and excess paterials, including broken pavement and excavated debris in accordance with approved plans and specifications and contract provisions; Deployment of commune equipment, facilities, support staff and manpower; and

  - Renewal of the effective of the performance security after its expiration during the course of contracting ementation.
  - Non-Performance of the supplied spect of tender terms & conditions and the delivery / supply of material.
- Assignment and subcontracting of the contract or any part thereof or substitution of key Person(s) / Firm(s)nel named in the proposal without prior written approval by the Procuring Agency.

- For the procurement of consulting services, poor performance V. ne consultant of his services arising from his fault or negligence, any of the following iv the consultant shall be construed as poor performance:
  - Defective design resulting in substantial corrective works in design and/or construction:
  - Failure to deliver critical outputs due to. consultant's fault or negligence;
  - Specifying materials which are inappropriate, substandard or way above acceptable standards:

Page 3 of 10 Dated: 12th October 2020 Revision-1: Dt: 3 Sept 2024

- d. Allowing defective workmanship or works by the contractor being supervised by the consultant; and
- e. Submitting CV's of key Person(s) / Firm(s)nel in the prequalifying process or bid documents of professionals that are not in actual employment of the bidder.
- VI. For the procurement of infrastructure projects, poor performance by the contractor or unsatisfactory quality and/or progress of works arising from his fault or negligence.
- vii. Willful or deliberate abandonment or non-performance of the project or contract by the contractor resulting to substantial breach thereof without lawful and/or just

In addition to the penalty of suspension, the performance security posted by the contractor could also be forfeited.

- 4.2.3 In addition to above, other grounds for blacklisting of firms/individuals include but are not limited to the following:
  - i. Oblining fraudulent payments;
  - ii. Ob taing contracts by misleading the purchaser:
  - iii. Refus I to bay SSGC dues etc.;
  - iv. Failure to full contractual obligations;
  - v. Changes in the status of firm's ownership/partnership etc. causing dissolution of the firm which existed in the time of inspection / bidding prior to original registration of the firm;
  - vi. Registration of a rim with a new name by the Proprietor or family or a nominee thereof of a firm that has been already blacklisted;
  - firm that has been after a blacklisted;
    vii. Consequential operational damages caused to SSGC equipment or infrastructure as a result of equipment or parts there; is pplied on trial basis or due to failure of such equipment;
- viii. Contractors who have negotite. Plea Bargain under the National Accountability Ordinance 1999, or contractors involved with any other criminal proceedings conducted by any investigation agency where default as been proved specifically in relation to supplies made to or contracts concluded with SSG.
- ix. Involved in litigation or needless petitioning to influence or obstruct the procurement process either on his own behalf or at the behest of an other vested interest;
- x. A firm may be disqualified for a period extent able to two years in case a decision by a court is awarded against the said firm after litigation. If where the firm is involved in litigation at least three times during two financial years, or where the firm is involved in litigation at substantial financial losses to SSGC;
- xi. Blacklisted by other Federal and Provincial Government Amiries / Divisions / Departments and organizations / autonomous bodies subordinate thereto, a contract of the cont
- xii. Blacklisting in case of Joint Venture firms will also result in a rination of the concerned Joint Ventures Partners.

# 5. SYSTEM OF PENALTIES

For the purpose of uniformity, following system of penalties shall be adopted for procurement of goods, works and services:

Blacklisted and henceforth cross debarred for participation in any public procurement or disposal proceedings for the period of not more than ten years, if corrupt and fraudulent

Page 4 of 10 Dated : 12th October 2020 Revision-1 : Dt: 3 Sept 2024

practice as defined in these rules is established against the bidder or the bidders in pursuance of blacklisting proceedings;

- 5.2 blacklisted and henceforth cross debarred for participation in respective category of public procurement or disposal proceedings for a period of not more than three years, if the bidder fails to perform his contractual obligations during the execution of contract or breaches the contract due to his capacity and capability to perform or otherwise. However, procuring agency shall initiate such blacklisting or debarment proceedings after exhausting the forum of arbitration, provided that such provision exists in the conditions of contract, and if such failure or breach is covered in the respective dispute settlement clauses of the contract, and
- 5.3 blacklisted and henceforth cross debarred for participation in respective category of public procurement or disposal proceedings for a period of not more than six months, if the bidder fails to abide with a bid securing declaration, however without being indulged in any corrupt and fraudulent practice.

# 6. SUSPENSION AND BLACKLISTING PROCEDURE

. The supplier or contractor who is to be blacklisted for a specified period is given adequate opportunity of being heard.

- 2. The supplier or contractor who is to be blacklisted for a specified period is called for meeting by providing adequate time, so as to given him adequate opportunity of being heard before taking any action.
- 3. In case the supplier or contractor does not attend the meeting on the given date and time a final notice is served to in m / her to attend the meeting on the revised date and time. Despite the final notice of the supplier or contractor does not attend the meeting as per schedule, automatically be considered at fault. Action will be taken as per below clauses 5 to 9.
- 4. A three-member committee will form amprising of User, Procurement and HSE&QA departments to address the issues in the parting with the supplier or contractor. Members of committee may not below of grade I.
- 5. In case the supplier or contractor is found at describbased on the fact of the case as well as the tender terms and conditions, and do not justify the grounds of his default as per the tender terms and conditions, the approval is the from the management for their temporary or permeant blacklisting along with encast me to of bid bond or PBG as the case may be.
- 6. The decision of the management is communicated to the stand supplier or contractor through a formal letter.
- A copy of the letter of the defaulted supplier / contractor alongwith covering letter with pertinent documents is / also forwarded to the Authority (PPRA) for uploading on PPRA website.
- 8. The blacklisting information of the supplier / contractor is uploaded on the websites.

Page 5 of 10 Dated: 12th October 2020 Revision-1: Dt: 3 Sept 2024

- 9. Any bidder not satisfied with the decision of the procuring agency, may lodge an appeal in the relevant court of jurisdiction.
- 10. After coming into force the procurement contracts, the dispute between the parties to the contract shall be settled by arbitration.

## STATUS OF BLACKLISTED FIRM/INDIVIDUAL

Blacklisting of a firm/individual will not affect other ongoing contracts/works/supply orders. However, such blacklisted firm shall stand barred from all future tender processes/participation and Standing Security, if any, could be confiscated until recovery of financial damages ascertained by the authority while issuing Blacklisting Order.

## 8. DELISTING

A temporary blacklisted firm / individual shall be automatically restored after the period for the penalty has elapsed, unless the procuring agency wants to maintain the blacklisted status of firm / individual , le to justifiable reasons with the prior approval of Appellate Authority. In the latter case, the telephonery blacklisted firm / individual shall be restored.

# 9. AMENDMENT

- 9.1 In the implementation of Blacklisting Mechanism, the modifications may be introduced thereto through the implement of its specific provisions as the need arises.
- 9.2 Any amendment to this P acklisting Mechanism shall be applicable to tenders advertised for bid after the effectivity of the said amendment.

## 10. EFFECTIVITY

The Blacklisting Mechanism or any amending as thereof shall take effect immediately and from the date of its issuance. All future tender documents must be governed by these instructions. However, these cannot override the provisions of Putto Procurement Rules, 2004.

# 11. The Steps to be Followed are Al Under

The causes and reasons to be taken into consideration for Debarment / Listing of any Person(s) / Firm(s) are given as under:

#### 1. PRE-AWARD STAGE:

Page 6 of 10 Dated : 12th October 2020 Revision-1 : Dt: 3 Sept 2024

- iii Commission of embezzlement, criminal breach of trust, theft, cheating, forgery, bribery, falsification or destruction of records, receiving stolen property, false use of trademark, securing fraudulent registration, giving false evidence, furnishing of false information of serious nature.
- iv Submission of false bid security or infringement of documents to get undue monetary or any other benefit.
- v Breach of confidentiality of evaluation process based on illegal access or in any way to get undue benefit or to provide benefit or to frustrate the bidding/evaluation process. This will also include attempts to sabotage the bidding process directly or indirectly.

# 2. POST- AWARD STAGE:

The following shall be considered, interalia, the events / reasons for initiating proceedings under this Mechanism at the Post-Award Stage:-

- i. A traordinary delay in signing or refusal to accept the Notification of Award and/or the course without any cogent reason.
- ii. Misconduct, i.e., failure to proceed with the signed contract, withdrawal of commitments, quoting an unreconably and unfairly low financial offer and subsequently withdrawing such an offer, in trating the evaluation/bidding process and not responding to written communication in a easonable time.
- iii. Causes mentioned in sub-Clauses i, ii and iii above.
- iv. Submission of fake / frivoiou or mutilated Performance Guarantee or Advance Payment Guarantee etc.
- v. Non-satisfactory performance during the execution of the contract / purchase order.
- vi. Non-performance or Breach of provision of the contract agreements/tender terms.
- vii. Notwithstanding the warranty/defect liability period, and defect in a product, equipment, plant, facility or services rendered that may subseque fly surface during field operations within 5 years of its commissioning.
- viii. Failure to honour obligations within warranty period or defect leavility period as defined in the contract.

