If the bidder agrees for extending bid validity the bid bond shall also be extended accordingly. A bit der giving extension to his bid validity will not be required or permitted to modify his bid. If there will be any query/clarification or extension request asked by the Company, the bidder should reply the same within 7 days after receipt of the same and if bidder takes more than 7 days the delay in reply will be added to their bid validity period.

### 8. Rate Escalation:

### 8.1 All items except line-pipe:

Quoted prices shall remain valid, firm, irrevocable and fixed till the fulfillm at o obligations by the bidder and will not be subject to escalation / change on any account.

### 8.2 Line-pipe only:

- 8.2.1 Bidders are essentially required to submit detailed breakdown of rates indicating per ton price of:

  a) H.R. Coil.
  - b) All other charges (including wastage, transportation, conversion cost etc).
- 8.2.2 Rate / price offered by the bidders shall be firm and irrevocable. However bidder offering pipe manufactured from Pakistan Steel Mills (PSM) HR coil are required to submit certified documentary evidence of HR coil rates. Adjustment in line-pipe rates (from the bid opening date till the currency of order) due to change in rate of HR coil manufactured by PSM is admissible to the extent of raw material cost without wastage. The bidders are required to submit certified documentary evidence of HR coil rates published by PSM, at the time of submission of bids. SSGC may verify the document / rates from PSM.
- 8.2.3 The variation clause however shall not be applicable on line-pipe quantities which were delivered within 20 days of the announcement of the variation (both days inclusive) in price of HR coil by PSM.

- The variation clause also shall not be applicable on the line pipe quantities delivered after the specified delivery schedule (total or monthly consignment wise)
- No escalation is applicable on line pipe manufactured from imported HR coil.

### 9. Bid bond (earnest money):

Bid bond equivalent to two percent (2%) of the total offer value, in favor of Sui Southern Gas Company Ltd. shall accompany the bid if bid value is above Rs.500,000 in the form of pay order, demand draft, call deposit receipt or a bank guarantee (specimen of bank guarantee is attached at Amexure-A), issued by a scheduled bank in Pakistan. The bid bond shall remain valid for 120 days (150 days in case of Two Envelope bidding procedure) unless specified otherwise. The bid bond shall be returned/refunded to the unbidders while the bid bond of the successful bidder shall be retained, till submission of hand (if applicable). Bids without bid bond will not be considered. In case the order value is 0,000 the bid bond in lieu of performance bond will be retained till fulfillment of obligations was explier. However, in either case the bidder is responsible to arrange the extension the bid bond validity as per requirement. If bid bond submitted by the supplier is more than 2% of ordered value, it may be replace with appropriate value. If order value is less than Rs. 500,000, the bid bond will be returned along with the order. Bid bonds of non-compliant bidders may be released during evaluation process. The bid bond may be origined if a bidder withdraws the bid duringvalidity period specified by the bidder or if successful bidder

Accept purchase order,

Furnish performance guarant nccordance with clause 16 of Section 1,

Supply material as per require and delivery schedule.

9.1 In the event of bid bond validity follows In the event of bid bond validity following about of the prescribed period of 120 or 150 days as the case may be either (i) due to extension in the bic sub-hission date or (ii) where so required by the procuring agency, then in such an event it shall be manual the padder to extend the bid bond validity upto 120/150days within 30 days of the opening of technology hbposal / bid, and / or where so required by the procuring agency.

9.2 In the event of the bid security amount deposited / furnished by the bidder falls short by 10% of the requisite Bid security amount. The procuring agency keeping a visit the nature of the procurement may consider and allow the bidder to deposit / furnish the balance 1000 mount, provided the bidder o mount, provided the bidder does so within 15 days of the opening of the bid. Notwithstanding the ther terms & conditions have been fully complied with.

### 10. Opening of bids:

Bids will be opened in presence of bidders or their authorized agents at the address pr "invitation to bids". The bidder's representatives who are present shall sign the bid opening sheet (att spance sheet) to mark their attendance/witness. Commercial contents of bids will be announced/recorded in bid opening

### 11. Preliminary Examination of bids:

The Company will examine the bids to determine their completion, computational errors, provision 11.1 of guarantees, authorized signature and other related matters.

Arithmetic errors will be rectified on the following basis. Discrepancy between unit price and the 11.2 total price obtained by multiplying the unit price and quantity, the unit price shall prevail and the total price will be corrected. Discrepancy between total bid amount and the sum of total prices, the total prices shall prevail and the total bid amount will be corrected.

Prior to a composed evaluation, the Company will determine the substantial responsiveness of each bid to the bidding documents. In Company's opinion a substantially responsive bid is the one which conforms to all the terms and conditions of the bidding documents without any material deviation.

Pid determined as not substantially responsive will be rejected by the Company and cannot subsequently be a fine appointive by the bioder through correction of the non-conformity.

### 12. Clarification of submitted bids:

To assist in the examination, evaluation and comparison of bids, the Company may at its discretion inquire any clarification from bidder about their bid. All responses by bidders shall be provided in writing and no change in the price or substance of the bid shall be sought, offered or permitted.

### 13. Technical Literature & Samples.

The Bidder(s) shall submit the following.

- 13.1 Samples (if applicable/required)
- 13.2 Original or legible copy of technical literature/performance characteristics
- 13.3 Test Certificates (if applicable/required)

- 13.5 In case of pipeline operation material bidders must also attach a "proof from supplier/
  manufacturer, that goods offered have been used successfully on a high pressure natural gas pipeline
  else in regunder tropical climatic conditions.

### 13.6 Specification coupliance Sheet:

Company requires a clause-by-clause commentary on the Specifications, demonstrating the materials responsiveness to the specifications or a statement of deviations and exceptions to the provisions of the specifications, if so required/desired. For purposes of the commentary to be furnished pursuant to above, the bidder mall note that standards for workmanship, material and equipment and references to brand nature or estalogue numbers, designated by the Company in the specifications are intended to be descriptive only and not restrictive. The bidder may substitute other authoritative standards, brand names anchor cat legue numbers in its bid provided which demonstrates to the Company's satisfaction that the sit stitutes are equivalent or superior to those designated in the specifications by the Company.

Bid which does not possess above document, a rtificates etc., may be considered technically Non-compliant.

- 13.7 The offer shall be accompanied with all technical cat // scuments/certifications as required under the tender specifications. Evaluation shall be carried out of the basis of data/ documents/certifications submitted with the bid. No clarification, additional interpretation may be sought / accepted after bid opening.
- 13.8 Deviation to technical specifications:

The bidder shall fill the "technical compliance sheet" and mention officed specifications along with reference to its technical brochure/literature (page/clause No.etc). Cate are to such as "Compliant" or "Confirmed" is not acceptable. Deviation to tender terms and technical specification is not acceptable. However, if bidder feels to mention minor deviation, the total shall be referred categorically on the "Bid Form" as well as on the technical compliance sheet a atim reference of its technical data sheet/brochure. In case of insufficient information, data or document, the Company is not liable to seek clarification and the bid may be determined non-compliant or provided information.

### 14. Award/Evaluation Criteria:

- 14.1 In case of locally manufactured items e.g. service line material & meter components, manufactured by local vendors, the lowest bidder will be awarded maximum quantity as per his declared capacity and past performance in respect of delivery and quality. New vendors / manufacturers shall also be considered for placement of a purchase order up to a maximum of 10% of the tender quantity if their submitted sample has been tested and approved and provided they have quoted lowest price or agree to accept the order on lowest received price.
- 14.2 Generally for other items other than above, ordering shall be based on technical compliance and lowest quoted price. Supplies may be subject to pre shipment inspection and post qualification by a third party in case of foreign material. If required during the process of manufacturing and / or inspection, SSGCL representative may visit the manufacturer facility to witness the manufacturing / inspection process.

Procuremen Dept.

- Evaluation may be carried out both on item or on group of items/single or multiple package basis depending upon the nature of requirement exclusively at the discretion of the company to ensure
- 14.4 Company reserve the right to settle the final terms of supply with the lowest evaluated and commercially responsive bidder: Any effort by the bidder (s) to influence the outcome of bid evaluation or placement of purchase order may result in disqualification of the bidder.

### 15. Loading of Bids:

Bids may be loaded with following if offer found to be deviated from specifications, delivery schedule, terms & conditions without stating the amount involved in such deviation by following method:

- The cost of compensation / loading amount for that item shall be derived from the bid itself.
- If 15.1 is not possible, average of rates of other bidders, who have quoted for that item conforming 15.2 technical specification, shall form the basis for cost compensation/loading.
- company will encourage participation by local bidders who will be given price preference. cost factor shall be determined as per prevailing Government policy / SRO. However they net details of local value addition on raw material imported by them and percentage of locary my anactured component with documentary evidence.