# 3. OTHER CAUSES:

- i. The Person(s) / Firm(s) is blacklisted by any Government department in Pakistan, or it is established that the firm is involved in any kind of corruption or corrupt practices anywhere in the world.
- ii. Violations of provisions / instructions set down in the Bidding Documents.

Page 7 of 10 Dated : 12<sup>th</sup> October 2020 Revision-1 : Dt: 3 Sept 2024

- lii. Any attempt / activity to malign or bring SSGC into disrepute and harm its interest(s).
- iv. Person(s) / Firm(s)(s) blacklisted by International Financial Institutions (donor agencies) will be liable to be blacklisted after receipt of confirmation from the donor agencies without any further proceeding.
- v. Any other cause deemed just and appropriate by CPPA in the given circumstances.
- Note: (1) If above mentioned causes occur either on part of the principal bidder or the local agent, both shall be considered for blacklisting / debarment.
  - (2) The authorization of the foreign bidder to local agent shall contain his complete particulars including the name of the company, name of the owner, National Tax number (NTN), CNIC (Computerized National Identity Card) No. etc. In case, the said information is found to be missing, even after calling for the same within a reasonable time, the authority letter shall not be accepted.
  - (3) The Bidding Documents shall be issued against original authority letter or in case of scanned copy, the email of the foreign bidder shall be enclosed. However, at the time of bidding, the original orbarity letter shall be attached with the bid. In the absence of the same, the bid shall be rejected.
  - 4. FORMULATION of SSGC's Rights Protection Committee: A permanent Committee namely "SSGC's Rights Protection Committee (RPC or Committee)" shall examine the justification of the reasons given by the Project Authority prior to blacklisting. Member of RPC must be one grade up from the member of A.

# 5. PROCEDURE FOR BLACKLY ING

Upon receipt of or obtaining information and/or knowledge that any Person(s) / Firm(s)(s) is involved in practices mentioned in hereinal or e under the heading of Pre-Award Stage; Post-Award Stage and Other Causes, the concern d Project Authority / formation shall promptly formulate its recommendations and submit though the Managing Director, SSGC to SSGC's RPC / Committee along with its findings, detail / I charges and documentary evidences to initiate proceedings under this Mechanism.

# 6. INITIATION OF AN ACTION

- (i) Within a period of 15 days after receiving the recommendations of Blacklisting / Debarment from the concerned Project Authority, the Converge of the Committee shall issue a Show Cause Notice ("Notice") thereby informing the Person's) / Firm(s) about the alleged charges and shall provide an opportunity to the defend said that ges within a time period of 15 (fifteen) days.
- (ii) The Person(s) / Firm(s)(s) shall be accorded adequate opportunity of heating in order to defend the charges within the given timelines.
- (iii) The Notice to the Person(s) / Firm(s) shall be sent at the mailing/postal address as provided under the Contract or any other address provided by way of subsequent written communication by the Person(s) / Firm(s) The non-receipt of the Notice due to incorrect / change in mailing address without any written communication shall not be attributable to

Page 8 of 10 Dated: 12th October 2020 Revision-1: Dt: 3 Sept 2024

SSGC. In case of non-receipt of any reply from the accused Person(s) / Firm(s) within the formulated time, but not less than the time given in (i) above, the Committee shall have the right to proceed on Ex-parte basis.

## 7. DECISION

The committee shall hold an independent inquiry/investigation as the case may be, and, which may include site visits and interviews with the parties concerned. The Committee shall complete the entire inquiry/investigation, preferably within a period of 30 days after receipt of response from the Person(s) / Firm(s) against whom proceedings under this Mechanism has been initiated and shall present the report to the Managing Director, SSGC. If required, the Committee may report the case to an appropriate law enforcement agency depending upon the nature of the case for detailed investigations with the prior approval of Managing Director, SSGC. iii. The Person(s) / Firm(s) against whom proceedings have been initiated under this Mechanism shall not proceed for arbitration/litigation during the proceedings for blacklisting.

# 8. COMMUNICATION OF DECISION

After recommendation for temporary & permanent blacklisting by "SSGC's Rights Protection Committee (Pr. C)", the Person(s) / Firm(s) concerned shall be informed within 10 days of such decision. The decision of the Committee will be notified on SSGC 's and PPRA's websites and shall also be conveyed to Pakistan Engineering Council.

The temporary Black isting on the grounds and reasons specified herein above shall be for a reasonable specified period of time and as a general rule of prudence, the period may not exceed three years, except in cases where debarment/blacklisting has been done by any other government department or an intenational Financial Institution (Donor Agency). In case the Person(s) / Firm(s) has been blacklisted by the government department or the International Financial

Institution (donor agency), the period the property blacklisting/debarment shall be for a maximum period of 3 years or the time artiod for which the concerned government department/International Financial Institution (pener Agency) debarred the contractor (whichever is higher). However the permanent blacklying cannot be revived.

Action after the Person(s) / Firm(s) are placed on Blackhsung List:

- i. The decision of blacklisting will be immediately circulated as mentioned herein above under the heading Communication of Decision.
- ii, In case of a contract already awarded to a Person(s) / Firm(s) which has been blacklisted and termination is either not possible or not feasible, the concerned Project Authority may proceed in this case to complete the contract with the approval of Competent Authority. (iii)The blacklisted Person(s) / Firm(s) shall stand disqualified from bidding from the late of decision against them. Any pending bids shall also stand rejected. If a contract has already been awarded to Person(s) / Firm(s), it shall be voidable at the option of SSGC. (iv) A separate register or data base will be maintained for blacklisted firms indicating reasons and period.

RISK: Combination of probability of occurrence of a haz ous event or exposure and the resulting b.

consquences.
OPPORTUNITY: Opportunities can arise as a result of a six don fryorable to achieving an intended result, for example, a set of circumstances that allow the organization attract customers, develop new products and services, reduce waste or improve productivity. Actions address opportunities can also include consideration of associated risks.

SWOT: Strength, Weakness, Opportunity & Threat. d.

RISK MANAGEMENT: The set of control measures used to reduce or eliminate specific risk.

RISK ASSESSMENT: Risk Assessment is a systematic approach to hazard in ection. This is the f. overall process of estimating the priority of risk and deciding significance of risk.

- RISK ASSESSMENT METHODOLOGY: Risk priority shall be defined by the risk ent matrix. g. Hazards related to applicable legal requirements will fall in the high risk category.
- HIRA: Hazard identification and Risk Assessment. h.
- EAIA: Environmental Aspect and Impact Assessment. ī.
- IEE: Initial Environment Examination.
- EIA: Environment Impact Assessment. k.
- ILL HEALTH: Identifiable, adverse physical or mental condition arising from and/or made worse by a work activity and /or work related situation.
- OHS&E: Occupational Health, Safety & Environment. m.
- PTW: Permit to Work.
- MOC: Management of Change. ٥.
- MOC Owner: The employee who initiates the MOC. p.
- JSA: Job Safety Analysis. q.
- EXECUTING DEPARTMENT: It refers to the department performing the work or is responsible to get the work done through contractor.

HandBook | February 2022

# RESPONSIBILITIES

# 4.1 Corporate HSE&QA In-charge

Managing OHS&E risks and their controls.

Reporting to Senior Management on OHS&E related issues. Ь.

Providing support to corporate HSE&QA team and zonal representatives. C.

Liaise with zonal HSE team leaders/HSE&QA representatives for implementation of this procedure. d.

# 4.2 Zonal HSE team leaders

- Carrying out HIRA, providing and utilizing resources to identify and review OHS&E risks and implementing their controls in consultation with corporate HSE&QA team.
- Ensuring that employees, contractors and visitors have sufficient knowledge related to OHS&E.

Maintaining records of the OHS&E with the help of local HSE&QA team.

Implementing this procedure. Liaise with corporate HSE&QA team if required.

# 4.3 Zonal I SE QA representative

Coordinating with Zonal HSE team leader for carrying out HIRA and EAIA in their zones. Liaise with corporate HSE&QA team and zonal HSE team leader for OHS&E.

Reviewing/monitoring FIRA and EAIA in their zones and providing input on any changes.

4.4 Departmental Heau control Department

Acquiring PTW for any activity that requires prior permit to identify and mitigate safety risks.

Ensure implementation of JSA of blackwity performed outside SSGC permanent locations.

# 4.5 Employees

Participating in the identification and as ess nant of OHS&E risks when required by either Zonal HSE team leader or HSE&QA representative.

4.6 Visitors & Contractors

dentifying and reporting any risk or hazard at any location ASSGC. This also includes the worksites and

# **DECISION MATRIX**

Type of Risk/Hazard Assessment	Methodology	Responsibility.
HIRA	Periodic risk assessment of SSGC's existing facilities/installations such as Head office, Headquarters, Regional offices etc.	Sonal HSE team leader
PTW	On-site Risk assessment (for Permanent Locations) for any routine/non-routine activity that requires prior permit to identify and mitigate safety risks.	Departmental head/Contractor executing the task/activity requiring PTW
JSA	On-site Risk assessment (for Field Locations) for any routine/non-routine activity.	Departmental head/Contractor executing the field activity

Integrated Management System

MOC Risk assessments for new Projects, major changes or modifications in existing designs and infrastructure.	MOC owner
---------------------------------------------------------------------------------------------------------------	-----------

Risk Assessment and Management Procedure is divided into five sections based on the type of risk assessment needed:

- Section 1: Context of the Organization.
- Section 2: Hazard Identification and Risk Assessment.
- Section 3: Permit to Work.
- Section 4: Job Safety Analysis.
- Section 5: Management of Change.

# 6. PROTEDURE

# Section 1. Context of the Organization.

# 6.1. Context of the O gar zetion

i. Management defines scape of the company services and its boundaries considering the internal and external issues of the organization.

ii. In consultation with HSE&QA, displacement & Zonal Heads identify external & internal interested parties and maintain its list with needs & expectations. Interested parties are those stakeholders who receive company services, who may be impacted by them, or those parties who may otherwise have a significant interest in the company. Interested parties may include:

Interested Parties	Requirements	
Board of Directors	Good financial performance, legal compliance/avoidance of fines.	
Law Enforcers/Regulators	Identification of applicable statutory and regulatory requirements for the product and services provided and understanding of the requirements.	
Customers	Value for money, quality service inditation and quick response.	
Bank/Finance ***	Good Financial Performance.	
Employees	Professional development, prompt payment, health and safety, work/life balance, employment security.	
Insurance: **	No claims/prompt payment/risk management.	
Community	No complaint relating to: noise, parking, health and safety, pollution, waste.	
External providers (Vendors/Suppliers)	Prompt payment as per agreed terms, health and safety, long-term working relationship.	
Trade Unions	Compliance of local labor laws.	

MR

- HandBook | February

By using SWOT analysis or any other tool, identify external and internal issues that are relevant to iii. company operations and its strategic direction and that may affect the ability to achieve the intended result(s) of integrated management system. Internal and external issues can be positive or negative that can affect the OH&S management system.

# 6.1.1. Internal issues could include in risk & opportunity assessments, but are not limited to:

- a. Operations spread in two provinces.
- Complex transmission and distribution network. **b**.
- C. Succession planning.
- ď. Contractual relationships.
- Availability of reliable, qualified and competent workforce.
- f. retention...
- of unionization.

# 6.1.2. External judges could include in risk & opportunity assessments, but are not

- a. Political: Go el
- **Political:** Go en pront policies, political stability, international trade agreements etc. **Economic:** Fue utility prices, cash flow, credit availability, exchange rates, tariffs and inflation, general taxalize it sues etc. b.
- Social: Consumer buying pattern, education level, advertising and publicity, ethical & religious issues, demograph a Technological: Intellectual pr
- party issues, software changes, internet, technology legislation, associated/dependent technology, renewable energy etc.

  Legal and regulatory: Consumer to ection, industry-specific regulation and permits,
- trade union regulations, employment premational legislation, human rights/ethical issues etc.
- Environment: Customer demographics an nvironmental issues.
- Government: The directives from Prime Minister Ministry of Petroleum (energy division), regulatory bodies like OGRA, SEPA & BEPA etc
  - Ensuring the policy and objectives are established for the negrated management system and are compatible with the context and strategic direction of the organization.
- The management shall monitor and review information at external and internal issues during the management review meetings.

Always be proactive about sa

Report Hazard before it results in an Accident

Procurement Dept.

# Section 2 Hazard Identification and Risk Assessment

# i. Hazard Identification and Risk Assessment

The Zonal HSE team leader in consultation with local HSE&QA representatives plan and initiate the HIRA and EAIA process. The assigned team must be competent and have enough knowledge of the entire process. Cross functional teams are recommended for such activity to cover all aspects during assessment. The record of OHS&E risk assessment is maintained in Hazard Identification & Risk Assessment Form (SSGC-IMS/CRM-F-01). The identification/assessment process shall take into account:

- Routine & non routine activities, any emergency situations.
- b. ties of all persons having access to the SSGC permanent and temporary locations.
- chavior, capabilities and other human factors. .c.
- d. Designing of work processes.
- e.
- f. Infrastructure, eggipment and materials at the workplace or project site, whether provided by organization of the
- Changes or proposed thanges in the organization, its activities or materials. Fabrication, installation a ommissioning. Handling & disposal or paste material. a.
- h.
- i.
- Purchase of goods & service i.
- Any applicable legal obligators that is related to risk assessment and implementation of necessary k. controls.
- ation/activity. I. Before commencement of any name
- azard identification and risk assessment information. Periodic Review for updating the existing m.

#### At SSGC, we adapt five steps of risk sessment:

- Step 1: Identify the hazards.
- Step 2: Decide who might be harmed and how.
- Step 3: Evaluate the risks and decide on precautions.
- Step 4: Record your findings and implement them.
  - Step 5: Review your risk assessment and update if necessary

#### Risk Assessment Matrix

Risk assessment should be carried out as per assessment matrix below:

Risk Priority		Probabilit			
	OHLY	Very Likely	Likely	Unlikely	Very Unlikely
C :	Catastrophic				Medium
n s e	Significant			Medium	Medium'
น e n	Harmful		Medium	Medium.	
C 8 9	Negligible	. Medium	Medium <sup>.</sup>		

·	HAZARD CONSEQUENCE RATING TABLE		
Catastrophic	Hazard may cause death or total loss of one or more bodily functions. In case of failure a huge financial loss will occur.		
Significant	Hazard may cause severe injury, illness or permanent or partial loss of one or more bodily functions (e.g. prolong exposure to asbestos resulting in Asbestosis or prolong exposure to paint fumes resulting in Chronic Lung Disorder), or serious property damage, loss that may result in disruption of SSGC core activities.		
i Inful	Hazard may cause a reportable incident i.e. an incident that results in the employee being unable to undertake their normal duties and may need medical treatment, or property damage, loss that result in partial disruption of SSGC core activities.		
Negligible	Hazard may cause minor injury, illness or property damage, first aid reatment is required only, very low financial loss.		

	PROLEBILITY RATING TABLE
Very Likely	Exposure to har ard likely to occur frequently. Similar incidents reported more than once has Sec during last 10 years
Likely	Exposure to hazard likely to occur but not frequently. Similar incidents reported once in last 5 years in SSGC.
Unlikely	Exposure to hazard unlikely to scur.
Highly Unlikely	Exposure to hazard so unlikely that has be assumed that it will not happen.

	RISK PRIORITY TABLE
Risk Priority	Definitions of Priority
	Situation is considered critical, stop work immediately or consider cessation of this operation/task.
	Must be fixed ASAP, Zonal HSE team leader should take immediate actions.
Medium	Is very important, must be fixed within two weeks, Zonal HSE team leader considers short term and/or long term actions.
Low	Is still important but can be dealt with through scheduled maintenance or similar type of action However, if solution is quick and easy then fix it immediately. Review and/or manage by routine procedures.

# Section 2 Hazard Identification and Risk Assessment

# iii. Risk/Impact Assessment Outputs

The output of risk/impact assessment may include the following:

- Identified operations of all hazards/aspects and risks/impacts associated with company activities/system etc.
- Classification of risk/impact. b.
- Description or reference to control the risks/impacts.
- Description or reference to monitor the risks/impacts. d.
- httfied competency and or training requirements. ·e.
- for setting improvement objectives and programs for its achievement.

the sures identified shall include controls such as termination/elimination, treatment of the risk/impact and abstitution of risk by suitable means and where required tolerated as long as it meets local laws/legislation

assessments as input for the following: Use output of risk/impaciasa.

Setting objectives

- Training needs identify b.
- Terminating the risk/in pact it is practical. C.
- Facility engineering control d.
- **Emergency Preparedness**
- Administrative controls.
- insurance.

. The ultimate requirement is to reduce the risking at to a level as low as reasonably practical (ALARP) i.e. where the trouble, difficulty and cost for further reducion becomes unreasonably inconsistent to the additional risk reduction obtained.

# iv. Risk Control

Elimination ·

Engineering

Administrative THE RESERVE AND ASSESSED.

The hazards and risks are controlled through 'operational controls' by considering the following hierarchy.