The committee shall hold an independent inquiry/investigation as the case may be, and, which may include site visits and interviews with the parties concerned. The Committee shall complete the entire inquiry/investigation, preferably within a period of 30 days after receipt of response from the Person(s) / Firm(s) against whom proceedings under this Mechanism has been initiated and shall present the report to the Managing Director, SSGC. If required, the Committee may report the case to an appropriate law enforcement agency depending upon the nature of the case for detailed investigations with the prior approval of Managing Director, SSGC. iii. The Person(s) / Firm(s) against whom proceedings have been initiated under this Mechanism shall not proceed for arbitration/linigation during the proceedings for blacklisting.

## 8. COMMUNICATION OF DECISION

After prominent commendation for temporary & permanent blacklisting by "SSGC's Rights Protection Committee (PPC)", the Person(s) / Firm(s) concerned shall be informed within 10 days of such decision. The dicision of the Committee will be notified on SSGC 's and PPRA's websites and shall also be conveyed to Pakistan Engineering Council.

The temporary Black street on the grounds and reasons specified herein above shall be for a reasonable specified period of time and as a general rule of prudence, the period may not exceed three years, except in east, where debarment/blacklisting has been done by any other government department or at international Financial Institution (Donor Agency). In case the Person(s) / Firm(s) has been blacklisted by the government department or the International Financial

Institution (donor agency), the period of its property blacklisting/debarment shall be for a maximum period of 3 years or the time period for which the concerned government department/International Financial Institution (Jonor Agency) debarred the contractor (whichever is higher). However the permanent blacklisting cannot be revived.

Action after the Person(s) / Firm(s) are placed on Blacklisting List:

- i. The decision of blacklisting will be immediately circulated to all concerned as mentioned herein above under the heading Communication of Decision.
- ii, In case of a contract already awarded to a Person(s) / Firm(s) which has been blacklisted and termination is either not possible or not feasible, the concerned Project Authority may proceed in this case to complete the contract with the approval of Competent Authority. (iii) The blacklisted Person(s) / Firm(s) shall stand disqualified from bidding from the decision against them. Any pending bids shall also stand rejected. If a contract has already been awarded to Person(s) / Firm(s), it shall be voidable at the option of SSGC. (iv) A separate register or data base will be maintained for blacklisted firms indicating reasons and period.

## **PURPOSE**

The purpose of this procedure is to identify the context of the organization, assess the risks and opportunities and establish controls associated with all the activities undertaken by the company to address risks and opportunities for:

- SSGC existing facilities/installations.
- Any routine/non-routine activity, performed within permanent locations or b. outside permanent locations of SSGC, that requires prior permit/safety analysis to identify and mitigate safety risks.
- Anv new project. C.
- Covering all the activities performed by SSGC taking into consideration of compliance, obligations, risks & opportunities within the scope, external and internal issues related to scope of operations, requirements, information, pectations of relevant interested parties. needs ap
- Providing gada to employees in relation to hazard identification, risk e. assessment and rick control in respective areas.
- pitoring and management of environmental aspects Identification, control, f. and assessment of a impacts.

## SCOPE

This procedure is applicable to the interaction of occupational health and safety hazards and associated risks, environmental aspects and improve associated with activities, processes and equipment related to SSGC existing facilities/installations, any new project or any routine/non-routine activity; performed within permanent locations or outside permanent or of SSGC, that requires prior permit/safety analysis to permanent locations or outside permanent identify and mitigate occupational health and

#### **DEFINITIONS & ACRONYMS** 3.

- HAZARD: Source or situation with a potential including in terms of injury or ill health, damage to property, damage to workplace environment, or a combination of present and the resulting HAZARD: Source or situation with a potential in
- b. consquences:
- OPPORTUNITY: Opportunities can arise as a result of a surition favorable to achieving an intended C. result, for example, a set of circumstances that allow the organization to attract customers, develop new products and services, reduce waste or improve productivity. Actions address opportunities can also include consideration of associated risks.
- SWOT: Strength, Weakness, Opportunity & Threat. d.
- RISK MANAGEMENT: The set of control measures used to reduce or entire measures. specific risk.
- Lification. This is the RISK ASSESSMENT: Risk Assessment is a systematic approach to hazara f. overall process of estimating the priority of risk and deciding significance of risk,
- RISK ASSESSMENT METHODOLOGY: Risk priority shall be defined by the risk nent matrix. g. Hazards related to applicable legal requirements will fall in the high risk category.
- HIRA: Hazard Identification and Risk Assessment.
- EAIA: Environmental Aspect and Impact Assessment.
- IEE: Initial Environment Examination.
- EIA: Environment Impact Assessment. k.
- ILL HEALTH: Identifiable, adverse physical or mental condition arising from and/or made worse by a work activity and /or work related situation.
- OHS&E: Occupational Health, Safety & Environment. m.
- PTW: Permit to Work. n.
- MOC: Management of Change. o.
- MOC Owner: The employee who initiates the MOC. p.
- JSA: Job Safety Analysis. q.
- EXECUTING DEPARTMENT: It refers to the department performing the work or is responsible to get the work done through contractor.

# RESPONSIBILITIES

# 4.1 Corporate HSE&QA In-charge

- Managing OHS&E risks and their controls.
- Reporting to Senior Management on OHS&E related issues. b. C.
- Providing support to corporate HSE&QA team and zonal representatives. d.
- Liaise with zonal HSE team leaders/HSE&QA representatives for implementation of this procedure.

# 4.2 Zonal HSE team leaders

- Carrying out HIRA, providing and utilizing resources to identify and review OHS&E risks and implementing their controls in consultation with corporate HSE&QA team. b.
- Ensuring that employees, contractors and visitors have sufficient knowledge related to OHS&E.
- Maintaining records of the OHS&E with the help of local HSE&QA team.
- Implementing this procedure. Liaise with corporate HSE&QA team if required.

# SE&QA representative

- Coordinating ) ith Zonal HSE team leader for carrying out HIRA and EAIA in their zones.
- Liaise with supports HSE&QA team and zonal HSE team leader for Unbac. Reviewing/monitoring HIRA and EAIA in their zones and providing input on any changes.

4.4 Departmental Head of Executing Department
Acquiring PTW for any activity and requires prior permit to identify and mitigate safety risks. Ensure implementation of JSA for job/activity performed outside SSGC permanent locations.

## 4.5 Employees

Participating in the identification and gent of OHS&E risks when required by either Zonal HSE team leader or HSE&QA representative.

# 4.6 Visitors & Contractors

Identifying and reporting any risk or hazard at any location of SSGC. This also includes the worksites and SSGC temporary locations during project executions.

# 5. DECISION MATRIX

Type of Risk/Hazard Assessment	Methodology	Responsibility.
HIRA	Periodic risk assessment of SSGC's existing facilities/installations such as Head office, Headquarters, Regional offices etc.	
" PIW	On-site Risk assessment (for Permanent Locations) for any routine/non-routine activity that requires prior permit to identify and mitigate safety risks.	Departmental, head/Contractor executing the task/activity requiring PTW
JSA	On-site Risk assessment (for Field Locations) for any routine/non-routine activity.	Departmental head/Contractor executing the field activity

Integrated Management System

MOC	Risk assessments for new Projects, major changes or modifications in existing designs	MOC owner
·	and infrastructure.	

Risk Assessment and Management Procedure is divided into five sections based on the type of risk assessment needed:

- Section 1: Context of the Organization.
- · Section 2: Hazard Identification and Risk Assessment.
- Section 3: Permit to Work.
- Section 4: Job Safety Analysis.
- Section 5: Management of Change.

## 6. PROTEDURE

# Section 1 Context of the Organization

## . 6.1. Context of the O gar ization

i. Management defines score of the company services and its boundaries considering the internal and external issues of the organization.

ii. In consultation with HSE&QA, the agement & Zonal Heads identify external & internal interested parties and maintain its list with needs a pactations. Interested parties are those stakeholders who receive company services, who may be impreted by them, or those parties who may otherwise have a significant interest in the company. Interested paragraph by include:

Interested Parties	Requirements	
Board of Directors	Good financial performance, legal compliance/avoidance of fines.	
Enforcers/Regulators	Identification of applicable statutory and regulatory requirements for the produce and services provided and understanding of the requirements.	
Customers	Value for money, quality service, facilitation and quick response.	
Bank/Finance	Good Financial Performance.	
Employees	Professional development, prompt payment, health and safety, work/life balance, employment security.	
Insurance:	No claims/prompt payment/risk management.	
Community	No complaint relating to: noise, parking, health and safety, pollution, waste.	
External providers (Vendors/Suppliers)	Prompt payment as per agreed terms, health and safety, long-term working relationship.	
Trade Unions	Compliance of local labor laws.	