- a. **Elimination:** The best way to control a hazard is to eliminate it. This can be achieved by making changes to the work process so that the task is no longer carried out, or by physically removing the hazard altogether. Elimination is the most effective way to control hazards and should be used whenever possible.
- b. **Substitution:** Substitution is the second most effective method for controlling hazards and risks. It is similar to elimination but involves the substitution of one higher priority risk by another lower priority risk.
- c. Engineering: Engineering controls are implemented by making changes to the design of an equipment or process to minimize its hazard. Engineering controls are based on the concept of "Doing it right the first time". Departments shall incorporate this concept during planning phase of any process and must seek out for best possible solution in terms of OHS&E.
- d. Adm nis trative: Administrative controls involve making changes to the way in which people work and premoting safe work practices via education and training. Administrative controls may involve training employees in operating procedures, good housekeeping practices, emergency response in the event of incidents such as fire or employee injury, and personal hygiene practices.
- e. Personal Protective Equipment (PPE): Use of PPE will kick-off where no other controls stated above are possible. Properly identified for specific process/job.

System & work area Hazards	Likely Consequences
Access / Egress Obstructions	Mi or injury, trips and falls
Asphyxiate Gas (CO <sub>2</sub> fire suppression)	o sible death by asphyxiation
Duried Caples.	Exposure to buried cables - major / minor injury
Electricity (HV/LV)) ***********************************	Fatality (clectric shock or serious burn injuries:
Falling Loads / Objects	Serious flead and or body injury
Flammable Vapors / Gases / liquids	Explosion or ne
Flammable Materials	Untontial ter time II
Hot / Humid Work Environment : " "	Heat stress, disoriental h. hiss of consciousness
MOVING Fails	Entrapment, major or minor minor
Noise danie to the	Long term.hearing loss, tihnit
Openings in Floor / Walkways	Falls from height, major injury possple atality
Flammable Materials / Gases:	Creation of hazardous area; fire, excession, 13
Heat, sparks and naked flames	Burns to exposed skin
High intensity light (welding)	Arc flash, short term discomfort long term loss of vision
Housekeeping poor	Slip, trip, fall, fire hazards, blocking fire escapes
Lifting Operations	Falling or moving loads - serious head and it or body injury
Live Electrical Work	Fatality by electric shock or serious burn injuries
Lone Working	No emergency response if injured.
Long Working Hours	Major / minor accident due to fatigue
Manual Handling	Muscular / skeletal injuries
New Task / Operation	Major / minor injury resulting from mistakes

W

Oxygen deficiency	Death of asphyxiation	
Poor Lighting / Visibility	Minor / major injury, fall or impact injury	
Slipping / Tripping Hazards	्रा. *Minor injury, trips and falls	
Spillages (Oil and chemicals)	Land contamination	
Substances hazardous to health	Chemical burns, texic, poisoning, irritants, pollutant	
' Repetitive Task / Operation	: Muscular / skeletal injuries	
Rotating / Moving Part	Major injury, potential for fatality	
Sharp Edges / Cutting Surface	Amputation and cuts, predominantly to hands .	
Smoke / Furne:	Circonsciousness, respiratory problems.	
Trailing Cables and Hoses	Tripping hazard causing major / minor accident	
Use of Hand Cole	Minor laceration and impact injuries	
	Burns to skin, eyes, and respiratory system. Environment	
Use of Power Tools   Impact injury, hand / arm vibration loss of sensation over		
Use of Workshop Equipment	Major / minor injuries - entrapment, cutting tools	
Vibration	Hand / arm vibration - loss of sensation over time	
Work at Height	Major / minor injury	
77011		

# v. Environmental Aspect log diffication & Impact Assessment

# a. Environmental Aspects:

An Environmental aspect is any element of SSC by siness operation that negatively affect the Environment. While conducting environmental assessment, following spects are usually considered:

# "REDUCE CARBON

What we can do:

- Recycle: what you can
- Reduce: avoid :
   unnecessary :
   consumption of :
   resources :
- that are reusable and reuse them.
- Unplug electrical:
   devices that are not in use
- Avoid unnecessary driving
- Use LED bulbs.
- · Plant a tree

Emissions to air	Water Discharges
Solid nen-hazardous waste	Solid Hazardous Waste
Consumption of natural resources/ Er	gy Noise
Heat	evor .
Dust	/tb-arion
Effect on visual / aesthetics	Use of the one depleting substance
Use of radioactive / nuclear material	Spillage of Lambicals

For identification of environmental aspects and impact, each process/activity/equipment is assessed for its inputs and outputs. The inputs can be raw materials, utilities, energy etc. The output can be atmospheric emissions, liquid effluents, noise, hazardous/non-hazardous wastes, vibration etc.

The inputs, outputs, environmental aspects, their associated impact and controls are recorded on Environmental Aspect & Impact Assessment Form (SSGC-IMS/CRM-F-02).

MR

# b. Control of Aspects having Significant Environmental Impact:

The significant environmental risks require control measures to eliminate or reduce the impact to a tolerable level either by establishing objective or through application of controls by considering the 4R methodology i.e.

Some of the suggested operational controls are listed below:

- a. Design of environmental friendly processes/operations.
- b. Isolation or enclosure of hazardous material storage, process or noisy equipment.
- c. Mechanical exhaust systems/booths for controlling toxic materials.
- d. Replacement of potentially unsafe equipment or machinery with new equipment/machines that meet environmental standards.
- e. Electrical or mechanical safety interlock, guards, indicators.
- f. Safety deces (Relieve valves, NRVs, indicators etc.), measuring or monitoring sevices/gauges, computerized feedback monitoring and control systems.
- g. Environment nep v disposal or treatment systems etc.
- h. Fire prevention/s ppression systems.
- i. Containment walls...
- i. Scrubbers.
- k. Dust Collectors.
- J. Other controls: Training, SOR

The record of operational controls on significant environmental risks is maintained on 'Environmental Aspect & Impact Assessment Form (SSGC-IM 1/1714-F-02).

After identification of aspects and asserting of impacts, it is sent to HSE&QA Department for reviewing adequacy and correctness. Where required in-charge HSE&QA suggests necessary changes or improvement in risk assessment to concerned on I HSE Team Leader.

Zonal HSE Team Leader ensures that environmental aspects and impacts related activities/processes/equipment are kept current by conducting the a. Once every six months to update the information, and identification environmental aspects. (Use

SSGC-IMS/CRM-F-02 for recording new hazards and aspects)

- b. Carry out assessment, for new or changes in activities/process
- c. When there is a change in laws & regulations.

# d. IEE (Initial Environment Examination) / EIA (Environment input Assessment):

In addition to all of above assessments, SSGC will carry out IEE / EIA as required by regulatory requirements for new projects. It is the responsibility of corporate HSE&QA head/DMD/MD to ens new projects. the compliance for all

When combusted:

One liter of Diesel produces 2.68 kg of CO2

One liter of Petrol produces 2.31 kg of CO2

One MMBTU of Natural Gas produces 53.07 kg of CO2

Procurement

Integrated Management System

### Section 3 Permit to Work

I, Permit to Work (PTW)

A Permit to Work (SSGC-IMS/CRM-F-03) is needed for any routine/non routine activity (Conducted within permanent locations of SSGC) where the work could expose persons to specific hazards. PTW should be acquired and maintained in the zones where job/activity is carried out. Normally following activities require PTW:

- a. Task based Hot Work operation such as welding, brazing, cutting, grinding.
- b. Confined space working. (tank cleaning etc.)

- c. Maintenance Work on High Voltage electrical equipment.
  d. Any janitarial tervice involving Safety Risks such as work at height.
  e. Any Maintenance activity by any department/contractor which compromises critical safety system.
- f. Work involving interaction with asbestos.
- g. Work in areas who e there is a risk of exposure to hazardous chemicals or microorganisms.
- h. Any job/task/activity that it quires additional precautions.

  i. Any specific activity performed during development, modification and up gradation of SSGC's Vital Installations including SM (Valve Assembly/TBS/PRS etc.

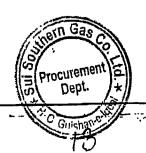

II. Exclusion

Following activities are not under the scape of PTW management, however the risk assessment, JSA and or process SOPs are implemented to conthe associated risks for the following:

- a. Providing Gas connections to new c
- b. Emergency Response to Consumer ca
- c. Planned enhancement of Distribution network
- d. Work on live pipelines like hot tapping, insta vice Tee etc.
- e. Any major/minor rehabilitation/reinforcement wo

If it's UNSAFE!