MR

- HandBook | February

By using SWOT analysis or any other tool, identify external and internal issues that are relevant to iii. company operations and its strategic direction and that may affect the ability to achieve the intended result(s) of integrated management system. Internal and external issues can be positive or negative that can affect the OH&S management system.

# 6.1.1. Internal issues could include in risk & opportunity assessments, but are not

- Operations spread in two provinces.
- Ь. Complex transmission and distribution network.
- C. Succession planning.
- d. Contractual relationships.
- Availability of reliable, qualified and competent workforce. e.
- f. Staff retention...
- g. act of unionization.

# 6.1.2. External sques could include in risk & opportunity assessments, but are not

- Political: Government policies, political stability, international trade agreements etc.
- Economic: Fuel pails, prices, cash flow, credit availability, exchange rates, tariffs and inflation, general taxation sues etc.
- attem, education level, advertising and publicity, ethical & religious issues, demographica de
- Technological: Intellecture poperty issues, software changes, internet, technology legislation, associated/dependenties pology, renewable energy etc. ė
- Legal and regulatory: Consumer rejection, industry-specific regulation and permits, trade union regulations, employment la v, international legislation, human rights/ethical issues
- Environment: Customer demographics and
- Government: The directives from Prime Mir at Aministry of Petroleum (energy division), Ensuring the policy and the policy and
- Ensuring the policy and objectives are established for the pegrated management system and are compatible with the context and strategic direction
- The management shall monitor and review information about The organization. issues during the management review meetings. external and internal

# Section 2 Hazard Identification and Risk Assessment

## i. Hazard Identification and Risk Assessment

The Zonal HSE team leader in consultation with local HSE&QA representatives plan and initiate the HIRA and EAIA process. The assigned team must be competent and have enough knowledge of the entire process. Cross functional teams are recommended for such activity to cover all aspects during assessment. The record of OHS&E risk assessment is maintained in Hazard Identification & Risk Assessment Form (SSGC-IMS/CRM-F-01). The identification/assessment process shall take into account:

- Routine & non routine activities, any emergency situations.
- ties of ail persons having access to the SSGC permanent and temporary locations. Ъ.
- havior, capabilities and other human factors. .c.
- Desig ing fwork processes. d.
- e.
- Infrastructure, equipment and materials at the workplace or project site, whether provided by organization or others. f.
- Changes or proposed hanges in the organization, its activities or materials. Fabrication, installation of materials. Handling & disposal of vaste material. g.
- h.
- i.
- Purchase of goods & service
- that is related to risk assessment and implementation of necessary Any applicable legal obligation k. controls.
- Before commencement of any navo emtion/activity. l.
- azard identification and risk assessment information. Periodic Review for updating the existing

#### sessment: At SSGC, we adapt five steps of risk

- Step 1: Identify the hazards.
- Step 2: Decide who might be harmed and how.
- Step 3: Evaluate the risks and decide on precautions.
- Step 4: Record your findings and implement them.
- Step 5: Review your risk assessment and update if necessary

## Risk Assessment Matrix

Risk assessment should be carried out as per assessment matrix below

Risk	k Priority	Probability			
	· ortty	Very Likely	Likely	Unlikely	Very Unlikely
Co	Catastrophic				Medium
n 5 e	Significant			Medium	Medium
q น e ก	Harmful		Medium	Medium.	
C e s	Nasible	Medium	Medium:	Every	CV

		HAZARD CONSEQUENCE RATING TABLE
· Cat	astrophic	Hazard may cause death or total loss of one or more bodily functions. In case of failure a huge financial loss will occur.
. Się	gnificant	Hazard may cause severe injury, illness or permanent or partial loss of one or more bodily functions (e.g. prolong exposure to asbestos resulting in Asbestosis or prolong exposure to paint fumes resulting in Chronic Lung Disorder), or serious property damage, loss that may result in disruption of SSGC core activities.
H.	armful.	Hazard may cause a reportable incident i.e. an incident that results in the employee being unable to undertake their normal duties and may need medical treatment, or property damage, loss that result in partial disruption of SSGC core activities.
Ne	gligible	Hazard may cause minor injury, illness or property damage, first aid treatment is required only, very low financial loss.

1 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2	PROPABILITY RATING TABLE
Very Likely	Exposure to har archikely to occur frequently. Similar incidents reported more than once it SS GC during last 10 years.
Likeiy	Exposure to hazard kely to occur but not frequently. Similar incidents reported once in last 5 years in SSGC.
Unlikely	Exposure to hazard unlikely of cour.
Highly Unlikely	Exposure to hazard so unlikely that it is be assumed that it will not happen.

RISK PRIORITY TABLE	
Definitions of Priority	
Situation is considered critical, stop work immediately or consider cessation of this operation/task.  Must be fixed ASAP, Zonal HSE team leader should take immediate actions.	
Medium  Is very important, must be fixed within two weeks, Zonal HSE team leader considers short term and/or long term actions.	
Is still important but can be dealt with through scheduled maintenance or similar type of action However, if solution is quick and easy then fix it immediately. Review and/or manage by routine procedures.	

No

# Section 2 Hazard Identification and Risk Assessment

## iii. Risk/Impact Assessment Outputs

The output of risk/impact assessment may include the following:

- a. Identified operations of all hazards/aspects and risks/impacts associated with company activities/system etc.
- b. Classification of risk/impact.
- c. Description or reference to control the risks/impacts.
- d. Description or reference to monitor the risks/impacts.
- e. Identified competency and or training requirements.
- f. In their setting improvement objectives and programs for its achievement.

The risk/implicts let sures identified shall include controls such as termination/elimination, treatment of the risk/impact and substitution of risk by suitable means and where required tolerated as long as it meets local laws/legislation.

Use output of risk/impact assessments as input for the following:

- a. Setting objectives an targets.
- b. Training needs identification.
- c. Terminating the risking pact if it is practical.
- d. Facility engineering control
- e. Emergency Preparedness
- Administrative controls.
- g. Insurance.

The ultimate requirement is to reduce the riskup part to a level as low as reasonably practical (ALARP) i.e. where the trouble, difficulty and cost for further real tion becomes unreasonably inconsistent to the additional risk reduction obtained.

## iv. Risk Control

Elimination

Engineering

Administrative

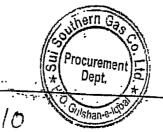

HandBook | February 2022

The hazards and risks are controlled through 'operational controls' by considering the following hierarchy.

- a. **Elimination:** The best way to control a hazard is to eliminate it. This can be achieved by making changes to the work process so that the task is no longer carried out, or by physically removing the hazard altogether. Elimination is the most effective way to control hazards and should be used whenever possible.
- Substitution: Substitution is the second most effective method for controlling hazards and risks. It is similar to elimination but involves the substitution of one higher priority risk by another lower priority risk.
- c. Engineering: Engineering controls are implemented by making changes to the design of an equipment or process to minimize its hazard. Engineering controls are based on the concept of "Doing it right the first time". Departments shall incorporate this concept during planning phase of any pure ct/process and must seek out for best possible solution in terms of OHS&E.
- d. Add properties: Administrative controls involve making changes to the way in which people work and promoting safe work practices via education and training. Administrative controls may involve training employees in operating procedures, good housekeeping practices, emergency response in the event of incidents such as fire or employee injury, and personal hygiene practices.
- e. Personal Protections Equipment (PPE): Use of PPE will kick-off where no other controls stated above are possible P schould be properly identified for specific process/job.

Statement	
System & work area Hazards	Likely Consequences
Access / Egress Obstructions	or injury, trips and falls
Asphyxiate Gas (CO2 fire suppression)	Co silite death by asphyxiation.
Buried Cables	Exposure to buried cables - major / minor injury
Electricity (HV/LV/) ************************************	Fatality available shock of senous burn injuries
Falling Loads / Objects	Serious head and dor body injury
Flammable Vapors / Gases / liquids - "	Explosion or fir
Flammable Materials	
Hot / Humid Work Environment	Heat stress, disoriental Des of consciousness
Moving Parts	Entrapment, major or minor they
Noise distant	Long term housing too It has a
Openings in Floor / Walkways	terrareamy use, infinite the state of the state of
Flammable Materials / Gases	Falls from height, major injury possili a atality
Heat, sparks and naked flames	Creation of hazardous area: fire expression
High intensity light (welding)	Burns to exposed skin
Housekeeping poor	Arc flash, short term discomfort long term loss of vision."
Lifting Operations	Slip, trip, fall, fire hazards, blocking fire escapes
Live Electrical Work	Falling or moving loads - serious head and to shock interest
	ratality by electric snock or serious burn injuries
Lone Working	No emergency response if injured.
Long Working Hours	Major / minor accident due to fatigue
Manual Handling	Muscular / skeletal injuries
New Task / Operation	Major / minor injury resulting from mistakes
	The state of the s

W

Oxygen deficiency	*Death of asphyxlation
Poor Lighting / Visibility	Minor / major injury, fall or impact injury
Slipping / Tripping Hazards	Minor injury, trips and falls
Spillages (Oil and chemicals)	Land contamination
Substances hazardous to health	Chemical burns, texic; poisoning, irritants, pollutant
Repetitive Task / Operation	: Muscular / skeletal injuries
(Rotating / Moving Part 基础设施	Major injury, potential for fatality
Sharo Edges / Cutting Surface	Amputation and cuts, predominantly to hands
Smoke / Fume	Curconsciousness, respiratory problems.
Trailing Cables and Hoses	Tripping hazard causing major / minor accident
Use of Hand Cols	Minor laceration and impact injuries
Line of Hazardous Supetanges	Burns to skin, eyes, and respiratory system. Environment Hazards
Use of Power Tools	্ৰাmpact injury, hand / arm vibration – loss of sensation over :
Use of Workshop Equipment	Major / mlnor injuries - entrapment, cutting tools
Vibration	Hand / arm vibration - loss of sensation over time
Work at Height	Major / minor injury

## v. Environmental Aspect Ider affication & Impact Assessment

## a. Environmental Aspects:

An Environmental aspect is any element of SSC b siness operation that negatively affect the Environment. While conducting environmental assessment, following appects are usually considered:

## "REDUCE CARBON FOOTPRINT"

What we can do:

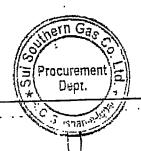

- Recycle: what you can
- Reduce: avoid:
   unnecessary
   consumption of
   resources
- Reuse: Buy items that are reusable and reuse them
- Unplug electrical:
   devices that are not in use
- Avoid unnecessary driving
- . Use LED bulbs.
- · Plant a tree

Emissions to air	Water Discharges
Solid non-hazardous waste	Solid Hazardous Waste
Consumption of natural resources/ En re	y Noise
Heat	or .
Dust · ·	/ib ation
Effect on visual / aesthetics	Use of Grone depleting substaince
Use of radioactive / nuclear material	Spillage of Temicals

For identification of environmental aspects and impact, each process/activity/equipment is assessed for its inputs and outputs. The inputs can be raw materials, utilities, energy etc. The output can be atmospheric emissions, liquid effluents, noise, hazardous/non-hazardous wastes, vibration etc.

The inputs, outputs, environmental aspects, their associated impact and controls are recorded on Environmental Aspect & Impact Assessment Form (SSGC-IMS/CRM-F-02).

WR

# b. Control of Aspects having Significant Environmental Impact:

The significant environmental risks require control measures to eliminate or reduce the impact to a tolerable level either by establishing objective or through application of controls by considering the 4R methodology i.e.

Some of the suggested operational controls are listed below:

- a. Design of environmental friendly processes/operations.
- b. Isolation or enclosure of hazardous material storage, process or noisy equipment.
- c. Mechanical exhaust systems/booths for controlling toxic materials.
- d. Replacement of potentially unsafe equipment or machinery with new equipment/machines that meet environmental standards.
- e. Electrical or mechanical safety interlock, guards, indicators.
- f. Safety devices (Relieve valves, NRVs, indicators etc.), measuring or monitoring evices/gauges, computerized feedback monitoring and control
- g. Environme diy disposal or treatment systems etc.
- h. Fire prevention esion systems.
- i. Containment walls
- i. Scrubbers.
- k. Dust Collectors.
- J. Other controls: Training, See

The record of operational controls of gnificant environmental risks is maintained on Environmental Aspect & Impact.Assessment Form (SSGC-IMS/2014-F-02).

After identification of aspects and ass nt of impacts, it is sent to HSE&QA Department for reviewing adequacy and correctness. Where re in-charge HSE&QA suggests necessary changes or improvement in risk assessment to concern d LHSE Team Leader.

Zonal HSE Team Leader ensures that enviro activities/processes/equipment are kept current by conducting the same assessment. aspects and impacts related ·

- a. Once every six months to update the information, and identify r SSGC-IMS/CRM-F-02 for recording new hazards and aspects w environmental aspects. (Use
- b. Carry out assessment, for new or changes in activities/processes
- c. When there is a change in laws & regulations.

d. IEE (Initial Environment Examination) / EIA (Environment In

In addition to all of above assessments, SSGC will carry out IEE / EIA as requir 🗪 Assessment): for new projects. It is the responsibility of corporate HSE&QA head/DMD/MD to en Julatory requirements compliance for all

When combusted:

One liter of Diesel produces 2.68 kg of CO2

One liter of Petrol produces 2.31 kg of CO2

One MMBTU of Natural Gas produces 53.07 kg of CO2 .

Р<sub>госигетепі</sub> Dept.

Integrated Management System

## Section 3 Permit to Work

## I. Permit to Work (PTW)

A Permit to Work (SSGC-IMS/CRM-F-03) is needed for any routine/non routine activity (Conducted within permanent locations of SSGC) where the work could expose persons to specific hazards. PTW should be acquired and maintained in the zones where job/activity is carried out. Normally following activities require PTW:

- a. Task based Hot Work operation such as welding, brazing, cutting, grinding.
- b. Confined space working. (tank cleaning etc.)
- c. Maintenança Work on High Voltage electrical equipment.
- d. Any janite all service involving Safety Risks such as work at height.

  e. Any Maintenance activity by any department/contractor which compromises critical safety system.
- f. Work involving interaction with asbestos.
- g. Work in areas mer there is a risk of exposure to hazardous chemicals or microorganisms.
- h. Any job/task/activity that requires additional precautions.
- i. Any specific activity per simed during development, modification and up gradation of SSGC's Vital Installations including SM //Valve Assembly/TBS/PRS etc.

## II. Exclusion

Following activities are not under the scope of PTW management, however the risk assessment, JSA and or process SOPs are implemented to come the associated risks for the following:

- a. Providing Gas connections to new su
- b. Emergency Response to Consumer en
- c. Planned enhancement of Distribution ne
- d. Work on live pipelines like hot tapping, instruing rvice Tee etc.
- e. Any major/minor rehabilitation/reinforcement

has If it's UNSAFE

- ✓ Report it
- ✓ Remove it
- √ Replace it

# III. Responsibilities

S No.	Functions	Details	Responsibility
1	Executing Authority	The department intends to carry out the task / activity that requires PTW.  Situation may arise where Executing Authority is same as Area Authority (e.g. HQs).	Fill out the PTW form. Ensures that task/activity is carried out according to the SOP and controls are implemented to ensure safe operations.  Immediately report any incident happened during execution of job to In-charge HSE&QA.
2	Area Authority	rea/Facility where the task activity is carried out.	Authorize PTW and verify the compliance during the execution of task/activity.  Authorized to stop work in case of noncompliance to PTW requirements.
3	Contractor	The Individual organization carrying out the Task Activity on behalf of the executing department.	Liaise with executing department to ensure the controls are implemented as per requirement identified in PTW.
4	HSE&QA	HSE&QA will identify the risk/hazards associated with the activity/task and propose controls. In Zones where HSE&QA representatives are not present, Zonal HSE	task/retinity during execution and identificanty gaps related to proposed con rols. Responsible to close the PT Wand maintains records
		•	Authorized to stop work in case of noncompliance to PTW requirements.