- ✓ Report it
- ✓ Remove it
- √ Replace it

# III. Responsibilities

S No.	Functions	Details	Responsibility
1	Executing Authority	The department intends to carry out the task / activity that requires PTW.  Situation may arise where Executing Authority is same as Area Authority (e.g. HQs).	Fill out the PTW form. Ensures that task/activity is carried out according to the SOP and controls are implemented to ensure safe operations.  Immediately report any incident happened during execution of job to In-charge HSE&QA.
2	Area Authority	A La/Facility where the task/scryity is carried out.	Authorize PTW and verify the compliance during the execution of task/activity:  Authorized to stop work in case of noncompliance to PTW requirements.
3	Contractor	The Individual/organization carrying out the Tana Activity on behalf of the executing department.	Liaise with executing department to ensure the controls are implemented as per requirement identified in PTW.
4		HSE&QA will identify the risk/hazards associated with the activity/task and propose controls. In Zones where HSE&QA representatives are not present, Zonal HSE team leader will officiate for HSE&QA responsibilities.	If required, Monitor the task activity during execution and identify my gaps related to proposed controls. Responsible to close the maintains records.  Authorized to stop work in case of noncompliance to PTW requirements.

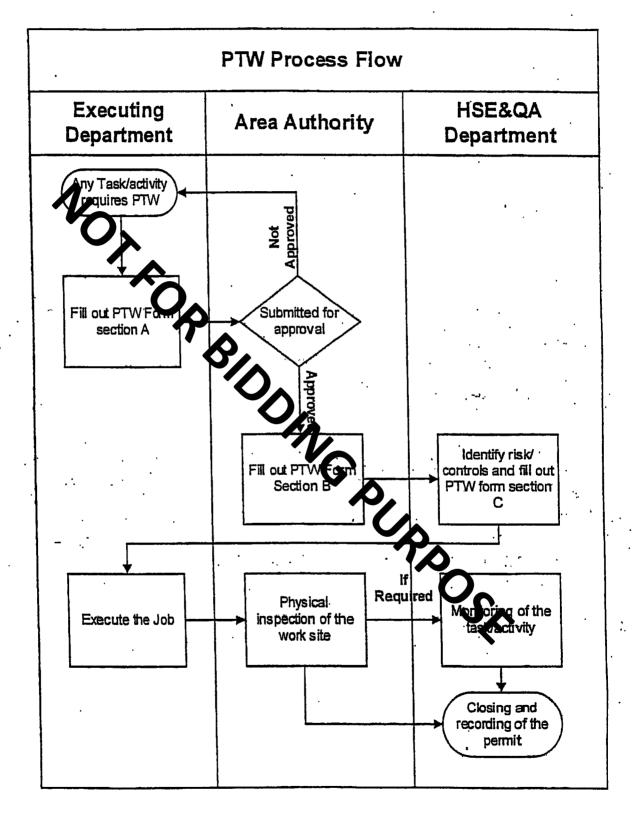

W

Procurement Dept.

Integrated Management System

14

#### IV. PTW Process Flow

- HandBook | February 2022

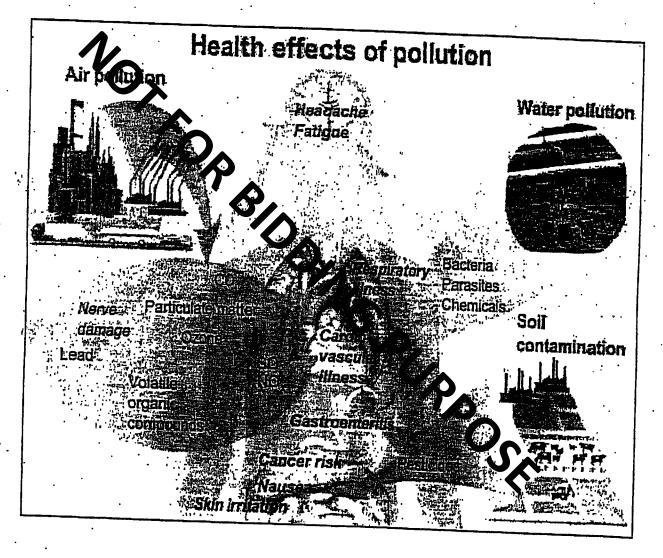

### V. Permit Display

Copy of the permit to work should be clearly displayed at the work site or in a location close to where the work activity is being undertaken. Executing department/contractors are also required to ensure that a copy of the permit to work is kept and made available upon request by Area Authority/ HSE&QA.

#### VI. PTW Closure

Once the task/activity is completed the PTW form is returned back to HSE&QA/Zonal HSE team leader for closing and updating the records. A new PTW is required if the task/activity is not completed within stipulated time frame mentioned on PTW.

NP

# Section 4 Job Safety Analysis

I. Job Safety Analysis (JSA)

Job safety analysis is needed for any routine/non-routine activity (Conducted outside permanent locations of SSGC i.e. Field Locations) where the work could expose persons to specific hazards. Normally following activities require JSA (SSGC-IMS/CRM-F-04):

a. Work on live pipelines like hot tapping.

- b. Any major/minor rehabilitation/reinforcement/maintenance work on existing distribution/transmission network.
- c. Installing service connection for new schemes. (Blanket JSA may be carried out for each scheme).
  d. Any Emergency maintenance work.
  e. Any particular Johnactivity requiring JSA as necessitated by HSE&OA

activity requiring JSA as necessitated by HSE&QA.

#### II. Responsibili

S No.	Functions	Details	Responsibilities
1	Activity In- charge/ Supervisor	Individual who is assigned to carry out the task/activity requiring JSA.	List down the activities step wise and identify hazards and their controls     Ensure that task/activity is carried with proposed controls     Ensure the team/equipment involved are competent and safe     Report any untranged in the time.
2	Head Of Executing Department	Head of the department who is authorizing the task/activity requiring JSA.	Report any untoward situation  Authorize JSA  Ensure Adequate resources are provided to carry out the last factivity in safe manner.  Select Empetent team and team leader to the activity/task.  Submit ac prof JSA prior to job execution to SPCOA/Zonal HSE.  Team Leader 8
3	Contractor	The Individual / organization carrying out the Task/Activity on behalf of the executing department.	Liaise with executing department to ensure the controls are implemented as per requirement identified in JSA

MR

### Section 5 Management of Change

I. Management of Change (MOC)

The purpose of this document is to provide all SSGC employees with instructions on Management of Change (MOC) process. Any changes that may affect quality, operations, safety, or the environment will be adequately assessed and must be approved by management or a designated representative of manage-

Risk Assessment for any new project, major modification in existing design /facility/ installation will be carried

II. Scope

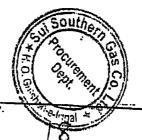

This procedure is intraded to address those changes which may have a direct impact on SSGC's Integrated Management System, or assubsequent delivery of services.

To make sure that changes are ssessed and documented in a consistent manner so that:

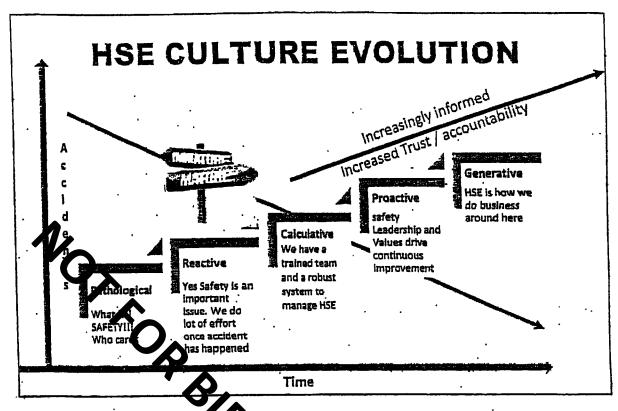

- a. Unnecessary or counterprodu changes are prevented.
- b. Changes do not adversely affect safety, the environment, quality, operations, or the level of service to the
- c. No changes are made by individuals without knowledge and/or agreement of all relevant parties.
- d. A record of the assessment rationale and change assessment process is produced.
- e. To make sure proper change out of employe ring operations is addressed.

III. Responsibility

- a. MOC Owner: MOC owner is responsible to fill out the (SSGC-IMS/CRM-F-05) which briefly describe the detail (Sope of the project. samated section of the MOC form
- b. Area Authority: Area authority is responsible to identify the poss place. Generally geographical head/zonal HSE team leader is considered the area authority. e impacts of the change that is taking
- c. HSE&QA Department: HSE&QA Department is responsible to authorze in change after assessing the

#### IV. Definition of Change

٣.

For the purpose of this procedure a "change" is an alteration to Processes;

- a. Documented information maintained by this M
- b. Equipment, hardware, software, infrastructure.
- c. Personnel assignments and training.
- d. Vendor selection and management.

Other types of changes not listed above can be related to any elament of the process, such as inputs resources, persons, activities, controls, measurements, outputs,

Note: Not all alterations to a system require the Management of Change Pracess (MOC) (e.g. changing employees, editorial changes to HSE & QA procedures and forms, etc.)