No

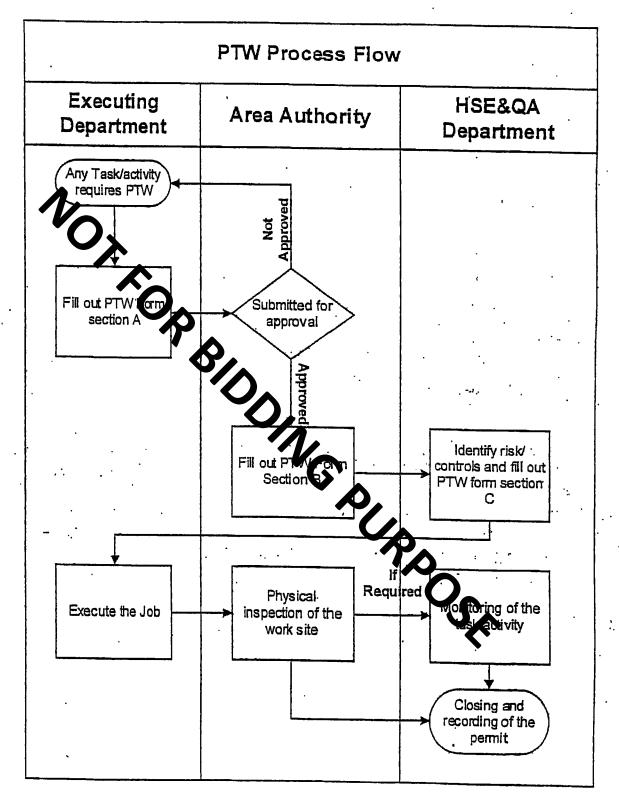

Integrated Management System

14

## IV. PTW Process Flow

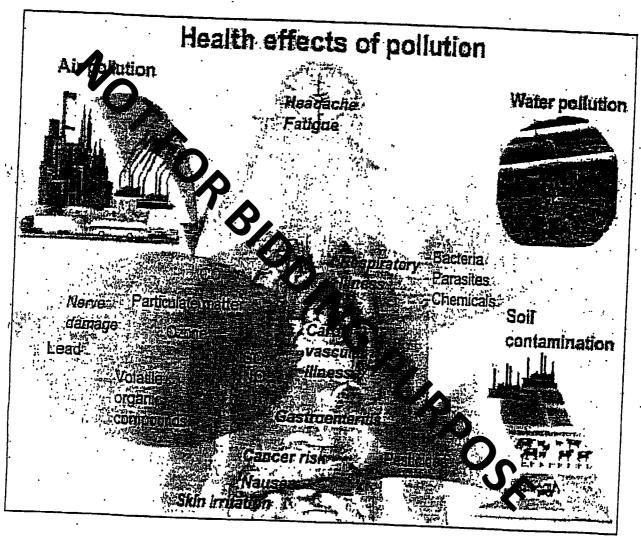

## V. Permit Display

Copy of the permit to work should be clearly displayed at the work site or in a location close to where the work activity is being undertaken. Executing department/contractors are also required to ensure that a copy of the permit to work is kept and made available upon request by Area Authority/ HSE&QA.

## VI. PTW Closure

Once the task/activity is completed the PTW form is returned back to HSE&QA/Zonal HSE team leader for closing and updating the records. A new PTW is required if the task/activity is not completed within stipulated time frame mentioned on PTW.

# Section 4 Job Safety Analysis

I. Job Safety Analysis (JSA)

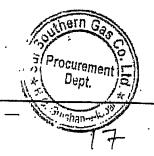

Job safety analysis is needed for any routine/non-routine activity (Conducted outside permanent locations of SSGC i.e. Field Locations) where the work could expose persons to specific hazards. Normally following activities require JSA (SSGC-IMS/CRM-F-04):

- a. Work on live pipelines like hot tapping.
- b. Any major/minor rehabilitation/reinforcement/maintenance work on existing distribution/transmission
- c. Installing service connection for new schemes. (Blanket JSA may be carried out for each scheme). d. Any Emergency maintenance work.
- uar job/activity requiring JSA as necessitated by HSE&QA.

# II. Respon

S No.	Functions	Details	Responsibilities
1	Activity In- charge/ Supervisor	n widual who is associated to carry out the tack activity requiring USA.	<ul> <li>List down the activities step wise and identify hazards and their controls</li> <li>Ensure that task/activity is carried with proposed controls</li> <li>Ensure the team/equipment involved are competent and safe</li> </ul>
2	Head Of Executing Department	Head of the department who is authorizing the task/activity requiring JSA.	Report any untoward situation  Authorize JSA  Ensure Adequate resources are provided to carry out the stractivity in safe manner.  Select competent team and team leads of the activity/task.  Submit a cropy of JSA:prior to job execution of HSE&QA/Zonal HSE
3	Contractor	The Individual / organization carrying out the Task/Activity on behalf of the executing department.	Liaise with executing department to ensure the controls are implemented as per requirement identified in JSA

NR

# Section 5 Management of Change

# I. Management of Change (MOC)

The purpose of this document is to provide all SSGC employees with instructions on Management of Change (MOC) process. Any changes that may affect quality, operations, safety, or the environment will be adequately assessed and must be approved by management or a designated representative of management prior to implementation.

Risk Assessment for any new project, major modification in existing design /facility/ installation will be carried out using MOC methodology.

## II. Scope

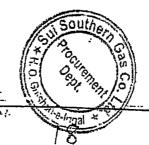

This procedure s intended to address those changes which may have a direct impact on SSGC's Integrated Management System The subsequent delivery of services.

To make sure that change assessed and documented in a consistent manner so that:

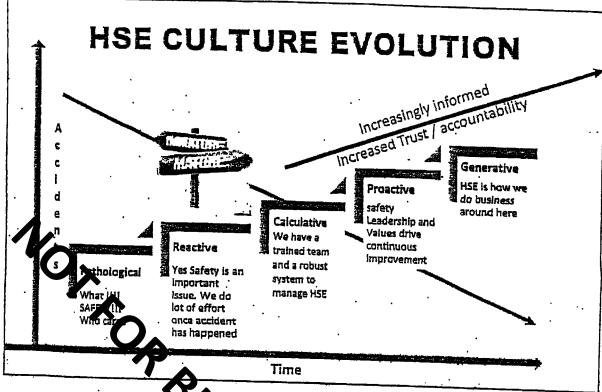

- a. Unnecessary or counterpreduc ve changes are prevented.
- b. Changes do not adversely and acty, the environment, quality, operations, or the level of service to the , client.
- c. No changes are made by individuals thout knowledge and/or agreement of all relevant parties.
- d. A record of the assessment rationale de nange assessment process is produced.
- e. To make sure proper change out of employe during operations is addressed.

## III. Responsibility

- a. MOC Owner: MOC owner is responsible to fill out the atesignated section of the MOC form ... (SSGC-IMS/CRM-F-05) which briefly describe the det ope of the project.
- b. Area Authority: Area authority is responsible to identify the possible impacts of the change that is taking place. Generally geographical head/zonal HSE team leader i elered the area authority.
- c. HSE&QA Department: HSE&QA Department is responsible to ab he change after assessing the risk and their controls.

IV. Definition of Change

For the purpose of this procedure a "charge" s an alteration to Processes;

- a. Documented information maintained by this
- b. Equipment, hardware, software, infrastructure
  - c. Personnel assignments and training.
  - d. Vendor selection and management.

Other types of changes not listed above can be related to any element of the process, such as inputs, resources, persons, activities, controls, measurements, outputs, expensions, activities, a

Note: Not all alterations to a system require the Management of Charles Process (MOC) (e.g. changing employees, editorial changes to HSE & QA procedures and forms, etc.)

## V. Levels of Change

## Level 1

a. Change which has limited or no effect on deliverables, operations, safety, work environment, etc.

## Level 2

 b. Changes to equipment, procedures and employee assignments that have a moderate impact on deliverables, operations, safety, or work emironment.

## Level 3

 Changes to equipment, procedures and employee assignments that have a major impact on deliverables, operations, safety or work environment.

MR

HandBook | February 2022 .

## VI. Change Procedure

Step 1 - Initiation of Change

Any employee or contractor that becomes aware of a need for change can initiate the MOC process. The originator will notify their immediate Supervisor/Manager, detailing the proposed change on the MOC form (SSGC-IMS/CRM-F-05). With concurrence by their Supervisor / Manager, the MOC form shall then be forwarded to In-charge HSE&QA for review.

## Step 2 - Review by in-charge HSE&QA

In-charge HSE&QA will review the MOC request for potential operational impact, cost/benefit analysis, and associated risk, with input from the appropriate process owners (Moderate Impact) and/or SSGC top management (Major Impact), as appropriate to the change under consideration. Changes that have negligible impact may be processed by the Management Representative directly.

If the request is accepted, in-charge HSE&QA will detail any actions deemed necessary to control the impact of the change and forward the request to the appropriate process owner for implementation.

## Step 3 - Implementation of A tions

The process owner will be responsible for implementing and coordinating the actions required for the proposed change. If it is determined that further a sessment is required during the course of implementing the change, these assessments will be documented and submitted for review prior to completing the change process. Only after all assessments have been reviewed thall the MOC process be continued and monitored through completion.