#### V. Levels of Change

#### Level 1

a. Change which has limited or no effect on deliverables, operations, safety, work environment, etc.

#### Level 2

b. Changes to equipment, procedures and employee assignments that have a moderate impact on deliverables, operations, safety, or work environment.

#### Level 3

c. Changes to equipment, procedures and employee assignments that have a major impact on deliverables, operations, safety or work environment.

- HandBook | February 2022 .

#### VI. Change Procedure

Step 1 - Initiation of Change

Any employee or contractor that becomes aware of a need for change can initiate the MOC process. The originator will notify their immediate Supervisor/Manager, detailing the proposed change on the MOC form (SSGC-IMS/CRM-F-05). With concurrence by their Supervisor / Manager, the MOC form shall then be forwarded to In-charge HSE&QA for review.

### Step 2 - Review by in-charge HSE&QA

In-charge HSE&QA will review the MOC request for potential operational impact, cost/benefit analysis, and associated risk, with input from the appropriate process owners (Moderate Impact) and/or SSGC top management (Major Impact), as appropriate to the change under consideration. Changes that have negligible impact may be processed by the Management Representative directly.

If the request is accepted, in-charge HSE&QA will detail any actions deemed necessary to control the impact of the change and for level the request to the appropriate process owner for implementation.

#### Step 3 - Implementation of All his

The process owner will be responsible or implementing and coordinating the actions required for the proposed change. If it is determined that further assessment is required during the course of implementing the change, these assessments will be documented and submitted for review prior to completing the change process. Only after all assessments have been reviewed and the MOC process be continued and monitored through completion.

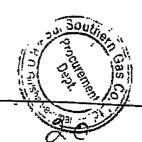

#### VII. Closing out the MOC

The th-charge HSE&QA will review the satisfactory implificant attention of the proposed change, and effectiveness of any corresponding control measures.

#### VIII. Record Keeping

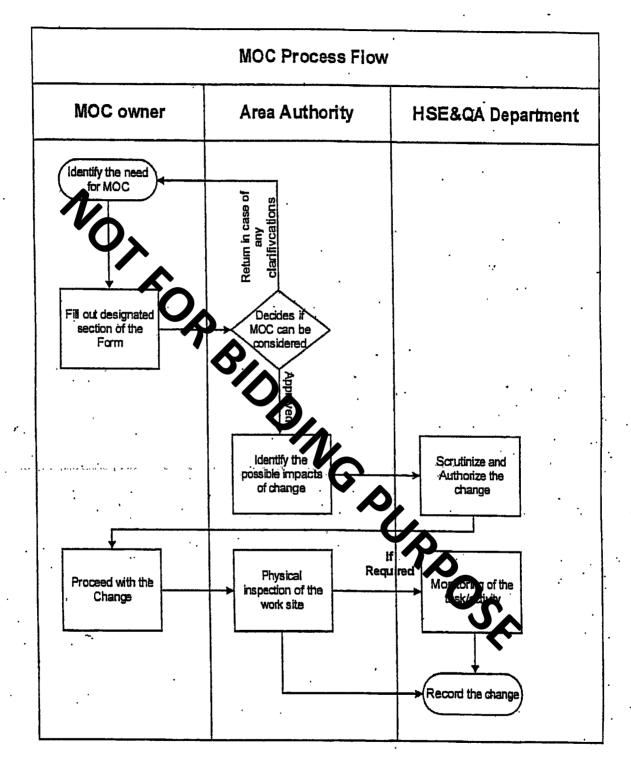

The In-charge HSE&QA will retain a log showing each MOC (Control Yunger of Log) and file the initial MOC request (SSGC-IMS/CRM-F-05) with all information supporting the action taken throughout the MOC process. These records shall be maintained for a minimum of 3 years.

N

#### **MOC Process Flow**

NR

HandBook | February 2022

7. TYPICAL SSGC OPERATIONAL HAZARDS AND THEIR POSSIBLE CONTROLS Some of the common Hazards related to SSGC operations are tabulated below and may be used while doing Risk assessment. There might be other hazards related to a particular activity/ operation or process. These hazards should be identified accordingly along with possible controls.

#### 7.1. PHYSICAL

Hazards ***	Control Measures
Adversa vesther	Shelter, personal protective equipment (PPE; cold / wind / rain-proof).
Poor / Bad housekeeping	Improved safety attitude, good management, safety inspection, good work layout.
Contact with hot / co a surfaces	Insulation, guarding, PPE (gloves, face shields, insulated clothing).
Drowning	guarding, lifesaving equipment, presence of first Aider
Excavation work	Hydron barriers; fencing, shoring, safe system of work, signs, cau, on lare.
Fail from height	Edge protertion; safety lines / harnesses, safe means of access, (e.g. 92 ffolding), safe system of work (e.g. permit to work).
Fall of material from height	Alternative storage, physical means of securing.
Lighting 1.	Good work area design and lighting equipment, measuring of illumination (LUX level), approximate lighting.
Awkward lifting while laying pipes in trenches	Define weight limits, use mechanical reseas for lifting and laying of pipes.
Noise	Reduction at source, insulation, PPE
Slips / Trips / Falls on same level	Good maintenance of work areas, good housekeeping, good cleaning, good footwear.
Stacking	Good work area layout, height limits, weight limits, strong packing, mechanical assistance.
Vibration	Elimination or reduction at source, damping, insulation, PPE.

### 7.2. MECHANICAL

Hazards	Control Measures
Hand tools	Periodic inspection, electrical testing and maintenance
Machines	Periodic inspection, testing, and maintenance, physical barriers (guarding), safety interlocks, supervision and training:
Mechanical lifting operations	Periodic inspections, maintenance, supervision and training.
Manual andling	Regular assessment of handling techniques (Improvisation to eliminate stress / fatigue; training in good lifting techniques:
Moving vehicles	Good road layout within premises, proper signs, vehicle maintenance, speed limit, enforce SSGC driving policy, defensive driving classes.
Over Pressure	oper identification of pressure vessels, preventive maintenance, pressure indicators, alarms, PRV's where required, periodic in the circu.

# 7.3. ELECTRICAL

Hazards A	Control Measures
Live working	Avoid (i.e. No Live Working) use competent / trained staff.
Hand tools	Regular inspection, testing a electrical integrity and replacement. (where appropriate).
Heaters (elements)	Isolate from combustible material, see ling.
Machines / Electrical cables	Electrical testing and maintenance, good electrical safety design, periodic inspection for design load vs actual or douse of circuit breakers, lockout / tag out, anti-static materials, Use double insulation, proper grounding.
Electrical cables / cords	Use factory assembled cords, always use plugs, no naked wires.
Power Lines (Overhead / Buried)	Look out for signs, contact local utilities (KE WAPDA) for locations, stay at least 10 feet away from overhead lines, use proper PPE.

MP

integrated Management System

23

### 7.4. FIRE

Hazards	Control Measures
Combustible materials	Avoid, reduce storage of combustible materials, isolate from sources of heat and ignition.
Flammable gases	Storage of gas cylinders (e.g. hydrogen, acetylene) outside in an isolated, well-ventilated area; signs, no smoking, color-coding.
Flammaiale solvents	Controlled storage, use and disposal (e.g. limit quantities held), fire proof storage, signs, no smoking, no naked flames, emergency plans.
Heaters	Segregation from sources of combustion, guarding special construction if used in hazardous areas.
Oxidizing agents	Chemicals that are a source of oxygen, e.g. hydrogen peroxide, segregate from sources of combustion(e.g. flammable solvents)
Oxygen (gas and liquid)	usage.
Smoking materials	Definated smoking areas with proper ventilation, promote no smarting colley.
Static electricity	Limit se o static generators in hazardous areas. Use of anti-se static devices, earthling
Gas Leaks	Odourization to the ely detection where possible, proper joining methods, Field autory, training, leak detection techniques.
	is a detection techniques.

#### 7.5. \*\* OTHER

Hazards	Con Objectures
Chemical: Chemical substances, Corrosives (acids, alkalis), Carcinogens, Irritants (e.g. Ammonia)	Avoid use, substitute less harm 4 edictances, use, maintain and test engineering controls, monito to hazardous substances; inform and train employees, use pers na protective equipment (PPE), emergency plans for uncontrolled express.
Biological: Biological agents (micro-organisms, pathogens) mutagens, carcinogens) Rodents, Snake Bite	Avoid: use, substitute less harmful substales one maintain and test engineering controls, monitor for haza dous substances, inform and train employees, use personal protective equipment. (PPE); emergency plans for uncontrolled releases. Periodic rodent control drive, identification and elimination of snakes and other harmful reptiles specially in remote locations of SSGC.
Food / Water safety	employee information and training, good personal hygiene, protective clothing. Testing if required from accredited lab (AKUH, PCSIR), Involve canteen contractors, c redibility of product/Services.
Ergenomics	Educate / Train employees: avoid repetitive tasks, procure ergonomically design products (e.g. chair, Computer desk.)

**SWOT** Analysis

Issue Date: July, 2021

PASTIME	
STRENGTHS	WEAKNESSES
Having vast experience of Transmission and Distribution of Natura Sas.	Complex distribution network leading to UFG.
Infrastructure available in vo provinces.	Substantial resources required for up gradation.
Highly competent human resource.	Lack of succession planning.
Certified to international standards.	Takes extra time to implement all requirements because of big size of the organization.
Sole Meter manufacturing plant in Pakistan.	High price.
Serving the nation since decades.	overnment new rules implementation.
Positive image of the company is already established in the Society.	Recource transfers.
OPPORTUNITIES	(IF) REATS
Monopolistic market.	Depleting natural tal.
Over 2.8 million customers.	Customers may turn to renewable energy sources.
Import of LNG.	High cost.
Huge infrastructure of Transmission and Distribution to connect new customers.	Gas theft and leakages resulting in huge loses.
Reduction in the lead time to facilitate complainant.	Change in Government policies.
Advancement and use of latest technology to control the system will create more effectiveness.	Criminals threats on security.

Integrated Management System —

MR

37

### 1. PURPOSE

The purpose of this document is to define a mechanism of incident and near miss reporting investigation & propose corrective/preventive actions against near miss, incidents and accidents.

### 2. SCOPE

This procedure is applicable to all incidents (i.e. accidents & near miss) which take place within SSGC premises or outside SSGC premises i.e. its installations or work -related sites which are under the scope of management system.

"Anything that can go wrong, will go wrong"

3. DEFINION

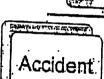

a. Incident We it related event(s) in which an injury or ill health or property day lage (regardless of severity) or fatality occurred, or could have occurred.

b. Accident: An incident in which an injury or illness or property damage action years.

c. Near Miss: A Near Miss is an unplanned event that did not result in an injury or parenty damage, but had the potential to do so.

d. CPR: Cardiopulmonary resuscita op

e. Emergency: An emergency is a situr for that poses an immediate risk to health, life, property, or appronment.

CORRECTIVE

#### 4.3. Investigation and Corrective Action

Incidents are investigated by the team constituted by In-charge HSE&QA. If required, a cross functional team may be formed. Depending upon the situation, Incharge HSE&QA will decide whether to investigate or not any major/minor incident/accident, considering following factors:

- a. Severity of the incident/accident.
- b. Time lapse between reporting of the incident and the actual occurrence of the incident.
- c. Lack of supporting information.

- will be conducted as soon as possible after the incident, following the b. Investigation activities required controlling the hazard.
- When indicated by the siverity of the incident, steps to secure the incident site must be initiated immediate pasure that investigating party can reconstruct the events leading to the incident.
- d. Individual interviews will be sanctioned with each person present at the time of the incident. The following rules are interviewed for interviews with all individuals:
  1. The witnesses should be interviewed promptly, separately and privately.
  2. The interviewer should avoid questions that give a yes or no answer.

  - 3. After the interview, the interviewer should document any concerns identified.
- e. The investigation will be focused at determining the root cause and therefore:
  - 1. The investigator or investigating team must focus on getting accurate and complete information.
  - 2. Facts must be separated from opinions, and green evidence from circumstantial evidence.
  - 3. Each concern identified in the investigation must be full payressed.
- f. Upon completion of the investigation, the team will fill and sub nit be Online Incident Investigation Form (SSGC-IMS/IAM-F-02). It includes Background internation, Root Cause Analysis, Conclusion and Recommended Corrective / Prevent
- g. In all cases, the incident investigation must be completed within 07 working days from the incident notification date. Depending upon the nature of investigation, in-charge HSE&QA may extend the report submission timeline.
- h. Determination and implementation of viable corrective/preventive actions to eliminate the causes of incident.
- i. In-charge HSE&QA / Zonal HSE Team Leader ensures that the corrective/preventive actions assigned to concerned department/personnel, to be completed within agreed time frame.
- It is responsibility of the Zonal HSE Team Leader to:

- 1. Provide leadership role in implementation of corrective/preventive actions within the agreed timescale.
- 2. Ensure that corrective / preventing actions are effective in eliminating / reducing the risks.
- 3. Maintain record of Incident Notification Form and Incident Investigation Form of their respective zones.

### 4.4. Updating of Assessment

After the incident, depending upon the nature of severity and risk, the assessments (risk assessment, environmental aspect impact assessment) of specific activity / department will be to dated including controls, risk level, likelihood etc.

### 4.5. Date An lysis and Review of Actions

The data of incider's will be evaluated and investigation outcomes will be shared with the management during management review meetings to seek advice and to discuss the effectiveness of measure mactions implemented.

#### PURPOSE

The purpose of this procedure is to define a frame work for identification of emergency situations which arise in company operations and for developing emergency preparedness and response plans to mitigate and manage risks arising from such situations or events. The Procedure defines

requirements for business continuity planning post emergency situations to bring the business on-line.

Purpose of the procedure is to

- Formulate plan, responsibilities and actions to be taken to handle any emergency situation.
- Identify potential emergency situations and response plans to minimize b. or avoid actual & potential hazards of any emergency situation.
- echanism and frequency to test plan so as to ensure preparer ) ss and effectiveness of emergency response system.

#### 2.

This procedure is applicable all locations of SSGC, its employees and any visitor physically present at the location of emergency site. The to variations in nature of operations, various departments/sections have developed their own ER Plans ratering for their strategic, operational and physical requirements. The same includes HSE emergencies ansign in incompany's day to day operations in terms natural calamities, fire, major incidents with loss in our operations, major environmental damage, external terror or bomb threats, public unrest,

#### DEFINITIONS.

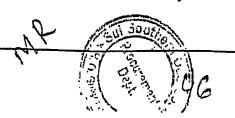

- Emergency Situation: An abnormal situation that calls for immediate and urgent actions for safeguarding life of persons, protecting buildings, machines, discinstallations and other assets.

  Rescue: It refers to responsive operations that visually involve the saving of life or prevention of injury during an incident or dangerous situation.
- Emergency Response Organization (ERO): It is a group of people, in each section (such as HO, Headquarters etc.), who prepare for and respond to any er en ency incident, such as a natural disaster or an interruption of business operations.
- Emergency Response Centre (ERC): It is a room suitably equipped to handle any potential emergency situations. All emergencies are to be reported here.
- First Aid: It is the provision of initial care for an illness or injury. It a pully performed by non-expert, but trained personnel to a sick or injured person until definitive medical treating in can be accessed.
- Assembly Areas: If an evacuation to the outside is appropriate, the no righted assembly areas for personnel shall be far enough away from the building, structure or worked ce to ensure that, where f. practicable, everyone is protected from falling glass and other objects.
- Emergency Evacuation: It is the immediate and rapid movement of people away from the threat or from the place of the hazard.

#### **RESPONSIBILITIES**

Responsibilities for the particular department/personnel are identified in the response plans prepared by various departments and sections. General responsibilities for Emergency response organization are as under:

- Rush to the area of incident without any delay.
- Immediately assess the situation and initiate the remedial actions. b.
- Call the fire brigade & other emergency services like ambulances if required. C.
- Ask/inform all personnel present within premises, using megaphone or any other means, for complete d. evacuation if situation goes out of control.
- Inform all to go back to their work places using megaphone or any other suitable means when the situation e. comes under control and the area is free from any hazard.

- HandBook | February 2022 💃

#### 5. PROCEDURE

The HSE&QA In-charge and department heads shall ensure that all emergency situations are identified during risk assessments performed and emergency response plans are implemented within the departments. They shall also ensure that all employees are made aware of their emergency situations and how to respond during a real emergency. They shall ensure that employees including emergency team members in their respective departments are trained to respond to emergencies and mitigate risks arising out of real emergencies. Some of the potential emergency situations that might occur in SSGC along with the response plans are listed below. Sequence of actions for any response specified on each section's ER plan may change depending upon the emergency situation.

#### 6. Emergency Considerations

The following areas of needs to be given consideration while identifying potential emergency situation but the same need of the limited to these areas:

- Fire & Fire
- Heavy Sp lage of Toxic/flammable chemicals or leakage of gas.
- Heavy rain/ 1100
- Earth quake
- Bomb threat
- Building & office lockd wn/ helter in place
- Active shooter/hostage slape

#### 6.1. Fire & Explosion

In case of fire & explosion each personne present within the premises must act as per but not limited to the following in truth ions:

- a. Give voice alarm-FIRE! In case of fire for all translate employees in the area.
- b. Push the nearest located call point button in the of fire (if present):
- c. Immediately inform Emergency Response Organization through phone or in person.
- d. Try to control the fire by using fire extinguishers. Use file extinguisher worly if you have been trained.
- e. Remove all explosive, inflammable and poisonous matters sway to the maximum possibility.
- f. Shut off main valves of gas and circuit breakers.
- g. Stay away from the fire in case it is not controllable.
- h. Report to the designated Assembly Point away from the scene of fit semplosion if asked by Emergency Response Organization through emergency exits and wait for the further instructions.