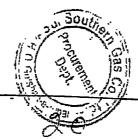

## VII. Closing out the MOC

The in-charge HSE&QA will review the satisfactory implementation of the proposed change, and effectiveness of any corresponding control measures.

## VIII. Record Keeping

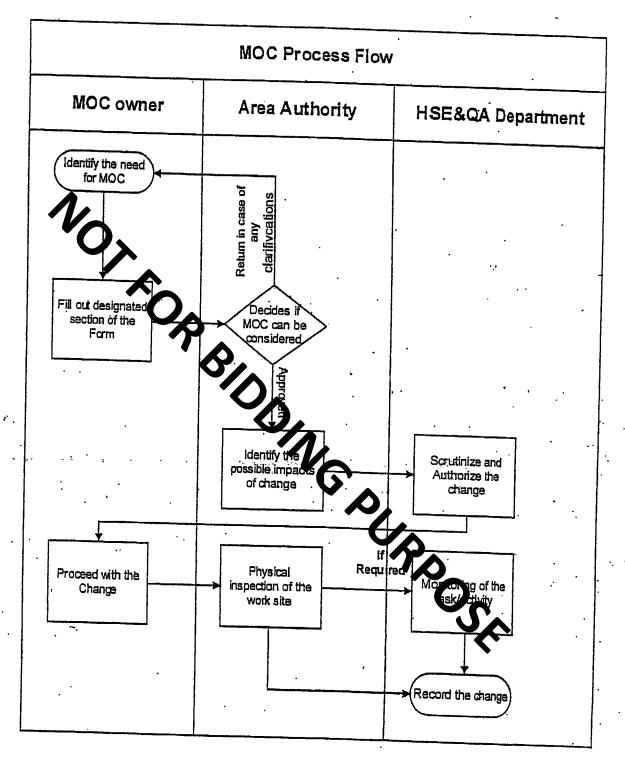

The In-charge HSE&QA will retain a log showing each MOC (Control Mor ber of Log) and file the initial MOC request (SSGC-IMS/CRM-F-05) with all information supporting the action taken throughout the MOC process. These records shall be maintained for a minimum of 3 years.

N

7. TYPICAL SSGC OPERATIONAL HAZARDS AND THEIR POSSIBLE CONTROLS Some of the common Hazards related to SSGC operations are tabulated below and may be used while doing Risk assessment. There might be other hazards related to a particular activity/ operation or process. These hazards should be identified accordingly along with possible controls.

## 7.1. PHYSICAL

1 144 P. 17 1 144 Oct. 1	· · · · · · · · · · · · · · · · · · ·
Hazards ***	Control Measures 1977
Adverse deather	Shelter, personal protective equipment (PPE; cold / wind / rain-proof).
Poor / Bad le se eeping	Improved safety attitude, good management, safety inspection, good work layout.
Contact with hot / c d surfaces	Insulation, guarding, PPE (gloves, face shields, insulated clothing).
Drowning Transfer of the Property of the Prope	life guarding, lifesaving equipment, presence of first Aider.
Excavation work	Pine cal barriers; fencing, shoring, safe system of work, signs, caution tope.
Fail from height	Edge protection, safety lines / harnesses, safe means of access, (e.g. conffolding), safe system of work (e.g. permit to work).
Fall of material from height	Alternative storage physical means of securing.
Lighting - Lighting	Good work area design and othering equipment, measuring of illumination (LUX level), appropriate lighting
Awkward lifting while laying pipes in trenches	Define weight limits, use mechanical means for lifting and laying of pipes.
Noise	Reduction at source, insulation, PPE
Slips / Trips / Falls on	Good maintenance of work areas, good house keeping, good
same level	cleaning, good footwear.
Stacking	Good work area layout, height limits, weight limits, strong packing; mechanical assistance.
Vibration	Elimination or reduction at source, damping, insulation, PPE.

Th

# 7.2. MECHANICAL

Hazards	Control Measures
Hand tools	Periodic inspection at a total
Machines	Periodic inspection, electrical testing and maintenance.  Periodic inspection, testing and maintenance, physical barriers (guarding), safety interlocks, supervision and training.
Mechanical lifting	the daming:
operations	Periodic inspections, maintenance, supervision and training.
Manushandling	Regular assessment of handling techniques (Improvisation to eliminate stress / fattique, training in good lifting techniques:
Moving vehicles	Good road layout within premises, proper signs, vehicle maintenance, speed limit, enforce SSGC driving policy, defensive driving classes.
Over Pressure	Proper identification of pressure vessels, preventive maintenance ressure indicators, alarms, PRV's where required, periodic installation.

Live working  Avoid (i.e. No Live Vorking), use competent / trained staff.  Regular inspection, testing of electrical integrity and replaceme (where appropriate).  Heaters (elements)  Isolate from combustible material, see ling.  Electrical testing and maintenance, good as a size of circuit periodic inspection for design load vs. actuated double insulation, proper grounding.  Electrical cables / cords  Use factory assembled cords, always use plugs, no naked wires power Lines.  Look out for signs, contact local utilities (XE WAPDA) for locations is tays at least 10 feets. ## 7.4. FIRE

Hazards	Control Measures
Combustible materials	Avoid, reduce storage of combustible materials, isolate from sources of heat and ignition.
Flammable gases	Storage of gas cylinders (e.g. hydrogen, acetylene) outside in an isolated, well-ventilated area; signs, no smoking, color-coding.
Flammable solvents	Controlled storage, use and disposal (e.g. limit quantities held), fire proof storage, signs, no smoking, no naked flames, emergency plans.
Heaters	Segregation from sources of combustion, guarding special construction if used in hazardous areas.
Oxidizing agent	Chemicals that are a source of oxygen, e.g. hydrogen peroxide, segregate from sources of combustion(e.g. flammable solvents).
Oxygen (gas and liquid	Segregate from sources of combustion, controlled storage and sage.
Smoking materials	smy first policy.
Static electricity	Limetre of static generators in hazardous areas. Use of anti-se-
Gas Leaks	Odourizatio fo timely detection where possible, proper joining methods, Field 227 by, training, leak detection techniques.

# 7.5. OTHER

Hazards	Cont Measures
Chemical: Chemical substances, Corrosives (acids; alkalis), Carcinogens, Irritants (e.g. Ammonla)	Avoid use, substitute less harmal substances, use, maintain and test engineering controls, monto, or hazardous substances; inform and train employees, use par or al protective equipment (PPE), emergency plans for uncontroller repases.
Biological: Biological agents: (micro-organisms: pathogens); mutagens, carcinogens); Rodents, Snake Bite	Avoid: use, substitute less harmful substance, use maintain and test engineering controls, monitor for have deal substances, inform and train employees, use personal projective equipment (PPE); emergency plans for uncontrolled releases. Periodic rodent control drive, identification and elimination of snakes and other harmful reptiles specially in remote locations of SSCC.
	employee information and training, good personal hygiene, protective clothing. Testing if required from accredited lab (AKUH, PCSIR), Involve canteen contractors, c redibility of product/Services.
gonomics	Educate /: Train employees; avoid repetitive tasks, procure- ergonomically design products (e.g. chair, Computer desk,

**SWOT** Analysis

Revision 00

Issue Date: July, 2021

POSITIVE	
STRENGTHS	WEAKNESSES
Having vas experience of Transmission and Distribution of Natural gas.	Complex distribution network leading to UFG.
Infrastructure available is two provinces.	Substantial resources required for up gradation.
Highly competent human it source.	Lack of succession planning.
Certified to international stantages	Takes extra time to implement all requirements because of big size of the organization.
Sole Meter manufacturing plant in Pakista	High price.
Serving the nation since decades.	Government new rules implementation.
Positive image of the company is already established in the Society.	Resource transfers.
OPPORTUNITIES	THREATS
Monopolistic market.	Depleting natural gas:
Over 2.8 million customers.	Customers may turn to renewable energy sources.
Import of LNG.	High cost.
Huge infrastructure of Transmission and Distribution to connect new customers.	Gas theft and leakages resulting in huge loses.
Reduction in the lead time to facilitate complainant.	Change in Government policies.
Advancement and use of latest technology to control the system will create more effectiveness.	Criminals threats on security.
	The state of the s

## 1. PURPOSE

The purpose of this document is to define a mechanism of incident and near miss reporting investigation & propose corrective/preventive actions against near miss, incidents and accidents.

### 2. SCOPE

This procedure is applicable to all incidents (i.e. accidents & near miss) which take place within SSGC premises or outside SSGC premises i.e. its installations or work -related sites which are under the scope of management system.

"Anything that can go wrong, will go Wrong"

## 3. DEFINITION

a. Incident: Nork-related event(s) in which an injury or ill health or property day age (regardless of severity) or fatality occurred, or could have openred.

b. Accident: An incident in which an injury or illness or property damage actually occurs .

c. Near Miss: A Near Miss san unplanned event that did not result in an injury operty damage, but had the potential to do so.

d. CPR: Cardiopulmonary resus

e. Emergency: An emergency is a pn.that poses an immediate risk to health, life, propert nvironment.

Incident

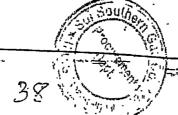

harmful

Harmle

INCIDENT / AC **OSSES** 

Loss of Life leduced quality of life DIRECTIOSS Visible) Injury to people Damage to Company Reputation Investigatic \* ir = INDIRECT LOSSES (Invisible) Clearing the Site and Damage to Equipment, conducting repairs Building, Tools etc. Time and resources utilized in hiring Legal costs and training new worker

CORRECTIVE

# Investigation and Corrective Action

Incidents are investigated by the team constituted by In-charge HSE&QA. If required, a cross functional team may be formed. Depending upon the situation, Incharge HSE&QA will decide whether to investigate or not any major/minor incident/accident, considering following factors:

- b. Time lapse between reporting of the incident and the actual occurrence of the incident.
- c. Lack of supporting information.

- a. Determination of root cause using any suitable method like tripod analysis etc.
- b. Investigation will be conducted as soon as possible after the incident, following the activities required controlling the hazard.
- c. When indicated by the severity of the incident, steps to secure the incident site must be initiated immediately to ensure that investigating party can reconstruct the events leading to the incident,
- d. Individual interviews will be conducted with each person present at the time of the incident. The following rules are to lowed for interviews with all individuals:

  1. The witnesses should be interview promptly, separately and privately.

  - 2. The interviewer should avoid que tio is that give a yes or no answer.
  - 3. After the interview, the interviewer straight document any concerns identified.
- e. The investigation will be focused at determining the root cause and therefore:

  1. The investigator or investigating team must focus on getting accurate and complete
  - 2. Facts must be separated from opinions, and precedevidence from circumstantial
  - 3. Each concern identified in the investigation must be full payressed.
- f. Upon completion of the investigation, the team will fill and sub nit be Online Incident Investigation Form (SSGC-IMS/IAM-F-02). It includes Background inormation, Root Cause Analysis, Conclusion and Recommended Corrective / Prevent
- g. In all cases, the Incident investigation must be completed within 07 working days from the incident notification date. Depending upon the nature of investigation, in-charge HSE&QA may extend the report submission timeline.
- h. Determination and implementation of viable corrective/preventive actions to eliminate the causes of incident.
- i. In-charge HSE&QA / Zonal HSE Team Leader ensures that the corrective/preventive actions assigned to concerned department/personnel, to be completed within agreed time frame.
- j. It is responsibility of the Zonal HSE Team Leader to:

- 1. Provide leadership role in implementation of corrective/preventive actions within the agreed timescale.
- 2. Ensure that corrective / preventing actions are effective in eliminating / reducing the
- 3. Maintain record of Incident Notification Form and Incident Investigation Form of their respective zones.

#### 4.4. Updating of Assessment

After the incident, depending upon the nature of severity and risk, the assessments (risk assessment, environmental aspect impact assessment) of specific activity / department will be updated including controls, risk level, likelihood etc.

#### 4.5. malysis and Review of Actions

The data of incidents will be evaluated and investigation outcomes will be shared with the management during management review meetings to seek advice and to discuss the effectiveness of meas re: / actions implemented.

### 1. PURPOSE

The purpose of this procedure is to define a frame work for identification of emergency situations which arise in company operations and for developing emergency preparedness and response plans to mitigate and manage risks arising from such situations or events. The Procedure defines

requirements for business continuity planning post emergency situations to bring the business on-line.

Purpose of the procedure is to

- Formulate plan, responsibilities and actions to be taken to handle any emergency situation.
- Identify potential emergency situations and response plans to minimize or avoid actual & potential hazards of any emergency situation.
- Define mechanism and frequency to test plan so as to ensure prepared ress and effectiveness of emergency response system.

2.

This procedure is applicable to all locations of SSGC, its employees and any visitor physically present at the location of emergency site. Due to variations in nature of operations, various departments/sections have developed their own ER mans catering for their strategic, operational and physical requirements. The same includes HSE emergencies a sing from company's day to day operations in terms natural calamities, fire, major incidents with loss in our operan jor environmental damage, external terror or bomb threats, public unrest, war and etc.

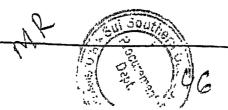

#### 3. DEFINITIONS.

- Emergency Situation: An abnormal situation that calls for immediate and urgent actions for safeguarding life of persons, protecting buildings, machines, tal installations and other assets.
- Rescue: It refers to responsive operations that usually involve the saving of life or prevention of injury during an incident or dangerous situation.
- Emergency Response Organization (ERO): it so youp of people, in each section (such as HO, Headquarters etc.), who prepare for and respond to a mergency incident, such as a natural disaster or goup of people, in each section (such as HO, 🧀 an interruption of business operations.
- Emergency Response Centre (ERC): It is a room suitably pped to handle any potential emergency situations. All emergencies are to be reported here.
- First Aid: It is the provision of initial care for an illness or injury. It is usually performed by non-expert, but trained personnel to a sick or injured person until definitive medical training at the accessed.
- Assembly Areas: If an evacuation to the outside is appropriate, the periodical assembly areas for personnel shall be far enough away from the building, structure or with the ensure that, where practicable, everyone is protected from falling glass and other objects.
- Emergency Evacuation: It is the immediate and rapid movement of people away om the threat or from the place of the hazard.

### RESPONSIBILITIES

Responsibilities for the particular department/personnel are identified in the response plans prepared by various departments and sections. General responsibilities for Emergency response organization are as under:

- Rush to the area of incident without any delay.
- Immediately assess the situation and initiate the remedial actions. b.
- Call the fire brigade & other emergency services like ambulances if required.
- Ask/inform all personnel present within premises, using megaphone or any other means, for complete evacuation if situation goes out of control.
- Inform all to go back to their work places using megaphone or any other suitable means when the situation comes under control and the area is free from any hazard.

- HandBook | February 2022 🖫

### PROCEDURE

The HSE&QA In-charge and department heads shall ensure that all emergency situations are identified during risk assessments performed and emergency response plans are implemented within the departments. They shall also ensure that all employees are made aware of their emergency situations and how to respond during a real emergency. They shall ensure that employees including emergency team members in their respective departments are trained to respond to emergencies and mitigate risks arising out of real emergencies. Some of the potential emergency situations that might occur in SSGC along with the response plans are lis ted below. Sequence of actions for any response specified on each section's ER plan may change depending upon the emergency situation.

### **Emergency Considerations**

The following areas of needs to be given consideration while identifying potential emergency situation but the same need not be limited to these areas:

- osion Fire #
- Heavy age of Toxic/flammable chemicals or leakage of gas
- Heavy ra
- Earth quake
- Bomb threat
- Building & office lock /shelter in place
- Active shooter/hostage si

### 6.1. Fire & Explosion

in case of fire & explosion each person expresent within the premises must act as per but not limited to the following in a stions:

- Give voice alarm FIRE! In case of fire to all ne ediate employees in the area.
- Push the nearest located call point butto (in ) ase of fire (if present): b.
- . Immediately inform Emergency Response C. ration through phone or in person.
- Try to control the fire by using fire extinguishers d. re extinguisher anly if you have been trained.
- R'emove all explosive, inflammable and poisonous may the maximum possibility. . .
- f. Shut off main valves of gas and circuit breakers.
- Stay away from the fire in case it is not controllable... g.
- Report to the designated Assembly Point away from the scene of the h. plosion if asked by Emergency Response Organization through emergency exits and wait for the further ructions.

# 6.2. Heavy spillage of toxic/flammable chemicals or leakage of

In case of heavy spillage of toxic/flammable chemicals or heavy leakage of Gas each personnel present within the premises must act as per but not limited to following instructions:

- Immediately inform Emergency Response Organization through phone or in person, a.
- Eliminate all ignition sources (sparks/flames/heat) from the immediate areas. b.
- Turn off gas supply from nearest control valve... C.
- In case of gas leakage in confined space, proper measures (opening windows, doors etc.) should be d. taken to ventilate the gas. Ensure the availability of fire extinguishers.
- Stop leaks if this can be done without having any risk. e.
- Do not touch or walk through spilled material.
- Prevent entry into waterways, sewers or confined space. g.
- If available wear the Personal Protective Equipment recommended. h.
- Arrange immediate cleaning of spilled chemical by taking suitable precautions

FIRE TRIANGLE

Integrated Management System

opurement

In case of emergency situation of heavy rain/flood, personnel must remain present within SSGC premises if the situation gets worst outside. In case of water entering in department/office each person must act as per but not limited to the following instructions: Try to stop water by keeping sand bags. b.