### 6.2. Heavy spillage of toxic/flammable chemicals or leakage of

In case of heavy spillage of toxic/flammable chemicals or heavy leakage of Gas each personnel present within the premises must act as per but not limited to following instructions:

- a. Immediately inform Emergency Response Organization through phone or in person,
- b. Eliminate all ignition sources (sparks/flames/heat) from the immediate areas.
- c. Turn off gas supply from nearest control valve...
- d. In case of gas leakage in confined space, proper measures (opening windows, doors etc.) should be taken to ventilate the gas: Ensure the availability of fire extinguishers.
- e. Stop leaks if this can be done without having any risk.
- f.. Do not touch or walk through spilled material.
- g. Prevent entry into waterways, sewers or confined space.
- If available wear the Personal Protective Equipment recommended.
- Arrange immediate cleaning of spilled chemical by taking suitable precautions

## 6.4. Earthquake

In case of earthquake shocks each personnel present within the premises must act as per but not limited to the

- Immediately inform Emergency Response Organization through phone or in person. b.
- Immediately Evacuate to Assembly Areas (in open space where you can keep distance at least one half C.
- Shut off all switches and valves of main supplies of gas and electricity. (If possible) d.
- Maintain your senses, do not let them disperse.
- Protect yourself by sitting on side of tables, furniture & under strong structures. Be aware of falling walls, e.
- Stay away from loosely hanging objects that may fall after initial shock and tremors. f. g.
- Wait for further instructions from Emergency Response Organization.
- ERO should keep in touch with the metrological department / media for aftershocks and future forecasts.

- e. The Bomb Disposal Department shall be allowed to operate in the company premises as deemed appropriate.
- f. On getting clearance from Bomb Disposal Department normal routine shall be adopted as advised by Emergency Response Organization.

#### 6.5. Bomb Threat

In case of bomb threat each personnel present within the premises must act as per but not limited to the following instructions:

- a. Immediately inform Emergency Response Organization through phone or in person.
- b. Maintain your senses, do not let them disperse.
- c. Report to the designated Assembly Point if asked by Emergency Response Organization through emergency exits and wait for the further instructions.
- d. Bomb Disposal Department shall be called by Emergency Response Organization.
- e. The Bor Disposal Department shall be allowed to operate in the company premises as deemed appropriate.
- f. On getting clearance from Bomb Disposal Department normal routine shall be adopted as advised by Emergen y Response Organization.

## 6.6. Building or office Lockdown/shelter-in-place

If a situation calls for building troffice lockdown, the personnel present within premises should act as per full pit limited to following instructions:

- a. Remain calm and stay with the colleagues.
- b. Try to stay in pairs.
- c. Do not leave the room and/or build under a lockdown situation until asked otherwise.
- d. . Keep quiet and away from doors and and was
- e. If a gunshot is heard, lay down on the new shield under/behind furniture as much as possible.

#### Take care:

Don't try to be a hero in emergency situations; do not place your own life on health or that of others in danger

Be prepared for the

#### 6.7. Active Shooter/Hostage Situation

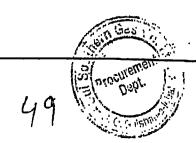

In case of shooter/hostage situation each personnel preservithin the premises must act as per but not limited to the following instructions:

- a. If it is safe to do so, exit the building; if not, lock or barricade year elf inside a room.
- b. Turn off lights, cover and lock the windows, and lay on the floor
- c. If the shooter(s) leave the area, go to a safer place, if possible. Place in scape route/plan in mind, keep your hands open and visible, and follow any instructions given by law entit certaint.
- d. Call the Police/Rangers when it is safe to do so. Remain calm, use a safet voice, and provide as much information as possible (your name and location, details about the shootens) peparance, weapons, etc.). If you can't speak, leave the line open so the responding authority can listen and provide as much information as possible (your name and location, details about the shootens) peparance, weapons, etc.).
- e. Cooperate and negotiate with the shooter, in order to buy as much time as positive until the rescue team reaches.

#### 7. EMERGENCY NUMBERS

In consideration of the emergency numbers to be included in the emergency plan, the following should be taken into account:

- Fire brigade/civil defense or equivalent.
- Police.
- Ambulance service.
- Hospitals/Clinics.
- Mutual aid agreements/neighbors.
- Environmental protection agencies.
- Key company personnel.

#### **EVACUATION**

All Emergency evacuation routes/doors should be accessible at all times. No hindrances should be placed in the route. All employees should be familiarized with the evacuation routes of their premises.

All employees should immediately evacuate their premises and assemble at the assembly areas (identified by each section). During evacuation following instructions should be followed.

- Take only keys, wallets and essential belongings with you. b.
- Leave the building/premises immediately, do not try to investigate the source of the emergency. C.
- Walk, don't run, to the nearest exit.
- d. Use stairs, not elevators.
- Assist people with special needs. e.
- f. As you make your way out, encourage those you encounter to exit as well

## BE EVACUATED

In case of em nc evacuation should be carried in the following order: 9.1. Personnel

Those personnel who de not have sound health such as patients of Heart, Asthma and physically/mentally 9.2. Raw Material

Raw material which is explain , inflammable and poisonous must be removed. Similarly, important lightweight items that are easy to cappust also be removed. 9.3. Documents

Important records and files must also be

#### 9.4. Equipment

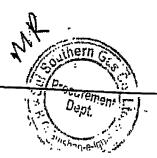

Cash Lockers, Computer Sets, External Hard dis Expensive Tools and Fixtures must also be removed.

## 10. TESTING AND EXERCISES

Testing and exercise of the emergency response plan should be conducted at each location of SSGC to evaluate the effectiveness of the preparedness plan. The economic and observations of the exercise should be recorded on Emergency Drill Form (SSGC-IMS/ERP-F-01). Each section should nominate the person who is responsible to periodically conduct the exercise. The

frequency and type of drill at each location should be as below:

Location	Type of Emory	
<ul> <li>a. Head Office</li> <li>b. Regional Offices</li> <li>c. Billing Offices</li> <li>d. P&amp;C Offices</li> <li>e. Store (all locations)</li> </ul>	Evacuation and Mock Emergency Drill (all employees)	Frequency Six Monthly
f. KT (Transmission) g. Distribution (Zonal and Sub-zonal offices)	Fire Fighting Drill by Emergency Response Team	Six Monthly

Meter Manufacturing	Evacuation and Emergency Mock Drill (all employees)	Six Monthly
Plant	Fire Fighting Drill by Emergency Response Team	Quarterly
llandaria Ctationa	Evacuation and Emergency Mock Drill (all employees)	Six Monthly
Headquarter Stations	Fire Fighting Drill by Emergency Response Team	Monthly

#### 11. AVAILABILITY AND MAINTENANCE OF ER EQUIPMENT:

Zonal HSZ feam leaders ensure that emergency detection and response equipment are identified, available and proper projectained in their respective zones. A joint inspection will be carried out periodically to verify the efficacy of ER Entipment. The record shall be maintained on Inspection and Monitoring of ER Equipment Form (SSGC-IMS/FXX)-F-02). Each zonal HSE team leader shall maintain record of their respective zone and share with In-charge HSE&QA as and when required. The need for the emergency response equipment is determined by considering the hazards and associated risks with the particular location/operation/equipment/installation etc. The response equipment usually include but are not limited to:

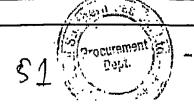

- a: Fire extinguisher.
- Fire hydrant/hose/bucker/valer gump.
- c. Smoke/gas detectors.
- d. Communication equipment. (Na a hones, Alarm systems, walkie-talkie etc.)
- e. First aid box. . .
- f. ER vehicles/Ambulance.
- g. Breathing apparatus.
- h. Emergency lights.
- i. Hammer/Axe/shovel/ropes etc.

Frequency of inspection and monitoring of ER Equipmen will be as per table given below. However, if situation warrants, this frequency can be changed on the instructions of p-charge HSE&QA or Zonal HSE team leader.

3.	Location	- Frequency
.a.	Head Quarter Stations	74
·b.	Meter Manufacturing Plant	Monthly
c.	K.T (Transmission)	
a.	Head Office	
b.	Regional Offices	
c.	Billing Offices	Quarteriv
d.	P&C Offices	Quarterly
e.	Store (all locations)	
1	Distribution (Zonal and Sub-zonal offices)