- Protect building, machines, equipment, tools, parts & material.
- Shut off Electricity and Gas if necessary.

Following precautions should be taken by the departments/sections, located under rain/flood threat areas:

- Ensure no material is placed outside in open area which may be affected by rain. a.
- Ensure proper drainage system at vital installations so that every valve, equipment, electrical board etc. be accessible in case of any emergency. C. . d.

- e.
- Sufficient quantity of tarpaulin and rain suit is available to meet the rainy condition.

  Keep the drain line open all the time.

  All pumps used for draining out the rainy water are in running condition.

  Sufficient quantity of sand bags is available to stop entering the water inside, which may be placed in

		CLASSES OF FI	RE
Class	Material	Examples	Type of Fire Extinguisher to b
· A .	Solids.	Paper, voo plastic, etc.	used
В:	Flammable Liquids		Water
:O ·		Paraffin, ps fol pilette.	CO2     Dry Powder

	Electrical Apparatus	Short-circuiting, over loaded - electrical cables, etc.	CO2 Fire Extinguisher
F	Cooking Oil & Fat	Animai fat, etc.	properties based: Potassium

## 6.4. Earthquake

In case of earthquake shocks each personnel present within the premises must act as per out not limited to the

- Immediately inform Emergency Response Organization through phone or in person.
- Immediately Evacuate to Assembly Areas (in open space where you can keep distance at least one half b. of the height of the building) after the shocks dampen. C.
- Shut off all switches and valves of main supplies of gas and electricity. (If possible) Maintain your senses, do not let them disperse. d.
- Protect yourself by sitting on side of tables, furniture & under strong structures. Be aware of falling walls, e. debris, heavy objects and electrical wires. f.
- Stay away from loosely hanging objects that may fall after initial shock and tremors.
- Wait for further instructions from Emergency Response Organization.
- ERO should keep in touch with the metrological department / media for aftershocks and future forecasts.

- HandBook | February 2022

- The Bomb Disposal Department shall be allowed to operate in the company premises as deemed e. appropriate.
- On getting clearance from Bomb Disposal Department normal routine shall be adopted as advised by f. Emergency Response Organization.

### 6.5. Bomb Threat

In case of bomb threat each personnel present within the premises must act as per but not limited to the following

- Immediately inform Emergency Response Organization through phone or in person. a.
- b. Maintain your senses, do not let them disperse.
- Report to the designated Assembly Point if asked by Emergency Response Organization through emergency C. exits and wait for the further instructions.
- Bomb Disposal Department shall be called by Emergency Response Organization. d.
- The Born b Disposal Department shall be allowed to operate in the company premises as deemed appropriate.
- ng clearance from Bomb Disposal Department normal routine shall be adopted as advised by Response Organization.

# 6.6. Building or Chice Lockdown/shelter-in-place

If a situation calls for builting or office lockdown, the personnel present within premises should act as per bar, ot limited to following instructions:

a. Remain calm and star will your colleagues.

- b. Try to stay in pairs.
- Do not leave the room and/or building under a lockdown situation until asked otherwise.
- d. · Keep quiet and away from doors a dows.
- if a gunshot is heard, lay down on the loo and shield under/behind furniture as much as possible.

### Take care:

Don't try to be a hero in. emergency situations: do not place your own life on health or that of others in danger

Ber prepared for .unexpected!

### 6.7. Active Shooter/Hostage Situation

In case of shooter/hostage situation each personnel presentation the premises must act as per but not limited to the following instructions:

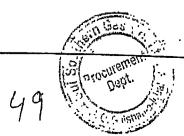

- If it is safe to do so, exit the building; if not, lock or barricade to uself inside a room.
- b. Turn off lights; cover and lock the windows, and lay on the floor
- If the shooter(s) leave the area, go to a safer place, if possible. (average escape route/plan in mind, keep your hands open and visible, and follow any instructions given by law en to ment.
- Call the Police/Rangers when it is safe to do so. Remain calm, use quiet voice, and provide as much d. information as possible (your name and location, details about the shooter information as possible (your name and location, details about the shooters) appearance, weapons, etc.). If you can't speak, leave the line open so the responding authority can list a and try to pinpoint the location.
- Cooperate and negotiate with the shooter, in order to buy as much time as possible until the rescue team reaches.

### **EMERGENCY NUMBERS**

In consideration of the emergency numbers to be included in the emergency plan, the following should be taken. into account:

- Fire brigade/civil defense or equivalent
- Police.
- Ambulance service.
- Hospitals/Clinics.
- Mutual aid agreements/neighbors.
- Environmental protection agencies.
- Key company personnel.

Integrated Management System

### **EVACUATION**

All Emergency evacuation routes/doors should be accessible at all times. No hindrances should be placed in the route. All employees should be familiarized with the evacuation routes of their premises.

All employees should immediately evacuate their premises and assemble at the assembly areas (identified by each section). During evacuation following instructions should be followed.

- Take only keys, wallets and essential belongings with you.
- Leave the building/premises immediately, do not try to investigate the source of the emergency. b. C.
- Walk, don't run, to the nearest exit.
- d. Use stairs, not elevators.
- Assist people with special needs.
- As you make your way out, encourage those you encounter to exit as well.

## THINGS TO BE EVACUATED

In case of e excy, evacuation should be carried in the following order:

### 9.1. Personnel

Those personnel who do not have sound health such as patients of Heart, Asthma and physically/mentally. disabled people are to be accuated on priority basis. 9.2. Raw Material

Raw material which is e tole in inflammable and poisonous must be removed. Similarly, important lightweight items that are easy ry must also be removed.

### 9.3. Documents

Important records and files must also

### 9.4. Equipment

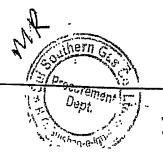

Cash Lockers, Computer Sets, External H es, Expensive Tools and Fixtures must also be removed.

# 10. TESTING AND EXERCISES

Testing and exercise of the emergency response plan should be conducted at each location of SSGC to evaluate the effectiveness of the preparedness plan. The preparedness plan record and observations of the exercise should be recorded on Emergency Drill Form (SSGC-IMS/ERP-F-0).

Each section should nominate the person who is responsible periodically conduct the exercise: The frequency and type of drill at each location should be as below:

Location	Type of Emergency Drill	Frequency
<ul> <li>a. Head Office</li> <li>b. Regional Offices</li> <li>c. Billing Offices</li> <li>d. P&amp;C Offices</li> <li>e. Store (all locations)</li> </ul>	Evacuation and Mock Emergency Drill (all employees)	Six Monthly
f KT /Transmissis	Fire Fighting Drill by Emergency Response Team	Six Monthly

HandBook | February 2022

Meter Manufacturing	Evacuation and Emergency Mock Drill (all employees)	
Plant	Fire Fighting Drill by Emergency Response Team	Quarterly
Headquarter Stations	Evacuation and Emergency Mock Drill (all employees)	Six Monthly
	Fire Fighting Drill by Emergency Response Team	Monthly

# 11. AVAILABILITY AND MAINTENANCE OF ER EQUIPMENT:

Zonal HSE team leaders ensure that emergency detection and response equipment are identified, available grymaintained in their respective zones. A joint inspection will be carried out periodically to verify the Equipment. The record shall be maintained on Inspection and Monitoring of ER Equipment Form (SSG C-IN S/ERP-F-02). Each zonal HSE team leader shall maintain record of their respective zone and share with In-charge-HSE&QA as and when required. The need for the emergency response equipment is determined by considering the hazards and associated risks with the particular location/operation/equipment/installation etc. The response equipment usually include but are not limited to:

- Fire extinguisher.
- Fire hydrant/hose/b ♦ ter pump.
- Smoke/gas detectors.
- Communication equipment a phones, Alarm systems; walkie-talkie ëtc.)
- First aid box.
- . f. ER vehicles/Ambulance.
  - Breathing apparatus.
  - Emergency lights.
- Hammer/Axe/shovel/ropes etc.

Frequency of inspection and monitoring of ER Equipment vill be as per table given below. However, if situation warrants, this frequency can be changed on the instructions of in-charge HSE&OA or Zonal HSE team leader.

	Location	·	Frequency
.a.	Head Quarter Stations	<u> </u>	riodusitely. 18 %
